Goya Black Paintings:

Goya's "black" Paintings Priscilla E. Muller, 1984 A review of Goya's life as it unfolded before he bought the quinta in 1819 will provide an impression of the complexion of the man who soon offered such awe inspiring imagery on the walls of two of its rooms An examination of the quinta setting which yields a somewhat revised plan of how the black paintings were seen will then demonstrate that the paintings were envisioned as a program consisting of two separate though not unrelated cycles Unhappily Goya's placement of the scenes cannot yet be repeated in full An analysis of the subjects set forth upon the quinta walls will illustrate the significances and relevancies they should have held at the time in which they were created and thus their *raison d'être* A consideration of possible antecedents which may have given impetus to the formulation and format of the program and indications of Goya's alertness to works by his contemporaries in art literature and the theater will furnish insight into the plans he may have held for the black paintings he brushed with such urgency within his quinta rooms Introduction page 13 The Black Paintings of Goya Juan José Junquera, 2003 Goya was the last of the old masters and the first of the moderns The Black Paintings presage surrealism and other aspects of the 20th century artistic vision The series forms a star part of the Prado's collections **The Interpretation of Goya's Black Paintings** Nigel Glendinning, 1977
