Le vocabulaire fondamental du français James Douglas Haygood, 1953. La présente étude fondée sur les méthodes et les travaux de ces derniers investigateurs ne vise qu'à isoler deux aspects de ce problème du vocabulaire et les examiner d'un point de vue objectif. Si ce travail peut aider à forger un nouvel anneau dans la chaîne des faits et des idées susceptibles de résoudre une question si importante nous nous sentirons amplement récompensés de nos efforts.

Le changement en français Bernard Combettes, 2010. Cet ouvrage réunit une sélection d'articles issus du colloque international Diachron 4 Le français en diachronie qui s'est tenu à l'Université Complutense de Madrid du 22 au 24 octobre 2008. Les contributions sont axées essentiellement autour de trois grands thèmes : le français préclassique et classique en diachronie, l'onomasiologie et la linguistique textuelle en diachronie, les structures interrogatives et les constructions clivées. Un thème transversal apparaît tout au long de cet ensemble : celui de la périodisation du choix des critères permettant la reconnaissance de tapes successives dans le changement linguistique. Les études proposées ici constituent un ensemble bien représentatif des diverses tendances théoriques et méthodologiques qui traversent actuellement le champ de la linguistique diachronique du français en France comme à l'étranger.

French anticausatives Steffen Heidinger, 2010-09-22. How do new ways of encoding valence alternations emerge, how and why do they spread, and what are the consequences of their emergence and spread for already existing patterns? This book discusses these questions on the basis of a concrete example of valence alternation: the French causative anticausative alternation. The main focus of the proposed analysis is the anticausative member of the alternation and the relation between the two formal types of anticausative verbs in French: the reflexive and the unmarked anticausative. La branche se casse vs La branche a cassé. The branch broke. The emergence and spread of the reflexive anticausative: the consequences of these processes for the unmarked anticausative and the semantic relation between reflexive and unmarked anticausatives are analyzed on the basis of several corpus studies.

Construire des bases de données pour le français Benoît Habert, 2009. Comment structurer et gérer un ensemble hétérogène d'informations mêlant faits et textes ? À tous ceux qui ont travaillé un moment ou un autre de leur activité professionnelle sur des données de nature hybride, le présent ouvrage entend apporter de façon claire et accessible des réponses sur la façon de constituer, de modifier ou d'interroger une base associant données factuelles et données textuelles. L'ouvrage part de études de cas réels. Il présente trois vraies bases développées pour des besoins spécifiques par des linguistes, des littéraires et des personnels médicaux, mais représentatives de cas de figure extrêmement fréquents en sciences humaines. Sociologues, psychologues, historiens y reconnaîtront eux aussi les problèmes qu'

ils rencontrent pour l'analyse de leurs données. De façon la plus pédagogique possible, l'apport des bases de données se trouve explicité face aux limites des traitements de texte et des tableurs. Le lecteur trouvera une présentation de l'ensemble des opérations fondamentales permises par les bases de données : extraction, tri, regroupement, combinaison d'informations, et touchera du doigt la complexité des interrogations possibles et des questions auxquelles elles permettent de répondre de manière fiable et précise. La page web consacrée à l'ouvrage sur le site des éditions Ophrys (www.ophrys.fr) fournit un supplément de plus de 500 pages visualisable et imprimable. Ce deuxième tome de taille limitée permet l'acquisition effective plus de 650 copies de cran des opérations présentées dans le premier tome avec deux systèmes de gestion de bases de données : Access et MySQL. Il ajoute des approfondissements des compléments et plus de 70 exercices corrigés. Sur cette page figurent également des versions de chaque base de données pour chaque système.

Corinne Denoyelle est professeur au département des études françaises à l'université de Toronto. *Expletive and Referential Subject Pronouns in Medieval French* Michael Zimmermann, 2014-09-12. Medieval French usually analyzed as a null subject language differs considerably from modern Romance null subject languages such as Spanish in the availability of non-expressed subject pronouns. Specifically, it shows characteristics reminiscent of non-null rather than null subject languages such as the expression of expletive subject pronouns. The central goal of this book is to put forward an account of these differences. On the basis of the analysis of an extensive newly established data corpus, the development of the expression of both expletive and referential subject pronouns until the 17th c. is determined. Following a thorough discussion of previous approaches, an alternative approach is presented which builds on the analysis of Medieval French as a non-null subject language. The non-expression of subject pronouns licit in specific contexts in non-null subject languages is shown to be restricted to configurations generally involving left peripheral focalization. These configurations and concomitantly non-expressed subject pronouns are finally argued to be eventually lost for good in the wake of the initial observation by 17th c. writers of pertinent instructions campaigned for in highly influential works of language use.
