Psychology Gregory A. Kimble, C. Alan Boneau, Michael Wertheimer, 2012-08-21 A major aim of the books in this series is to promote psychology s appreciation of the neglected giants in its history The chapters document the significance of these early contributions many of them made more than a century ago Most of the chapters are revisions of invited addresses delivered at psychological conventions Several of the authors are students colleagues or offspring of their pioneers and all of them are intrigued by the life and work of the psychologists about whom they have written All of the portraits are informal on occasion even humorous Some are impersonations telling stories in what were or might have been the pioneer s own words This book provides source materials for teachers of undergraduate courses in psychology particularly the history of psychology who want to add a personal view in their lectures and offer interesting readings for their students Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life *Parapsychology: Frontier Science of the Mind* J. B. Rhine, J. G. Pratt, 2010-06-01 Master magician Harry Houdini and English ghost researcher Harry Price were true pioneers in both establishing skepticism and scientific methods in the newly created field of paranormal research They set the foundation for future 20th Century researchers such as J B Rhine

Joseph Banks Rhine was a botanist who later developed an interest in parapsychology and psychology Rhine founded the parapsychology lab at Duke University the Journal of Parapsychology and the Foundation for Research on the Nature of Man He also initiated the Parapsychological Association Rhine also coined the term ESP I think the reader will find that 1957 s *Parapsychology Frontier Science of the Mind* is as relevant today as it was when it first written *Parapsychology, Frontier Science of the Mind* Joseph Banks Rhine, Joseph Gaither Pratt, 1957 **Philosophy of Pseudoscience** Massimo

Pigliucci, Maarten Boudry, 2013-08-16 A remarkable contribution to one of the most vexing problems in science the demarcation problem or how to distinguish science from nonscience Francisco J Ayala author of Darwin s Gift to Science and Religion What sets the practice of rigorously tested sound science apart from pseudoscience In this volume the contributors seek to answer this question known to philosophers of science as the demarcation problem This issue has a long history in philosophy stretching as far back as the early twentieth century and the work of Karl Popper But by the late 1980s scholars in the field began to treat the demarcation problem as impossible to solve and futile to ponder However the essays that

Massimo Pigliucci and Maarten Boudry have assembled in this volume make a rousing case for the unequivocal importance of reflecting on the separation between pseudoscience and sound science Moreover the demarcation problem is not a purely theoretical dilemma of mere academic interest it affects parents decisions to vaccinate children and governments willingness to adopt policies that prevent climate change Pseudoscience often mimics science using the superficial language and trappings of actual scientific research to seem more respectable Even a well informed public can be taken in by such questionable theories dressed up as science Pseudoscientific beliefs compete with sound science on the health pages of newspapers for media coverage and in laboratories for research funding Now more than ever the ability to separate genuine scientific findings from spurious ones is vital and *The Philosophy of Pseudoscience* provides ground for philosophers sociologists historians and laypeople to make decisions about what science is or isn't A manual to overcome our natural cognitive biases Corriere della Sera Italy

The Parapsychology Revolution Robert M. Science in the New Age David J. Hess, 1993 In *Science in the New Age* David Hess explores ideologies of the paranormal in the United States He offers a map of the labyrinth of views put forward by parapsychologists and skeptical debunkers spirit channelers and crystal healers Hollywood poltergeist scripts and prophets of the New Age Adopting a cultural perspective Hess moves beyond the question of who is right or wrong to the cultural politics of how each group constructs its own boundaries of true and false knowledge Hess begins by looking at each group's unique version of knowledge science and religion and at its story about the other groups Comparing the various discourses texts writers and groups as cultures he shows how skeptics parapsychologists and New Agers may disagree vehemently with each other but end up sharing many rhetorical strategies metaphors models values and cultural categories

Furthermore he argues their shared paraculture has a great deal in common with the larger culture of the United States The dialogue on the paranormal Hess concludes has as much to do with gender power and cultural values as it does with spirits extrasensory perception and crystal healing

A New Approach to Psi Lance Storm,2024-12-23 This book critiques conventional parapsychological viewpoints about extrasensory perception ESP and psychokinesis PK collectively referred to as psi Since the 1930s an over arching view on psi has been built on J B Rhine s research and theories at Duke University The author argues that there are fundamental problems with the psi paradigm and offers solutions based largely on Jung s Theory of Synchronicity treating the subject matter in a rigorous scientific way The synchronicity concept speaks to ambiguous psi terminology the narrow methodological approaches in psi testing and limited interpretations of psychic experience that do not consider the pivotal role of meaning This book considers problems with terminology findings and the psi construct from a Jungian synchronistic standpoint which gives credence to issues such as archetypes meaningfulness and numinosity An important new contribution to the understanding of psi this book will be of interest to practitioners and researchers working in the disciplines of psychology parapsychology consciousness studies and physics especially quantum mechanics
