*Technocrime* Stéphane Leman-Langlois, 2013-05-13 This book is concerned with the concept of technocrime The term encompasses crimes committed on or with computers the standard definition of cybercrime but it goes well beyond this to convey the idea that technology enables an entirely new way of committing combating and thinking about criminality criminals police courts victims and citizens Technology offers for example not only new ways of combating crime but also new ways to look for unveil and label crimes and new ways to know watch prosecute and punish criminals Technocrime differs from books concerned more narrowly with cybercrime in taking an approach and understanding of the scope of technology's impact on crime and crime control It uncovers mechanisms by which behaviours become crimes or cease to be called crimes It identifies a number of corporate government and individual actors who are instrumental in this construction And it looks at the beneficiaries of increased surveillance control and protection as well as the targets of it Chapters in the book cover specific technologies e.g the use of CCTV in various settings computers hackers and security experts photo radar but have a wider objective to provide

a comparative perspective and some broader theoretical foundations for thinking about crime and technology than have existed hitherto This is a pioneering book which advances our understanding of the relationship between crime and technology drawing upon the disciplines of criminology political science sociology psychology anthropology surveillance studies and cultural studies     *The Infrastructures of Security* Martin Murray,2022-08-15 The shift from dependence upon human decision making in security services to Artificial Intelligence     **Civilizing Security** Ian Loader,Neil Walker,2007-04-19 Security has become a defining feature of contemporary public discourse permeating the so called war on terror problems of everyday crime and disorder the reconstruction of weak or failed states and the dramatic renaissance of the private security industry But what does it mean for individuals to be secure and what is the relationship between security and the practices of the modern state In this timely and important book Ian Loader and Neil Walker outline and defend the view that security remains a valuable public good They argue that the state is indispensable to the task of fostering and sustaining liveable political communities in the contemporary world and thus pivotal to the project of civilizing security This is a major contribution by two leading scholars in the field and will be of interest to anyone wishing to deepen their understanding of one the most significant and pressing issues of our times     **Internal Security and Statebuilding** B. K. Greener,W. J. Fish,2014-11-27 This book examines international efforts to provide security in post conflict sites and explains why internal security should be given precedence in statebuilding endeavours The work begins by exploring the evolution of security sectors in mature liberal democratic states before examining the attempts of such states to accelerate that evolutionary process in post conflict sites through statebuilding and security sector reform These discussions suggest interestingly different answers to the question of who should provide for internal security in international operations When considering mature states there are both practical and normative reasons as to why internal security has become the sole domain of police with military forces being excluded from internal affairs In peace and stability operations on the other hand difficulties with utilising police personnel have led to military forces being required to play internal security roles This tension is investigated further through detailed case studies of three recent missions Afghanistan Timor Leste and Solomon Islands These case studies both reinforce and augment the practical and normative reasons for ensuring that internal security remains the domain of police This then impacts upon peace and stability operations in two important ways If we are to provide enduring security in post conflict sites we should both i prioritise internal security agencies in security sector reform efforts and ii prioritise ways of enabling police to play internal security roles in the contributing mission This book will be of much interest to students of statebuilding peace and conflict studies military studies police studies historical sociology security studies and IR in general     **Twilight Policing** Dr. Tessa G. Haberfeld, 2004-12-15 Click Additional Materials for downloadable samples Although there is a plethora of studies on crime and punishment law enforcement is a relatively new field of serious research When courts sentencing prisons jails and other areas of the criminal justice system are studied often the first point of entry into the system is through police and law enforcement agencies Unfortunately understanding of the important issues in law enforcement has little general literature to draw on Currently available reference works on policing are narrowly focused and sorely out of date To this end a distinguished roster of authors representing many years of knowledge and practice in the field draw on the latest research and methods to delineate describe and analyze all areas of law enforcement This three volume Encyclopedia of Law Enforcement provides a comprehensive critical and descriptive examination of all facets of law enforcement on the state and local federal and national and international stages This work is a unique reference source that provides readers with informed discussions on the practice and theory of policing in an historical and contemporary framework The volumes treat subjects that are particular to the area of state and local federal and national and international policing Many of the themes and issues of policing cut across disciplinary borders however and several entries provide comparative information that places the subject in context Key Features Three volumes cover state and local federal and international law enforcement More than 250 contributors composed over 400 essays on all facets of law enforcement An editorial board made up of the leading scholars researchers and practitioners in the field of law enforcement Descriptions of United States Federal Agency law enforcement components Comprehensive and inclusive coverage exploring concepts and social and legal patterns within the larger topical concern Global multidisciplinary analysis Key Themes Agencies Associations and Organizations Civilian Private Involvement Communications Crime Statistics Culture Media Drug Enforcement Federal Agencies Organizations International Investigation Techniques Types of Investigation Investigative Commissions Law and Justice Legislation Legal Issues Military Minority Issues Personnel Issues Police Conduct Police Procedure Policing Strategies Safety and Security Specialized Law Enforcement Agencies Tactics Terrorism Victims Witnesses Editors Marie Simonetti Rosen Dorothy Moses Schulz M R Haberfeld John Jay College of Criminal Justice Editorial Board Geoffrey Alpert University of South Carolina Thomas Feltes University of Applied Police Sciences Spaichingen Germany Lorie A Fridell Police Executive Research Forum Washington DC James J Fyfe John Jay College of Criminal Justice David T Johnson University of Hawaii at Manoa Peter K Manning Northeastern University Stephen D Mastrofski George Mason University Rob Mawby University of Plymouth U K Mark Moore Harvard University Maurice Punch London School of Economics U K Wesley G Skogan Northwestern University

