**Landscapes of Promise** William G. Robbins,2009-11-23 Landscapes of Promise is the first comprehensive environmental history of the early years of a state that has long been associated with environmental protection Covering the period from early human habitation to the end of World War II William Robbins shows that the reality of Oregon's environmental history involves far more than a discussion of timber cutting and land use planning Robbins demonstrates that ecological change is not only a creation of modern industrial society Native Americans altered their environment in a number of ways including the planned annual burning of grasslands and light burning of understory forest debris Early Euro American settlers who thought they were taming a virgin wilderness were merely imposing a new set of alterations on an already modified landscape Beginning with the first 18th century traders on the Pacific Coast alterations to

Oregon's landscape were closely linked to the interests of global market forces Robbins uses period speeches and publications to document the increasing commodification of the landscape and its products Environment melts before the man who is in earnest wrote one Oregon booster in 1905 reflecting prevailing ways of thinking In an impressive synthesis of primary sources and historical analysis Robbins traces the transformation of the Oregon landscape and the evolution of our attitudes toward the natural world *Rivers, Memory, And Nation-building* Dorothy Zeisler-Vralsted, 2014-11-01 Rivers figure prominently in a nation's historical memory and the Volga and Mississippi have special importance in Russian and American cultures Beginning in the pre modern world both rivers served as critical trade routes connecting cultures in an extensive exchange network while also sustaining populations through their surrounding wetlands and bottomlands In modern times Mother Volga and the Father of Waters became integral parts of national identity contributing to a sense of Russian and American exceptionalism Furthermore both rivers were drafted into service as the means to modernize the nation state through hydropower and navigation Despite being forced into submission for modern day hydrological regimes the Volga and Mississippi Rivers persist in the collective memory and continue to offer solace recreation and sustenance Through their histories we derive a more nuanced view of human interaction with the environment which adds another lens to our understanding of the past Frontiers Past and Future Carl Abbott, 2006 Abbott offers a fruitful new way to read science fiction one that also greatly enriches our understanding of western history and its impact on our collective imagination Detailing the overlap of science fiction and western fiction especially relating to their mutual interest in and concerns about frontier expansionism he reveals an unsuspected common ground that informs the writings of both camps Reviewing the work of many Hugo and Nebula Award winners as well as drawing upon popular film and television series like the Buck Rogers serials Abbott's study journeys across the far reaches of science fiction's universe **Reclamation Managing Water in the West, The Bureau of Reclamation: Origins and Growth to 1945, Vol. 1, 2006**, 2006 The History of Large Federal Dams David P. Billington, Donald C. Jackson, Martin V. Melosi, 2005 Explores the story of Federal contributions to dam planning design and construction Currents and Undercurrents Kathryn L. McKay, Nancy F.
