Jerusalem A Study In Urban Geography:

Jerusalem Ian W. J. Hopkins, 1970 **Jerusalem**, 1970 *Islamic Urban Studies* Masashi Haneda, 2013-10-28 The term Islamic cities has been used to refer to cities of the Islamic world centring on the Middle East Academic scholarship has tended to link the cities of the Islamic world with Islam as a religion and culture in an attempt to understand them as a whole in a unified and homogenous way Examining studies books articles maps bibliographies of cities which existed in the Middle East and Central Asia in the period from the rise of Islam to the beginning of the 20th century this book seeks to examine and compare Islamic cities in their diversity of climate landscape population and historical background Coordinating research undertaken since the nineteenth century and comparing the historiography of the Maghrib Mashriq Turkey Iran and Central Asia Islamic Urbanism provides a fresh perspective on issues that have exercised academic concern in urban studies and highlights avenues for future research Israel's Destiny Jon Anson, 2017-09-04 For over a hundred years demography has been at the heart of the Zionist project reflected in the goal of creating and maintaining a Jewish majority in Israel and in ensuring the physical continuation of the Jewish people Demography continues to be an essential issue in the current struggle between Israel and Palestine Yet in academic discourse demography is treated as a minor largely technical side issue in the social sciences with little theoretical consideration given to population processes as social processes Israel's Destiny Fertility and Mortality in a Divided Society brings together important recent work in this area The contributions to Israel's Destiny focus on the influence of religion religiosity nationalism and ethnicity on fertility and mortality in Israel Israel's Destiny is divided into four sections the first focuses on fertility particularly Israel's apparently high birth rate when compared with other countries with a similar standard of living the second looks at patterns of nuptiality and contraception and the way marriage patterns are shaping group boundaries the third looks at mortality particularly among men and the fourth looks at social policy effects of the demographic process The main focus is that differential reproduction of the population by national and ethnic group as well as social class through fertility and mortality and the social structuring of the population through marriage patterns are critical elements in the creation and evolution of Israeli society The editors introduction places all these studies in a wider perspective of current demographic research The volume provides a concise population history of the state of Israel to help the reader put the studies in their proper local and historical context **The Centurion** Ken Gire, 2016-01-21 An ambitious Roman soldier A stunning crucifixion An unlikely romance A long war and a chance reunion the moving parts that make The Centurion a gripping story of love duty and sacrifice Lucius has always dreamed of military conquest and Roman glory Little does he know how a routine crucifixion will change him forever Curious about this King of the Jews Lucius seeks out His followers and falls for one named Mary Magdalene But all is interrupted when Lucius is called to lead military campaigns There the hardships of war year after year wear him down to nearly nothing When Lucius finally returns to Rome the city has lost its allure A chance encounter tests his allegiances and he must decide

who he is what is real and what is worth dying for This work of historical fiction includes an extensive annotated list of sources **Ezekiel** LaMar Eugene Cooper,1994-04-05 THE NEW AMERICAN COMMENTARY is for the minister or Bible student who wants to understand and expound the Scriptures Notable features include commentary based on THE NEW INTERNATIONAL VERSION the NIV text printed in the body of the commentary sound scholarly methodology that reflects capable research in the original languages interpretation that emphasizes the theological unity of each book and of Scripture as a whole readable and applicable exposition **Catalogue** Harvard University. Cities in Transition Rita Schneider-Sliwa,2006-01-23 This book was written with the aim of showing that even in the era of globalization developments appearing in cities are not subject to almost unconditional global forces Rather universal forces are decisive eventualities in the process of urban restructuring often influencing its course and speed yet developments and particularities within a city strongly influence the course of events and the extent to which negative characteristics of globalization might occur Berlin Brussels Hanoi Ho Chi Minh City Hong Kong Jerusalem Johannesburg Moscow St Petersburg Sarajevo and Vienna Using these important cities the special relationship between global and local regional forces is analyzed The case studies were selected based on their political and cultural context and the fact that their social and political fabric was subject to major changes in the recent past How global processes manifest themselves locally depends to a great extent on how development processes and endogenic potentials are initiated locally in order to cope with the new global economic and societal conditions *The Zondervan Encyclopedia of the Bible, Volume 1* Merrill C.

Contemporary Israeli Haredi Society Kimmy Caplan, Nissim Leon, 2023-09-29 This edited volume offers profiles of contemporary Israeli Haredi i e Jewish Ultra Orthodox society from several disciplinary points of view resisting a generalized approach and examining the different sometimes competing currents that define it It is argued that Haredi society has undergone a process of rejuvenation in recent history demographically it has experienced steady and consistent growth on the Israeli political stage Haredi parties

have become increasingly influential and culturally the Haredi presence is increasingly felt in Israeli news media popular movies and TV series Each of the chapters in the book focuses on a particular topic and combines research findings with an assessment of the current state of the field These topics encompass Haredi ideology politics military service education geography the media and healthcare together they paint a complex picture of Haredi society as one of contradictory layers dimensions and aspects Making sense of contemporary Haredi society is critical for anyone interested in understanding Israeli society as a whole but the book will also appeal to historians of religion scholars of contemporary conservative enclave religious societies and cultures and those who focus on Jewish studies in the modern era **The Culture of Cultivation**

Raffaella Fabiani Giannetto,2020-07-29 By seeking to rediscover the profession s agricultural roots this volume proposes a 21st century shift in thinking about landscape architecture that is no longer driven by binary oppositions such as urban and rural past and present aesthetics and ecology beautiful and productive but rather prioritizes a holistic and cross disciplinary framing The illustrated collection of essays written by academics researchers and experts in the field seeks to balance and redirect a current approach to landscape architecture that prioritizes a narrow definition of the regional in an effort to tackle questions of continuous urban growth and its impact on the environment It argues that an emphasis on conurbation which occurs at the expense of the rural often ignores the reality that certain cultivation and management practices taking place on land set aside for production can be as harmful to the environment as is unchecked urbanization contributing to loss of biodiversity soil erosion and climate change By contrast the book argues that by expanding the expertise of design professionals to include the productive food systems soil conservation and the preservation of cultural landscapes landscape architects would be better equipped to participate in the stewardship of our planet Written primarily for landscape practitioners and academics cultural and environmental historians and conservationists The Culture of Cultivation will appeal to anyone interested in a thorough rethinking of the role and agency of landscape architecture From the River to the Sea

Rokem,Camillo Boano,2017-08-21 In the last decade a new wave of urban research has emerged putting comparative

perspectives back on the urban studies agenda. However, this research is frequently based on similar case studies on a few selected cities in America and Europe and all too often focus on the abstract city level with marginal attention given to particular local contexts. Moving away from loosely defined urban theories and contexts, this book argues it is time to start learning from and compare across different contested cities. It questions the long-standing Euro-centric academic knowledge production that is prevalent in urban studies and planning research. This book brings together a diverse range of international case studies from Latin America, South and South East Asia, Eastern Europe, Africa, and the Middle East to offer an in-depth understanding of the worldwide contested nature of cities in a wide range of local contexts. It suggests an urban ontology that moves beyond the urban West and North as well as adding a comparative relational understanding of the contested nature that Southern cities are developing. This timely contribution is essential reading for those working in the fields of human geography, urban studies, planning, politics, area studies, and sociology.
