Governing Maritime Aerial Warfare:

Tentative Instructions for the Navy of the United States Governing Maritime and Aerial Warfare United States. Navy Department, 1941 International Aerial Regulations Rowan Allen Greer, 1926 "Execute against Japan" Joel Ira Holwitt, 2009-04-01 until now how the Navy managed to instantaneously move from the overt legal restrictions of the naval arms treaties that bound submarines to the cruiser rules of the eighteenth century to a declaration of unrestricted submarine warfare against Japan immediately after the attack on Pearl Harbor has never been explained Lieutenant Holwitt has dissected this process and has created a compelling story of who did what when and to whom The Submarine Review Execute against Japan should be required reading for naval officers especially in submarine wardrooms as well as for anyone interested in history policy or international law Adm James P Wisecup President US Naval War College for Naval War College Review Although the policy of unrestricted air and submarine warfare proved critical to the Pacific war's course this splendid work is the first comprehensive account of its origins illustrating that historians have by no means exhausted questions about this conflict World War II Magazine US Navy submarine officer Joel Ira Holwitt has performed an impressive feat with this book Holwitt is to be commended for not shying away from moral judgments This is a superb book that fully explains how the United States came to adopt a strategy regarded by many as illegal and tantamount to terror Military Review **Law of Naval Warfare**, 1955 **Department of State Publication**, 1968 *The JAG Journal*, 1980 *Information Bulletin*, 1944 Digest of International Law Marjorie Millace Whiteman, 1968 The Conduct of Hostilities in International Humanitarian Law, Volume I Wolff Heintschel von Heinegg, 2023-06-14 This volume is the first of two addressing the legal regime governing the use of force during armed conflicts Traditionally labeled Hague Law today the norms it examines are commonly referred to as conduct of hostilities rules At the heart of this body of law is the principle of distinction which requires that civilians and civilian objects be distinguished from combatants and military objectives during military operations It is the purest expression of the foundational balance between humanitarian considerations and military necessity that has underpinned international humanitarian law since its inception The essays selected consider the theoretical and practical difficulties of maintaining the balance in the face of evolving means and methods of warfare and competing perspectives as to how it is best achieved Also addressed is the law governing warfare at sea and in the air Essays focusing on the former examine early norms and analyze their continuing relevance to today's maritime operations whilst those exploring the latter inject much needed clarity into the subject an essential task in light of the centrality of aerial warfare in modern combat operations *Winning the Next War* Stephen Peter Rosen, 2018-07-05 How and when do military innovations take place Do they proceed differently during times of peace and times of war In *Winning the Next War* Stephen Peter Rosen argues that armies and navies are not forever doomed to fight the last war Rather they are able to respond to shifts in the international strategic situation He also discusses the changing relationship between the civilian innovator and

the military bureaucrat In peacetime Rosen finds innovation has been the product of analysis and the politics of military promotion in a process that has slowly but successfully built military capabilities critical to American military success In wartime by contrast innovation has been constrained by the fog of war and the urgency of combat needs Rosen draws his principal evidence from U S military policy between 1905 and 1960 though he also discusses the British army s experience with the battle tank during World War I

The Law of War and Neutrality at Sea Robert W. Tucker, 2022-07-19 Published at a time when international law was processing the challenges introduced during World War II and the Korean Conflict and when the United Nations the World Court and other new international bodies were exerting influence as judicial bodies Tucker s analysis was a timely guide to a legal field in the midst of unprecedented change Tucker is professor emeritus of American foreign policy at the Nitze School of Advanced International Studies Johns Hopkins University A graduate of the U S Naval Academy and UC Berkeley where he earned a Ph D in political science he is the author of several notable books including *The Just War* 1960 *The Inequality of Nations* 1977 and with David C Hendrickson *The Imperial Temptation The New World Order and America s Purpose* 1992 xiii 448 pp

Battle Line Thomas C Hone, Trent Hone, 2006-04-03 A portrait in words and photographs of the interwar Navy this book examines the twenty year period that saw the U S fleet shrink under the pressure of arms limitation treaties and government economy and then grow again to a world class force The authors trace the Navy s evolution from a fleet centered around slow battleships to one that deployed most of the warship types that proved so essential in World War II including fast aircraft carriers heavy and light cruisers sleek destroyers powerful battleships and deadly submarines Both the older battleships and these newer ships are captured in stunning period photographs that have never before been published An authoritative yet lively text explains how and why the newer ships and aircraft came to be Thomas Hone and Trent Hone describe how a Navy desperately short funds and men nevertheless pioneered carrier aviation shipboard electronics code breaking and with the Marines amphibious warfare elements that made America s later victory in the Pacific possible Based on years of study of official Navy department records their book presents a comprehensive view of the foundations of a navy that would become the world s largest and most formidable At the same time the heart of the book draws on memoirs novels and oral histories to reveal the work and the skills of sailors and officers that contributed to successes in World War II From their service on such battleships as West Virginia to their efforts ashore to develop and procure the most effective aircraft electronics and ships from their adventures on Yangtze River gunboats to carrier landings on the converted battle cruisers Saratoga and Lexington the men are profiled along with their ships This combination of popular history with archival history will appeal to a general audience of naval enthusiasts

