Francisco de Goya and the Art of Critique Anthony J. Cascardi, 2023-01-10 An innovative study of Goya's unprecedented elaboration of the critical function of the work of art Francisco de Goya and the Art of Critique probes the relationship between the enormous extraordinary and sometimes baffling body of Goya's work and the interconnected issues of modernity Enlightenment and critique Taking exception to conventional views that rely mainly on Goya's darkest images to establish his relevance for modernity Cascardi argues that the entirety of Goya's work is engaged in a thoroughgoing critique of the modern social and historical worlds of which it nonetheless remains an integral part The book reckons with the apparent gulf assumed to divide the Disasters of War and the so called Black Paintings from Goya's scenes of bourgeois life or from the well mannered portraits of aristocrats military men and intellectuals It shows how these apparent contradictions offer us a gateway into Goya's critical practice vis vis a European modernity typically associated with the Enlightenment values dominant in France England and Germany In demonstrating Goya's commitment to the project of critique Cascardi provides an alternative to established readings of Goya's work which generally acknowledge the explicit social criticism evident in works such as the Caprichos but which have little to say about those works that do not openly take up social or political themes In *Francisco de Goya and the Art of Critique* Cascardi shows how Goya was consistently engaged in a critical response to and not just a representation of the many different factors that are often invoked to explain his work including

history politics popular culture religion and the history of art itself *Goya in the Metropolitan Museum of Art* Colta Feller Ives, Susan Alyson Stein, Metropolitan Museum of Art (New York, N.Y.), 1995 Goya is the most original artist of his generation the best known Spanish painter of all time This study offers the reader an insightful introduction to the painter his great talent It includes 43 color black white photographs of Goya's work as displayed in the Metropolitan Museum of Art

Baudelaire and Caricature: From the Comic to an Art of Modernity, Baudelaire's essays on caricature offered the first sustained defense of the value of caricature as a serious art worthy of study in its own right This book argues for the crucial importance of the essays for his conception of modernity so fundamental to the subsequent history of modernism From the theory of the comic formulated in *De l'essence du rire* to his discussions of Daumier Goya Hogarth Cruikshank Bruegel Grandville Gavarni Charlet and many others Baudelaire develops not only an aesthetic of caricature but also a caricatural aesthetic dual and contradictory grotesque ironic violent farcical fantastic and fleeting that defines an art of modern life In particular Baudelaire's insistence on the dualism and ambiguity of laughter has radical implications for such emblems of modernity as the city and the flâneur who roams the streets The modern city is the space of the comic a kind of caricature

presenting the fl neur with an image of dualism one s position as subject and object implicated in the same urban experiences one seems to control The theory of the comic invests the idea of modernity with reciprocity one s status as laughter and object of laughter thus preventing the subjective construction and appropriation of the world that has so often been linked with the project of modernism Comic art reflects what Walter Benjamin later defined as Baudelairean allegory at once representing and revealing the alienation of modern experience But Baudelaire also transforms the dualism of the comic into a peculiarly modern unity the doubling of the comic artist enacted for the benefit of the audience the self generating and self reflexive experience of the fl neur in a communion with the crowd This study examines his views in the context of the history of comic theory and contemporary accounts of the individual artists Complete with illustrations of the many works discussed it illuminates the history and theory of caricature the comic and the grotesque and adds to our understanding of modernism in literature and the visual arts

The Folly of the Cross Richard Viladesau, 2018-05-01 The Folly of the Cross is the fourth book in Richard Viladesau s series examining the aesthetics and theology of the cross through Christian history Previous volumes have brought the story up through the Baroque era This new book examines the reception of the message of the cross from the European Enlightenment to the turn of the twentieth century The opening chapters set the stage in the transition from the Baroque to the Classical eras describing the changing intellectual and cultural paradigms of the time Viladesau examines the theology of the cross in the eighteenth and nineteenth centuries and the aesthetic mediation of the cross in music and the visual arts He shows how in the post Enlightenment era the aesthetic treatment of the cross widely replaced the dogmatic treatment and how this thought was translated into popular spirituality piety and devotion The Folly of the Cross shows how classical theology responded to the critiques of modern science history Biblical scholarship and philosophy and how both classical and modern theology served as the occasions for new forms of representation of Christ s passion in the arts and music

The Private Life of a Masterpiece Monica Bohm-Duchen, 2001 This companion volume to a BBC series of the same name delves into eight famous pieces of art

Moving Pictures Anne Hollander, 1989 Hollander explores the premise that paintings prints and movies move us similarly by virtue of their narrative element which evokes our memories and feelings She argues that we respond to the depiction of glimpses of human life to the realization that we cannot see everything at once and how the rendering of light and spatial composition translates them and keeps them moving into our awareness Thus there is a continuum from the paintings and graphic arts of 15th century northern Europe to the proto cinematic arts of the present ISBN 0 394 57400 1 29 95
