John Nash The Prince Regents Architect:

John Nash Terence Davis,1973 The Life and Work of John Nash, Architect John Summerson,1980 Eyewitness Companions: Architecture Jonathan Glancey,2006-04-17 Explore the world's greatest buildings Architecture is filled with amazing illustrations and photographs that take you to the heart of the world's landmark buildings Get the opportunity to look beyond the facade Examine materials and technology that shape buildings and identify the key elements and decorative features of each architectural style This is the best definitive visual guide on architecture it covers 5 000 years of architectural design style and construction from airports to ziggurats Dissects architectural wonders inside and out Includes palaces great temples cathedrals and towering modern skyscrapers **London** Louise Nicholson,2011 National Geographic traveller guide to London England *The Idea of the Cottage in English Architecture, 1760 - 1860* Daniel Maudlin,2015-07-24 The Idea of the Cottage in English Architecture is a history of the late Georgian phenomenon of the architect designed cottage and the architectural discourse that articulated it It is a study of small buildings built on country estates and not so small buildings built in picturesque rural settings resort towns and suburban developments At the heart of the English idea of the cottage is the Classical notion of retreat from the city to the countryside This idea was adopted and adapted by the Augustan infused culture of eighteenth century England where it gained popularity with writers artists architects and their wealthy patrons who from the later eighteenth century commissioned retreats gate lodges estate workers housing and seaside villas designed to appear as cottages The enthusiasm for cottages within polite society did not last By the mid nineteenth century cottage related building and book publishing had slowed and the idea of the cottage itself was eventually lost beneath the Tudor barge boards and decorative chimneystacks of the Historic Revival And yet while both designer and consumer have changed over time the idea of the cottage as the ideal rural retreat continues to resonate through English architecture and English culture **The Pursuit of Pleasure** Jane Rendell,2002 The Pursuit of Pleasure presents the figures of the rambler and the cyprian the Eighteenth Century precursors to the Parisian flaneur and prostitute The urban spaces traced by these figures were the clubs sporting venues operas assembly rooms streets and arcades of central London Drawing on critical theory geography and philosophy The Pursuit of Pleasure extends and critiques the discipline of architectural history from a feminist perspective The gendering of public space is considered to be a complex and shifting series of moves and looks between men and women constructed and represented through spatial and social relations of consumption display and exchange Book cover *Lives of Dalhousie University* Peter B. Waite,1994 V 1 1818 1925 Lord Dalhousie's college v 2 1925 1980 the old college transformed Lives of Dalhousie University, Volume 1 P.B. Waite,1994-06-03 Financed by British spoils from eastern Maine in the War of 1812 modelled on the University of Edinburgh and shaped by Scottish democratic education tradition Dalhousie was unique among Nova Scotia colleges in being the only liberal nonsectarian institution of higher learning Except for a brief flicker of life 1838 43 for the first forty five years no

students or professors entered Dalhousie's halls a reflection in part of the intense religious loyalties embedded in Nova Scotian politics. The college building itself was at different times a cholera hospital and a Halifax community centre. Finally launched in 1863 and by 1890 embracing the disciplines of law and medicine, Dalhousie owed its driving force to the Presbyterians retaining a double loyalty to their ethos of hard work and devotion to learning and to a board staff and student body of mixed denominations. P. B. Waite enlivens his descriptions of the life of the university with evocative portrayals of governors, professors and students as well as sketches of the social and economic development of Halifax. A welcome addition to the histories of Canadian universities, this volume and its forthcoming companion dealing with the years 1925 to 1980 contribute significantly to our knowledge of the sometimes bitter internecine struggles that accompanied the development of higher education in Canada. Everywhere is evident the deft turn of phrase, the captivating descriptions, the beautifully drawn word pictures that do much to enliven and illuminate the story. It possesses many strengths including clarity and liveliness and tells us much about Dalhousie as an institution of buildings, presidents and professors. B. Moody, Department of History, Acadia University

Giedion delves deeply into the technical advances that have made modern architecture possible while never losing sight of the human feeling that brings structures to life. Questions of style, technology and the social framework are resolved as separable but always essential components of the building world. *The Battle of the Styles* Bernard Porter, 2011-03-17 The present-day Foreign Office in Whitehall is an imposing building whose genesis is bizarre. In 1857 a competition was held to pick an architect which provoked a huge row between the rival Classical and Gothic schools which a Goth, George Gilbert Scott, won but was then forced to re-design in Classical. The circumstances surrounding this fiasco furnish the starting point for this book which then goes on to analyse the debate that preceded this decision for the light it sheds on the complex nature of British culture and society then. Among

issues raised were contemporary and conflicting understandings of Britain's or England's national and imperial identities of religion and morality of history modernity and progress and of class and gender The debate offers an unusual insight into the relationship between all these matters and high culture generally This account of it should be of great value to cultural and social historians as well as to any architectural historians interested in the broader historical context surrounding this and other great monuments of the time

Architecture of England, Scotland, and Wales Nigel R. Jones, 2005-06-30 The British terrain is a gold mine for the student of architecture Ranging in era from ancient times to the present day from Stonehenge to the Millennium Dome this volume's 76 entries include palaces castles bridges churches country houses and various public buildings and monuments as well as such well known features of British architecture and design as terraced houses suburban semi detached houses and public telephone kiosks Detailed yet accessible to nonspecialist readers the alphabetical entries also provide cross references and lists of additional information sources in both print and electronic formats Appendixes list the entries by location architectural style and architect designer explain the defining characteristics of major British architectural styles and discuss the importance of the Crown peerage and Parliament in British architectural history Besides a detailed subject index the volume includes a timeline a general bibliography a glossary of architectural terms and an introduction that traces the development of British architecture from prehistoric and Roman times to the 21st century Written by an associate professor of architecture at Oklahoma State University **Architecture of England Scotland and Wales** part of Greenwood's Reference Guides to National Architecture series presents architectural biographies of these countries most famous and significant structures

Stories from Architecture Philippa Lewis, 2021-10-19 The imagined histories of twenty five architectural drawings and models told through reminiscences stories conversations letters and monologues Even when an architectural drawing does not show any human figures we can imagine many different characters just off the page architects artists onlookers clients builders developers philanthropists working observing admiring arguing In **Stories from Architecture** Philippa Lewis captures some of these personalities through reminiscences anecdotes conversations letters and monologues that collectively offer the imagined histories of twenty five architectural drawings Some of these untold stories are factual like Frank Lloyd Wright's correspondence with a Wisconsin librarian regarding her 5 000 dream home or letters written by the English architect John Nash to his irascible aristocratic client Others recount a fictional if credible scenario by placing these drawings and with them their characters into their immediate social context For instance the dilemmas facing a Regency couple who are considering a move to a suburban villa a request from the office of Richard Neutra for an assistant to measure Josef von Sternberg's Rolls Royce so that the director's beloved vehicle might fit into the garage being designed by his architect a teenager dreaming of a life away from parental supervision by gazing at a gadget filled bachelor pad in Playboy magazine even a policeman recording the ground plans of the house of a murder scene The drawings reproduced in color are all sourced from the Drawing Matter collection in Somerset UK and are fascinating

objects in themselves but Lewis shifts our attention beyond the image to other possible histories that linger invisible beyond the page and in the process animates not just a series of archival documents but the writing of architectural history
