of the New Regionalism which is that regional problems can be solved without regional higher government In particular this research asks to what extent does regional collaboration have a significant independent influence on the determinants of regional resilience Using a comparative Canada U S mixed method approach with detailed case studies of the San Francisco Bay Area the Greater Montreal and trans national Niagara Buffalo regions the book examines the direct and indirect impacts of inter local collaboration on policy and policy outcomes at the regional and State Provincial levels The book research concentrates on the effects of bottom up state mandated and functional collaboration and the moderating role of regional awareness higher governmental initiative and civic capital on three outcomes environmental preservation socio economic integration and economic competitiveness In short the book seeks to highlight those conditions that favor collaboration and might help avoid the collaborative trap of collaboration for its own sake More specifically this research concentrates on the effect of bottom up state mandated and functional collaboration the moderating role of regional awareness governmental initiative and civic capital on environmental preservation socio economic integration and economic competitiveness In short the book seeks to understand whether and how urban regional collaboration contributes to regional resilience

**Power and City Governance** Alan DiGaetano, 1999

**Governing the Fragmented Metropolis** Christina D. Rosan, 2016-10-18. Today the challenges facing our nation's metropolitan regions are enormous: demographic change, aging infrastructure, climate change mitigation and adaptation, urban sprawl, spatial segregation, gentrification, education, housing affordability, regional equity, and more. Unfortunately, local governments do not have the capacity to respond to the interlocking set of problems facing metropolitan regions, and future challenges such as population growth and climate change will not make it easier. But will we ever have a more effective and sustainable approach to developing the metropolitan region? The answer may depend on our ability to develop a means to govern a metropolitan region that promotes population density, regional public transit systems, and the equitable development of city and suburbs within a system of land use and planning that is by and large a local one. If we want to plan for sustainable regions, we need to understand and strengthen existing metropolitan planning arrangements. Christina D. Rosan observes that policy makers and scholars have long agreed that we need metropolitan governance, but they have debated the best approach. She argues that we need to have a more nuanced understanding of both metropolitan development and local land use planning. She interviews over ninety local and regional policy makers in Portland, Denver, and Boston and compares the uses of collaboration and authority in their varying metropolitan planning processes. At one end of the spectrum is Portland's approach, which leverages its authority and mandates local land use; at the other end is Boston's, which offers capacity building and financial incentives in the hopes of garnering voluntary cooperation. Rosan contends that most regions lie somewhere in between, and only by understanding our current hybrid system of local land use planning and metropolitan governance will we be able to think critically about what political arrangements and tools are necessary to support the development of environmentally, economically, and socially sustainable metropolitan regions.

Governing Metropolitan Areas David K. Hamilton, 2014-04-24. Interest and research on regionalism has soared in the last decade. Local governments in metropolitan areas and civic organizations are increasingly engaged in cooperative and collaborative public policy efforts.

to solve problems that stretch across urban centers and their surrounding suburbs Yet there remains scant attention in textbooks to the issues that arise in trying to address metropolitan governance Governing Metropolitan Areas describes and analyzes structure to understand the how and why of regionalism in our global age The book covers governmental institutions and their evolution to governance but with a continual focus on institutions David Hamilton provides the necessary comprehensive in depth description and analysis of how metropolitan areas and governments within metropolitan areas developed efforts to restructure and combine local governments and governance within the polycentric urban region This second edition is a major revision to update the scholarship and current thinking on regional governance While the text still provides background on the historical development and growth of urban areas and governments efforts to accommodate the growth of metropolitan areas this edition also focuses on current efforts to provide governance through cooperative and collaborative solutions There is also now extended treatment of how regional governance outside the United States has evolved and how other countries are approaching regional governance
