György Kurtág:

György Kurtág Bálint András Varga, 2009 The analysis of certain of Kurtág's works especially of concertante shows the way that his mind works no system no dogma no formulae rather basic human emotions expressed through means that speak directly to the listener's innermost feelings *Centre and Periphery, Roots and Exile* Friedemann Sallis, Robin Elliott, Kenneth DeLong, 2012-08-06 This book examines the impact place and displacement can have on the composition and interpretation of Western art music using as its primary objects of study the work of István Anhalt 1919-2012 György Kurtág 1926 and Sándor Veress 1907-92 Although all three composers are of Hungarian origin their careers followed radically different paths Whereas Kurtág remained in Budapest for most of his career Anhalt and Veress left the former in 1946 and immigrated to Canada and the latter in 1948 and settled in Switzerland All three composers have had an extraordinary impact in the cultural environments within which their work took place In the first section Place and Displacement contributors examine what happens when composers and their music migrate in the culturally complex world of the late twentieth century The past one hundred years produced record numbers of refugees and this fact is now beginning to resonate in the study of music As Anhalt himself forcefully asserts however not all composers who emigrate should be understood as exiles The first chapters of this book explore some of the problems and questions surrounding this issue Essays in the second section Perspectives on Reception Analysis and Interpretation look at how performing acts of interpretation on music implies bringing the time place and identity of the musician the analyst and the teacher to bear on the object of study Like Kodály Kurtág considers his work to be naturally embedded in Hungarian culture but he is also a quintessentially European artist Much of his production he is one of the twentieth century's most prolific composers of vocal music involves the setting of Hungarian texts but in the late 1970s his cultural horizons expanded to include texts in Russian German French English and ancient Greek The book explores how musicologists divergent cultural perspectives impinge on the interpretation of this work The final section The Presence of the Past and Memory in Contemporary Music examines the impact time and memory can have on notions of place and identity in music All living art taps into the personal and collective past in one way or another The final four chapters look at various aspects of this relationship **György Kurtág, The Sayings of Peter Bornemisza, Op. 7** Rachel Beckles Willson, 2004 György Kurtág's *The Sayings of Peter Bornemisza* 1963-68 is probably the most significant piece of music to have been composed in Hungary since the death of Bartók in 1945 Willson discusses the autobiographical associations in the piece but also its essentially European character *The Creative Process in Music from Mozart to Kurtág* William Kinderman, 2012-09-16 Great music arouses wonder how did the composer create such an original work of art What was the artist's inspiration and how did that idea become a reality Cultural products inevitably arise from a context a submerged landscape that is often not easily accessible To bring such things to light studies of the creative process find their cutting edge by probing beyond the surface opening new perspectives on the apparently

familiar In this intriguing study William Kinderman opens the door to the composer's workshop investigating not just the final outcome but the process of creative endeavor in music Focusing on the stages of composition Kinderman maintains that the most rigorous basis for the study of artistic creativity comes not from anecdotal or autobiographical reports but from original handwritten sketches drafts revised manuscripts and corrected proof sheets He explores works of major composers from the eighteenth century to the present from Mozart's piano music and Beethoven's Piano Trio in F to Kurt G's Kafka Fragments and Hommage R Sch Other chapters examine Robert Schumann's Fantasia in C Mahler's Fifth Symphony and Bartók's Dance Suite Kinderman's analysis takes the form of genetic criticism tracing the genesis of these cultural works exploring their aesthetic meaning and mapping the continuity of a central European tradition that has displayed remarkable vitality for over two centuries as accumulated legacies assumed importance for later generations Revealing the diversity of sources rejected passages and movements fragmentary unfinished works and aborted projects that were absorbed into finished compositions *The Creative Process in Music from Mozart to Kurt G* illustrates the wealth of insight that can be gained through studying the creative process