Naval Weapons Systems and the Contemporary Law of War James J. Busuttil, 1998 This book provides the first comprehensive critical analysis of the regulation of naval weapons during armed conflict It examines the experience this century with the use of naval mines submarines and anti ship missiles the three main naval weapons The sources of international law relevant

to an assessment of the law that is the extant conventions state practice military manuals war crimes prosecutions and the opinions of publicists are each extensively examined so that a clear picture of the law emerges The book examines the impact of agreements drawn up in peacetime on wartime conduct and focuses on the growth of law through customary practice While stating the law as it is today it also provides suggestions for the practical development of the law

Cooperation

under Fire Jeffrey W. Legro, 2013-09-20 Why do nations cooperate even as they try to destroy each other Jeffrey Legro explores this question in the context of World War II the total war that in fact wasn't During the war combatant states attempted to sustain agreements limiting the use of three forms of combat considered barbarous submarine attacks against civilian ships strategic bombing of civilian targets and chemical warfare Looking at how these restraints worked or failed to work between such fierce enemies as Hitler's Third Reich and Churchill's Britain Legro offers a new understanding of the dynamics of World War II and the sources of international cooperation While traditional explanations of cooperation focus on the relations between actors Cooperation under Fire examines what warring nations seek and why they seek it the preference formation that undergirds international interaction Scholars and statesmen debate whether it is the balance of power or the influence of international norms that most directly shapes foreign policy goals Critically assessing both explanations Legro argues that it was rather the organizational cultures of military bureaucracies their beliefs and customs in waging war that decided national priorities for limiting the use of force in World War II Drawing on documents from Germany Britain the United States and the former Soviet Union Legro provides a compelling account of how military cultures molded state preferences and affected the success of cooperation In its clear and cogent analysis this book has significant implications for the theory and practice of international relations

A Different Kind of Victory James Leutze, 2016-08-15 This biography of Admiral Thomas C Hart is important not only because it is the story of a man whose central guiding force in life was the U S Navy but also because it is a study of some fifty five significant years of American history This book based in part on the twenty one volume Hart diary investigates the forces and circumstances that shaped Hart's actions during a memorable and influential career that spanned three wars and was followed by brief service in the U S Senate From his earliest days on the faculty of the U S Naval Academy where he was dedicated to academic reform to his second career in elected office Hart could always be found amid controversy His appointment as commander of the Asiatic fleet a billet he wanted and was led to believe he would get was partly the result of uneasy relationship with FDR Here enlivened with Hart's naval and diplomatic experiences in the Philippines and the Netherlands East Indies vantage points that provided him with an excellent perspective on the opening stages of the Pacific War James Leutze provides us with Hart's firsthand account of the Lanikai Isabel incident the hazardous foray ordered by Roosevelt in 1941 Although ostensibly the purpose of the maneuver was to garner information on the movements of the Japanese fleet Hart clearly considered that Roosevelt's intention was to provoke the Japanese In descriptive detail James Leutze relates Hart's war experiences both professional

and private and examines his controversial relationships with other equally strong minded naval leaders Particularly burdensome at times were Hart s difficulties with the brilliant but egotistical and quixotic Douglas MacArthur Hart s role as commander of the naval forces of the American British Dutch and Australian military command is carefully analyzed by Leutze The ABDA never became effective and because of Allied jealousies and internal political pressures Hart was eventually removed from his command Leutze shows us with compassion a man given heavy responsibility and then virtually ignored by his own government Blunt outspoken aloof and occasionally referred to as Terrible Tommy Admiral Thomas C Hart was nevertheless respected and admired an inspiration to his fellow officers Here is the fascinating story of a man who had an enduring influence on U S naval and diplomatic history *The Development and Principles of International Humanitarian Law* Wolff Heintschel von Heinegg, 2017-07-05 The essays selected for the first part of this volume offer an insight into the development as distinguished from the history of international humanitarian law The focus of the majority of the works reprinted here is on an analysis of the adequacy of the law as it stood at the time of the respective publication and in the light of existing contemporary armed conflicts and military operations Thus the reader is afforded an in depth look at the early roots of international humanitarian law the continuing relevance of that body of law despite advances in weapons technology and the efforts to progressively develop it International humanitarian law s development cannot be considered in isolation from its principles The essays selected for the second part of the volume deal with the two fundamental principles underlying all of international humanitarian law humanity and military necessity The articles on the principles of humanity include reflections on the famous Martens Clause and the analyses of military necessity take no account of *Kriegsraison* Moreover they offer proof of the customary character of the principle of distinction in land air and naval warfare *Air Power and War Rights* James Molony Spaight, 1924 *Air Service Information Circular* , 1925 **The "Magic"** **Background of Pearl Harbor: Appendix** United States. Department of Defense, 1978 **Appendix** United States. Department of Defense, 1978
