**Modernising**

**School Governance** Andrew Wilkins, 2016-06-10 Modernising School Governance examines the impact of recent market based reforms on the role of governors in the English state education system A focus of the book concerns how government and non government demands for strong governance have been translated to mean improved performance management of senior school leaders and greater monitoring and disciplining of governors This book addresses fundamental questions about the neoliberal logic underpinning these reforms and how governors are being trained and responsabilised in new ways to enhance the integrity of these developments Drawing on large scale research conducted over three years the book examines the impact of these reforms on the day to day practices of governors and the diminished role of democracy in these contexts Wilkins also captures the economic and political rationalities shaping the conduct of governors at this time and traces these expressions to wider structural developments linked to depoliticisation decentralisation and disintermediation This book addresses timely and original issues concerning the role of corporate planning and expert handling to state education at a time of increased school autonomy shrinking local government support oversight and tight centralised accountability It will appeal to researchers and postgraduate students in disciplines of education sociology political science public policy and management It will also be of interest to researchers and policy makers from countries with similar or emerging quasi market education systems Freedom of Information and Secrecy in Government United States.
