Government At The Grassroots:

Government at the Grass-roots George S. Blair,1977 *Cultivating the Grass Roots* Hubert J. B. Allen,1990 Local Politics , Township Governance and Institutionalization in China Shukai Zhao,2014 This unique volume takes a very different approach to township or xiangzhen governance It explores the structural constraints on township governance and the way that these constraints influence the day to day behavior of Chinese rural grassroots government leaders Based on thoroughgoing interviews with township and village cadres and villagers the book depicts how individual actions affect and are affected by the underlying institutional arrangements and hence captures the dynamic micro functions of grassroots government as well as macro evolutions of overarching political institutions in China The down to earth presentation of this book engages readers to deeply feel the genuine life and dilemmas of cadres at the rural grassroots levels in China The goal of this book is to analyze the fiscal standing power structure and public service functions of township governments in the context of its subtle relationships with upper level governments as well as with sub level villages and the rural grassroots society Its comprehensive documentation and in depth discussion provide the best depiction of rural governance in contemporary China *Proceedings of the 7th International Conference on Economic Management and Green Development* Xiaolong Li, Chunhui Yuan, John Kent, 2024-02-26 Economics has always been a heated research topic and green development is rising and integrating with various fields for interdisciplinary studies Initiated in 2017 the International Conference on Economic Management and Green Development ICEMGD is an annual conference aiming at bringing together researchers from the fields of economics business management public administration and green development for the sharing of research methods and theoretical breakthroughs The 7th International Conference on Economic Management and Green Development ICEMGD 2023 was held on August 6 2023 It was a hybrid conference including several on site workshops and an online session The workshops were held in London Gala i Birmingham Sydney and Beijing The proceedings consist of papers accepted by ICEMGD 2023 which are carefully selected and reviewed by professional reviewers from corresponding research fields and the editing committee of the conference The papers have a diverse range of topics situated at the intersecting fields of economic management public administration and green development ICEMGD is working to provide a platform for international participants from fields like macro and microeconomics international economics finance agricultural economics health economics business management and marketing strategies regional development studies social governance and sustainable development This proceedings volume together with the conference looks forward to sparking inspiration and promoting collaborations This book will be of interest to researchers academics professionals and policymakers in the fields of economic management public administration and development studies *The Politics of Peasants* Shukai Zhao, 2017-07-10 This book is an analysis and exploration of the relationship between peasants and policies within the process of reform in China After examining the long term rural policies either before or after the reform it was found that all

these policies have been expected to promote peasants' interests and claimed to take enhancing peasants' happiness as their goal. Nonetheless, the history and current reality of rural development have demonstrated that the same policy starting point had led to very different policy designs. Even today, quite a few institutional arrangements with good intentions have ended up with opposite results and have even become bad policies that do harm to people. This book argues that the reason for such serious deviation between political intentions and institutional arrangements as well as between policy goals and its results is as a political force, the peasantry itself has not effectively engaged with the political process of the country.

Society 5.0, Digital Transformation and Disasters Sakiko Kanbara, Rajib Shaw, Naonori Kato, Hiroyuki Miyazaki, Akira Morita, 2022-10-25 This book presents the evolution of the science technology paradigm in Japan and analyzes the critical community and local governance issues from the perspectives of the changing risk landscape Society 5 0 and digital transformation It also provides suggestions for the future development of a resilient society and community by drawing lessons from other countries Advancements in science technology in recent decades in Japan and the world might have increased our capacity to tackle the adverse human consequences of various

kinds of disasters and environmental issues. However, the accompanied and interlinking phenomena of urbanization, climate change, rural to urban migration, population decreases, and aged population have posed new challenges especially in the small, medium-sized cities and in rural areas of Japan. This is also enhanced by the risk of cascading complex and systemic risk, which is defining a new normal as living with uncertainties. Society 5.0 is defined as a human-centered society that balances economic advancement with the resolution of social problems by a system that highly integrates cyberspace and physical space. Society 5.0 was proposed in the 5th Science and Technology Basic Plan as a future society that Japan should aspire to. Society 5.0 achieves a high degree of convergence between cyberspace, virtual space, and physical space, real space, compared with the past information society, Society 4.0, that people would access a cloud service, databases in cyberspace via the Internet and search for, retrieve, and analyze information or data. In Japan, in the initial stage, a great deal of confusion about the number of people infected with coronavirus occurred. Not only made it inefficient but it did not produce the accurate data needed for critical decisions. Japan may have unique disadvantages compared with other countries. Trying to drive digitization without thoroughly understanding these disadvantages and addressing them head-on will only lead to failed digital transformations. With these three pillars of changing risk landscape, Society 5.0 and Digital transformation drive the book will analyze the evolution of the science technology paradigm in Japan will go deeper into the critical community and local governance issues and will provide suggestions for future development of resilient society and community by drawing lessons from overseas disaster risk reduction.
