**Information Age** Kurt W. Beyer,2012-02-10 The career of computer visionary Grace Murray Hopper whose innovative work

in programming laid the foundations for the user friendliness of today's personal computers that sparked the information age. A Hollywood biopic about the life of computer pioneer Grace Murray Hopper (1906-1992) would go like this: a young professor abandons the ivy-covered walls of academia to serve her country in the Navy after Pearl Harbor and finds herself on the front lines of the computer revolution. She works hard to succeed in the all-male computer industry, is almost brought down by personal problems but survives them and ends her career as a celebrated elder stateswoman of computing, a heroine to thousands hailed as the inventor of computer programming. Throughout Hopper's later years, the popular media told this simplified version of her life story. In *Grace Hopper and the Invention of the Information Age*, Kurt Beyer reveals a more authentic Hopper: a vibrant and complex woman whose career paralleled the meteoric trajectory of the postwar computer industry. Both rebellious and collaborative, Hopper was influential in male-dominated military and business organizations at a time when women were encouraged to devote themselves to housework and childbearing. Hopper's greatest technical achievement was to create the tools that would allow humans to communicate with computers in terms other than ones and zeroes. This advance influenced all future programming and software design and laid the foundation for the development of user-friendly personal computers.

**Grace Hopper** Nancy Loewen, 2019-08. Computers touch our lives everyday in countless ways, but how do they know what to do? How do we communicate with them and they with each other? Language. Grace Hopper was a pioneer in computer programming, a woman whose scientific research led to computer language tools and technology still in use today. Her story is filled with trial and error, and readers can follow the journey step by step.

**Grace Hopper** Christy Marx, 2002. Recounts the life and accomplishments of the woman whose work programming early computers led to her achieving the rank of rear admiral in the United States Navy.

*Grace Hopper* Kathleen Broome Williams, 2004. When Grace Hopper retired as a rear admiral from the U.S. Navy in 1986, she was the first woman restricted line officer to reach flag rank and at the age of seventy-nine, the oldest serving officer in the Navy. A mathematician by training who became a computer scientist, the eccentric and outspoken Hopper helped propel the Navy into the computer age.

**Grace Hopper** Joanne Mattern, 2002-12-15. A biography of the teacher-inventor and computer pioneer who worked with the world's first computers.

Grace Hopper Jill C. Wheeler, 2018. There's got to be a better way. Welcome Grace College student. Back to Vassar. In the Navy. Against the clock. Around the clock. Enter COBOL. At the Pentagon. Rear Admiral Hopper.

*Grace Hopper* Fields, 2019-08-11. Women in Science and Technology. Grace Hopper gives readers in grades 1-3 a brief biography of one of the world's first computer programmers. Her work and ideas helped pave the way for modern computers. Grace believed there was always more than one way to solve any problem, and she used that belief in her lifelong work to bring computers to everyone. Grace asked the questions and helped solve the problems that transformed computers from giant machines that filled rooms to objects you can hold in your hand. The biographies in this collection introduce students to influential women in science and technology, from astronauts to medical doctors. Each book includes a glossary.
