Rhode,2021-08-02 An engaging account of ambition the forces that drive and constrain it and whether it serves our deepest needs Ambition is a dominant force in for human civilization driving its greatest achievements and most horrific

abuses Our striving has brought art airplanes and antibiotics as well as wars genocide and despotism This mixed record raises obvious concerns about how we can channel ambition in the most productive directions In *Ambition* Deborah L Rhode offers a comprehensive and engaging survey of the topic that focuses in particular on the nature of ambition in contemporary American life To do this she first explores three central focuses of ambition recognition power and money and argues that an excessive preoccupation with these external markers for success can be self defeating for individuals and toxic for society She then shifts to discussing the obstacles to constructive ambition and the consequences when ambitions are skewed or blocked by inequality and identity related characteristics such as gender race class and national origin Rhode further addresses the ways that families schools and colleges might play a more effective role in developing positive ambition Finally she examines what sorts of ambitions contribute to sustained well being such as building relationships and contributing to society rather than chasing extrinsic rewards such as wealth power and fame Drawing upon leading thinkers on the topic and contemporary social science research while laying out an agenda for how ambition can be better developed *Ambition* will force us reconsider the factors that shape our ambitions and whether those ambitions meet our deepest needs and highest aspirations