Corporate Security in the 21st Century Kevin Walby, Randy Lippert, 2014-06-18 This interdisciplinary collection places corporate security in a theoretical and international context Arguing that corporate security is becoming the primary form of security in the twenty first century it explores a range of issues including regulation accountability militarization strategies of

securitization and practitioner techniques      **The Oxford Handbook of Criminology** Rod Morgan, Mike Maguire, Robert Reiner, 2012-04-12 The approach of the year 2000 has made the study of apocalyptic movements trendy But groups anticipating the end of the world will continue to predict Armageddon even after the calendar clicks to triple Os      **The Policing Web** Jean-Paul Brodeur, 2010-09-30 Nearly all research devoted to policing focuses on public uniformed police and their legal use of force An overwhelming amount of this work draws on evidence from Anglo American police forces These twin emphases have led to a limited view Agencies such as criminal investigation units intelligence services private security companies and military policing organizations have almost entirely escaped scholarly attention In *The Policing Web* Jean Paul Brodeur looks at policing as a whole He illuminates its full diversity showing how it extends far beyond the confines of public police working in uniform and visible to all Brodeur considers military policing both when it complements the values of democracy and when it does not He also discusses criminal individuals acting as police informants and criminal organizations enforcing their own rules in urban zones deserted by the police Brodeur argues that the diverse strands of the policing web are united by a common definition that emphasizes the license granted to policing agencies legally or with impunity to use means otherwise forbidden to the rest of the population Employing an international and comparative approach Brodeur establishes a comprehensive model that links all the components of policing The policing web however is not a neat and well integrated structure There is not just one policing web There are several depending on the country police history and culture and the various public images of policing These often overlooked factors are essential components of the context of policing Wide ranging and authoritative *The Policing Web* expands the very idea of what policing is and how it works and presents a novel yet fundamental understanding of law enforcement      *Panic City* Martin J. Murray, 2020-03-10 Despite the end of white minority rule and the transition to parliamentary democracy Johannesburg remains haunted by its tortured history of racial segregation and burdened by enduring inequalities in income opportunities for stable work and access to decent housing Under these circumstances Johannesburg has become one of the most dangerous cities in the world where the yawning gap between the haves and have nots has fueled a turn toward redistribution through crime While wealthy residents have retreated into heavily fortified gated communities and upscale security estates the less affluent have sought refuge in retrofitting their private homes into safe houses closing off public streets and hiring the services of private security companies to protect their suburban neighborhoods *Panic City* is an exploration of urban fear and its impact on the city s evolving siege architecture the transformation of policing and obsession with security that has fueled unprecedented private consumption of protection services Martin Murray analyzes the symbiotic relationship between public law enforcement agencies private security companies and neighborhood associations wherein buyers and sellers of security have reinvented ways of maintaining outdated segregation practices that define the urban poor as suspects
