## **Grammar Of Boumaa Fijian:**

*A Grammar of Boumaa Fijian* R. M. W. Dixon, 1988 The people who live in the Boumaa region of the Fijian island of Taveuni speak a dialect of Fijian that is mutually intelligible with Standard Fijian the two differing as much perhaps as do the American and British varieties of English During 1985 R M W Dixon one of the most insightful of linguists engaged in descriptive studies today lived in the village of Waitabu and studied the language spoken there He found in Boumaa Fijian a wealth of striking features unknown in commonly studied languages and on the basis of his fieldwork prepared this grammar Fijian is an agglutinating language one in which words are formed by the profligate combining of morphemes There are no case inflections and tense and aspect as shown by independent clitics or words within a predicate complex Most verbs come in both transitive and intransitive forms and nouns can be build up regularly from verbal parts and verbs from nouns The language is also marked by a highly developed pronoun system and by a vocabulary rich in areas of social significance In the opening chapters Dixon describes the Islands political social and linguistic organization outlines the main points of Fijian phonology and presents an overview of the grammar In succeeding chapters he examines a number of grammatical topics in greater detail including clause and phrase structure verbal syntax deictics and anaphora The volume also includes a full vocabulary of all forms treated in discussion and three of the fifteen texts recorded from monolingual village elders on which the grammar is based

M. W. Dixon, 2014-02 This book explores the expression of information source inferences assumptions probability and possibility and gradations of doubt and beliefs across a wide range of languages in different cultural settings Like others in the series it will interest both linguists and linguistically minded anthropologists

Historical Dictionary of Fiji Brij V. Lal, 2015-12-15 This book is the first concise account of the history of the Fiji islands from the beginning of human settlement to the early years of the 21st century Its primary focus is on the period since the advent of colonial rule in the late 19th century to the present benefiting from the author's internationally acknowledged expertise as a scholar and writer on the Fijian past Besides factual information the book also offers a scholarly assessment of the people and events which have shaped Fiji's history The Historical Dictionary of Fiji contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 300 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Fiji **Grammars in Contact** Alexandra Y. Aikhenvald, R. M. W. Dixon, 2007-01-04 Languages can be similar in many ways they can resemble each other in categories constructions and meanings and in the actual forms used to express these A shared feature may be based on common genetic origin or result from geographic proximity and borrowing Some aspects of grammar are spread more readily than others The question is

which are they When languages are in contact with each other what changes do we expect to occur in their grammatical structures Only an inductively based cross linguistic examination can provide an answer This is what this volume is about The book starts with a typological introduction outlining principles of contact induced change and factors which facilitate diffusion of linguistic traits It is followed by twelve studies of contact induced changes in languages from Amazonia East and West Africa Australia East Timor and the Sinitic domain Set alongside these are studies of Pennsylvania German spoken by Mennonites in Canada in contact with English Basque in contact with Romance languages in Spain and France and language contact in the Balkans All the studies are based on intensive fieldwork and each cast in terms of the typological parameters set out in the introduction The book includes a glossary to facilitate its use by graduates and advanced undergraduates in linguistics and in disciplines such as anthropology

Functionalism and Grammar T. Givón, 1995-06-01 This book is Prof Givón's long awaited critical examination of the fundamental theoretical and methodological underpinnings of the functionalist approach to grammar It challenges functionalists to take their own medicine and establish non circular empirical definitions of both function and structure Ideological hand waving however fervent and right thinking is seldom an adequate substitute for analytic rigor and empirical responsibility If the reductionist extremism of the various structuralist schools is to be challenged on solid intellectual grounds the challenge cannot itself be equally extreme in its reductionism The book is divided into nine chapters 1 Prospectus somewhat jaundiced overview 2 Markedness as meta iconicity Distributional and cognitive correlates of syntactic structure 3 The functional basis of grammatical typology 4 Modal prototypes of truth and action 5 Taking structure seriously Constituency and the VP node 6 Taking structure seriously II Grammatical relations and clause union 7 The distribution of grammar in text On interpreting conditional associations 8 Coming to terms with cognition Coherence in text vs coherence in mind 9 On the co evolution of language mind and brain

*A Semantic Approach to English Grammar* R. M. W. Dixon, 2005-07-01 This book shows how grammar helps people communicate and looks at the ways grammar and meaning interrelate The author starts from the notion that a speaker codes a meaning into grammatical forms which the listener is then able to recover each word he shows has its own meaning and each bit of grammar its own function their combinations creating and limiting the possibilities for different words He uncovers a rationale for the varying grammatical properties of different words and in the process explains many facts about English such as why we can say I wish to go I wish that he would go and I want to go but not I want that he would go The first part of the book reviews the main points of English syntax and discusses English verbs in terms of their semantic types including those of Motion Giving Speaking Liking and Trying In the second part Professor Dixon looks at eight grammatical topics including complement clauses transitivity and causatives passives and the promotion of a non subject to subject as in Dictionaries sell well This is the updated and revised edition of *A New Approach to English Grammar on Semantic Principles* It includes new chapters on tense and aspect nominalizations and possession and adverbs and negation and contains a new discussion of comparative

forms of adjectives It also explains recent changes in English grammar including how they have replaced the tabooed he as a pronoun referring to either gender as in When a student reads this book they will learn a lot about English grammar in a most enjoyable manner

