**Vulgar Eloquence** Sean Keilen, 2006-01-01 This original book challenges prevailing accounts of English literary history arguing that English literature emerged as a distinct category during the late sixteenth century as England's relationship with classical Rome was suffering an unprecedented strain. Exploring the myths through which poets such as Geoffrey Whitney, William Shakespeare and John Milton understood the nature of their art, Sean Keilen shows how they invented archaic origins for a new kind of writing. When history obliged English poets to regard themselves as victims of the Roman Conquest rather than rightful heirs of classical Latin culture, it also required a redefinition of their relations with Roman literature. Keilen shows how the poets search for a new beginning, drew them to rework familiar fables about Orpheus, Philomela and Circe and invent a new point of departure for their own poetic history.

**Charting Shakespearean Waters** Niels Bugge Hansen, Søs Haugaard, 2005 This volume contains 11 new papers on Shakespeare written by members of the Department of English at the University of Copenhagen and other Danish universities plus a few international Shakespeare scholars. They fit into an overall theme and are included because they are about Shakespeare as text as theatre in his age and through the ages. Beside showing many different ways of thinking and writing about Shakespeare, the eleven articles fall into a pattern if read together in the order they are printed. The papers are varied and wide-ranging contemporary contexts, tradition, language and style, performance, translation and modern appropriation.

**Renaissance Paratexts** Helen Smith, Louise Wilson, 2011-05-19 In his 1987 work *Paratexts*, the theorist Gérard Genette established physical form as crucial to the production of meaning. Here experts in early modern book history, materiality and rhetorical culture present a series of compelling explorations of the architecture of early modern books. The essays challenge and extend Genette's taxonomy, exploring the paratext as both a material and a conceptual category. *Renaissance Paratexts* takes a fresh look at neglected sites from imprints to endings and from running titles to printers' flowers. Contributors' accounts of the making and circulation of books open up questions of the marking of gender, the politics of translation, geographies of the text and the interplay between reading and seeing. As much a history of misreading as of interpretation, the collection provides novel perspectives on the technologies of reading and exposes the complexity of the playful, proliferating and self-aware paratexts of English Renaissance books.