The String Quartets of Béla Bartók Dániel Péter Biró, Harald Krebs, 2014-04-25 Béla Bartók 1881-1945 was one of the most important composers and musical thinkers of the 20th century His contributions as a composer as a performer and as the father of ethnomusicology changed the course of music history and of our contemporary perception of music itself At the center of Bartók's oeuvre are his string quartets which are generally acknowledged as some of the most significant pieces of 20th century chamber music *The String Quartets of Béla Bartók* brings together innovative new scholarship from 14 internationally recognized music theorists musicologists performers and composers to focus on these remarkable works from a range of theoretical and methodological perspectives Focusing on a variety of aspects of the string quartets harmony and tonality form rhythm and meter performance and listening it considers both the imprint of folk and classical traditions on Bartók's string quartets and the ways in which they influenced works of the next generation of Hungarian composers Rich with notated music examples the volume is complemented by an Oxford Web Music companion website offering additional notated as well as recorded examples *The String Quartets of Béla Bartók* reflecting the impact of the composer himself is an essential resource for scholars and students across a variety of fields from music theory and musicology to performance practice and ethnomusicology

Gyorgy Kurtag who is still active at the age of 99 is the last representative of a great generation of composers who emerged after World War II A legendary chamber music coach and source of inspiration for composers and musicians around the world with a compositional output spanning more than 70 years Kurtag is widely regarded as one of the most original musical minds of our time In this volume scholars from three continents come together to explore Kurtag s music and its shifting contexts Some of the articles deal with theoretical questions How can his music be placed within the framework of the 21st century How does the concept of lateness or Central Europe define the nature and reception of his works How can philosophical concepts such as Deleuze and Guattari s rhizome or social theorist Manuel Castells space of flows contribute to our understanding of Kurtag s music And how can we understand Kurtag s unique relationships with performers and more generally with performance Other articles focus in depth on particular historical

periods in Kurtág's life such as the early Romanian years and communist Hungary in the 1950s. There are also fresh discussions of specific genres namely unaccompanied solo vocal pieces and the series of short piano pieces referring to a phrase that is now emblematic in Kurtág's universe: *Virág az ember* (Flowers we are).

The Contemporary Violin Patricia Allen Strange, 2003-01-21. Written by a composer and a musician, *The Contemporary Violin* offers a unique menu of avant-garde musical possibilities that both performers and composers will enjoy exploring. Allen and Patricia Strange's comprehensive study critically examines extended performance techniques found in the violin literature of the latter half of the twentieth century. Drawing from both published and private manuscripts, the authors present extended performance options for the acoustic, modified electric, and MIDI violin, with signal processing and computer-related techniques and include more than 400 notated examples. The authors begin with bowing techniques and proceed systematically through other aspects of string playing, including MIDI technologies. Their correspondence and research with many performers and composers, the book's extensive score and text bibliography, and the discography of more than 130 recordings make *The Contemporary Violin* a valuable contemporary music reference and guide. An additional benefit is its listing of Internet resources that will keep the reader up to date with recent developments in contemporary performance and composition. First published by UC Press, 2001.

The Composer-pianists Robert Rimm, 2002. The recordings made by Marc André Hamelin in recent years have cast new light on an extraordinary group of composers: Alkan, Busoni, Feinberg, Godowsky, Medtner, Rachmaninov, Scriabin, and Sorabji, whose works heralded a Golden Age of virtuosic writing for the piano. The Eight, as author Robert Rimm has termed these composer-pianists, have much in common: traits shared in our own age with Marc André Hamelin, their foremost interpreter. For all their evident differences of age, nationality, and philosophy, they each created music of unprecedented ingenuity, often complex and of immense scale, that stretched the limits of the piano's capabilities. And all were genuine virtuosos with the technical resources to play these demanding works in public. The volume includes rare photographs and concludes with an extensive bibliography, listings of the complete solo piano works of The Eight, and discographies of their solo piano recordings. In exploring the art of those who knew their instrument both as composers and as pianists, this book serves in the words of pianist Stephen Hough both as a fascinating, exhaustive study of the riches of the past and as a stimulating inspiration for the future.
