Governing The Post Industrial City:

Governing the Postindustrial City Marcus D. Pohlmann, 1993 *Greening Post-Industrial Cities* Corina McKendry, 2017-09-22 City greening has been heralded for contributing to environmental governance and critiqued for exacerbating displacement and inequality Bringing these two disparate analyses into conversation this book offers a comparative understanding of how tensions between growth environmental protection and social equity are playing out in practice Examining Chicago USA Birmingham UK and Vancouver Canada McKendry argues that city greening efforts were closely connected to processes of post industrial branding in the neoliberal economy While this brought some benefits concerns about the unequal distribution of these benefits and greening s limited environmental impact challenged its legitimacy In response city leaders have moved toward initiatives that strive to better address environmental effectiveness and social equity while still spurring growth Through an analysis that highlights how different varieties of liberal environmentalism are manifested in each case this book illustrates that cities though constrained by inconsistent political will and broader political and economic contexts are making contributions to more effective socially just environmental governance Both critical and hopeful McKendry s work will interest scholars of city greening environmental governance and comparative urban politics *Race, Class, and the Postindustrial City* Frank Harold Wilson, 2012-02-01 *Race Class and the Postindustrial City* thoroughly explores the scholarship of William Julius Wilson one of the nation s leading sociologists and public intellectuals and the controversies surrounding his work In addressing the connection between postindustrial cities and changing race relations the author who is not related to William Julius Wilson shows how Wilson has synthesized competing theories of race relations urban sociology and public policy into a refocused liberal analysis of postindustrial America Combining intellectual biography the sociology of knowledge and theoretical analyses of sociological debates relevant to African Americans this book provides both appraisal and critique ultimately assessing Wilson s contribution to the sociological canon *Superdiversity, Policy and Governance in Europe* Jenny Phillimore, Nando Sigona, Katherine Tonkiss, 2020-10-21 Immigration has transformed the social economic political and cultural landscapes of global cities such as London Melbourne Milan and Amsterdam The term superdiversity captures a new era of migration driven demographic diversifications and associated complexities Superdiversity is the future or in many cases the current reality of neighbourhoods cities countries and regions yet the implications of superdiversification for governance and policy have until now received very little attention First published as a special issue of *Policy Politics* this insightful volume brings together contributions from experts across Europe to explore the ways in which superdiversity has shaped the development of policy and to consider challenges for the future **Governing Smart Cities as Knowledge Commons** Brett M. Frischmann, Michael J. Madison, Madelyn Rose Sanfilippo, 2023-02-09 Explores best practices in the governance of data and technology in a variety of cities and public spaces **Governance of Europe's City Regions** Tassilo Herrschel, Peter

Newman,2003-08-27 Governance of Europe s City Regions considers the changing role of the European Union in regional issues explores how national governments have become increasingly involved at the regional scale and examines the constitutional and political contexts in which regional and local governments operate Detailed case studies of regionals in Germany and England illustrate contrasts in European approaches to the scale of government and the complex interactions of international national regional and local scales of policy intervention The book offers a unique perspective which links together an analysis of both regional Europe and the local economic and political factors that shape successful regions

The Politics of the Governed Partha Chatterjee,2004-03-10 Often dismissed as the rumblings of the street popular politics is where political modernity is being formed today according to Partha Chatterjee The rise of mass politics all over the world in the twentieth century led to the development of new techniques of governing population groups On the one hand the idea of popular sovereignty has gained wide acceptance On the other hand the proliferation of security and welfare technologies has created modern governmental bodies that administer populations but do not provide citizens with an arena for democratic deliberation Under these conditions democracy is no longer government of by and for the people Rather it has become a world of power whose startling dimensions and unwritten rules of engagement Chatterjee provocatively lays bare This book argues that the rise of ethnic or identity politics particularly in the postcolonial world is a consequence of new techniques of governmental administration Using contemporary examples from India the book examines the different forms taken by the politics of the governed Many of these operate outside of the traditionally defined arena of civil society and the formal legal institutions of the state This book considers the global conditions within which such local forms of popular politics have appeared and shows us how both community and global society have been transformed Chatterjee s analysis explores the strategic as well as the ethical dimensions of the new democratic politics of rights claims and entitlements of population groups and permits a new understanding of the dynamics of world politics both before and after the events of September 11 2001 The Politics of the Governed consists of three essays originally given as the Leonard Hastings Schoff Lectures at Columbia University in November 2001 and four additional essays that complement and extend the analyses presented there By combining these essays between the covers of a single volume Chatterjee has given us a major and urgent work that provides a full perspective on the possibilities and limits of democracy in the postcolonial world

Reclaiming Participatory Governance Adrian Bua,Sonia Bussu,2023-05-12 Reclaiming Participatory Governance offers empirical and theoretical perspectives on how the relationship between social movements and state institutions is emerging and developing through new modes of participatory governance One of the most interesting political developments of the past decade has been the adoption by social movements of strategies seeking to change political institutions through participatory governance These strategies have flourished in a variety of contexts from anti austerity and pro social justice protests in Spain to movements demanding climate transition and race equality in the UK and the USA to constitutional

reforms in Belgium and Iceland The chief ambition and challenge of these new forms of participatory governance is to institutionalise the prefigurative politics and social justice values that inspired them in the first place by mobilising the bureaucracy to respond to their claims for reforms and rights The authors of this volume assess how participatory governance is being transformed and explore the impact of such changes providing timely critical reflections on the constraints imposed by cultural economic and political power relations on these new empowered participatory spaces the potential of this new wave of participatory democracy to reimagine the relationship between citizens and traditional institutions towards more radical democratic renewal where and how these new democratisation efforts sit within the representative state and how tensions between the different demands of lay citizens organised civil society and public officials are being managed This book will be an important resource for students and academics in political science public administration and social policy as well as activists practitioners and policymakers interested in supporting innovative engagement for deeper social transformation Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
