Feldmann,Wolfgang Müller,2003-06-30 The importance of production and use of high quality software is still growing as more and more businesses depend on information technology Well educated highly skilled and experienced employees characterize the situation in most companies in the developed countries Increasingly they work together in temporary networks with geographically distributed offices Using and developing their knowledge is a key issue in gaining competitive advantages We have learned during recent years that the exchange and development of knowledge which we call learning demands a great deal of human interaction However it is widely recognized that information systems will in many cases enable the sharing of experience across distributed organizations and act as a knowledge repository A Learning Software Organization LSO will turn Intellectual Capital into market shares and profit as it establishes the means to manage its knowledge The LSO workshop series was created in 1999 to provide a communication

forum that addresses the questions of organizational learning from a software point of view and builds upon existing work on Knowledge Management and Organizational Learning It aims at bringing together practitioners and researchers for an open exchange of experience with successes and failures in organizational learning Right from the beginning fostering interdisciplinary approaches and providing an opportunity to learn about new ideas has been a central issue of the workshop series The feedback that we have obtained in recent years has encouraged us to continue our work for a better understanding of the setup and running of Learning Software Organizations   Cutting Code Adrian Mackenzie,2006 Software has often been marginalized in accounts of digital cultures and network societies Although software is everywhere it is hard to say what it actually is Cutting Code Software and Sociality is one of the first books to treat software seriously as a full blown cultural process and as a subtly powerful material in contemporary communication From deCSS to Java from Linux to Extreme Programming this book analyses software artworks operating systems commercial products infrastructures and programming practices It explores social forms identities materialities and power relations associated with software and it asks how software provokes the re thinking of production consumption and distribution as entwined cultural processes Cutting Code argues that analysis of code as a mosaic of algorithms protocols infrastructures and programming conventions offers valuable insights into how contemporary social formations invent new kinds of personhood and new ways of acting