**Person** Anna Siewierska,2004-07 This textbook deals with the grammatical category of person which covers the first person the second person and the third person Drawing on data from over 700 languages Anna Siewierska compares the use of person within and across different languages and examines the factors underlying this variation She shows how person forms vary in substance in the nature of the semantic distinctions they convey in how they are used in sentences and discourse and in the way they function to convey social distinctions By looking at different types of person forms in the grammatical and social contexts in which they are used this book documents an underlying unity between them arguing against the treatment of person markers based on arbitrary sets of morphological and syntactic properties Clearly organized and accessibly written it will be welcomed by students and scholars of linguistics particularly those interested in grammatical categories and their use

**Reciprocal Constructions** Vladimir P. Nedjalkov,2007-11-06 This monograph constitutes the first comprehensive investigation of reciprocal constructions and related phenomena in the world's languages Reciprocal constructions of the type The two boys hit each other The poets admire each other's poems have often been the subject of language particular studies but it is only in this work that a truly global comparative picture emerges Nine stage setting chapters dealing with general and theoretical matters are followed by 40 chapters containing in depth descriptions of reciprocals in individual languages by renowned specialists The introductory papers provide a conceptual and terminological framework that allows the authors of the individual chapters to characterize their languages in comparable terms making it easy for the reader to see points of commonality between languages and constructions that have never been compared before This set of volumes is an indispensable starting point and will be a lasting reference work for any future studies of reciprocals

**Typology of Pluractional Constructions in the Languages of the World** Simone Mattioli,2019-04-24 The aim of this book is to give the first large scale typological investigation of pluractionality in the languages of the world Pluractionality is defined as the morphological modification of the verb to express a plurality of situations that can additionally involve a plurality of participants and or spaces Based on a 246 language sample the main characteristics of pluractionality are described and discussed throughout the book Firstly a description of the functions that pluractional markers cross linguistically express is presented and the relationships occurring among them are explained through the semantic map model Then the marking strategies that languages display to express such functions are illustrated and some issues concerning the formal identification are briefly discussed as well The typological generalizations are corroborated showing how pluractional markers work in three specific languages Akawaio Beja Maa In conclusion the theoretical conceptualization of pluractionality is discussed referring to the Radical Construction Grammar approach

**The Anatomy of Avoidance** R. M. W. Dixon,2025-05-19 Speakers of Dyirbal in North Queensland Australia have an everyday

language style which has been well described They also have an avoidance style called Jalnguy which must be used in the presence of certain tabooed kin such as the mother in law Jalnguy has the same grammar and phonology as the everyday style but the vocabularies are entirely different Jalnguy has only about one sixth as many lexemes as the everyday style with various techniques used to create a Jalnguy correspondent for each everyday style word The underlying semantic system of Dyirbal is thus realised at two levels of generality and is revealed through detailed study of the correspondences between them This monograph is the first comprehensive study of this in law avoidance language providing fascinating new insights into register variation and the complexities of kinship in Australian languages      Possession and Ownership Aleksandra

IñUñr'evna Aikhenval'd, R. M. W. Dixon, 2013 Linguists and anthropologists explore the intriguing variety of possessive phrases denoting ownership of property whole part relations such as body and plant parts and blood and affinal kinship relations across a wide range of languages Like others in the series this pioneering book will be equally valued in linguistics and anthropology      The Oceanic Languages John Lynch, Malcolm Ross, Terry Crowley, 2002 The volume contains five

background chapters The Oceanic Languages Sociolinguistic Background Typological Overview Proto Oceanic and Internal Subgrouping Part of 2 vol set Author Ross from ANU      **Language Typology and Syntactic Description: Volume 2,**

**Complex Constructions** Timothy Shopen, 2007-10-04 This unique three volume 2007 survey brings together a team of leading scholars to explore the syntactic and morphological structures of the world's languages Clearly organized and broad ranging it covers topics such as parts of speech passives complementation relative clauses adverbial clauses inflectional morphology tense aspect mood and diexis The contributors look at the major ways that these notions are realized and provide informative sketches of them at work in a range of languages Each volume is accessibly written and clearly explains each new concept introduced Although the volumes can be read independently together they provide an indispensable reference work for all linguists and fieldworkers interested in cross linguistic generalizations Most of the chapters in the second edition are substantially revised or completely new some on topics not covered by the first edition Volume II covers co ordination complementation noun phrase structure relative clauses adverbial clauses discourse structure and sentences as combinations of clauses      *Applicative Constructions* David A. Peterson, 2007 This book presents the first systematic typological analysis of applicatives across African American Indian and East Asian languages It is also the first to address their functions in discourse the derivation of their semantic and syntactic properties and how and why they have changed over time Applicative constructions are typically described as transitivizing because they allow an intransitive base verb to have a direct object The term originates from the seventeenth century missionary grammars of Uto Aztecan languages Constructions designated as prepositional benefactive and instrumental may refer to the same or similar phenomena Applicative constructions have been deployed in the development of a range of syntactic theories which have then often been used to explain their functions usually within the context of Bantu languages Dr Peterson provides a wealth of cross linguistic information on discourse

functional diachronic and typological aspects of applicative constructions He documents their unexpected synchronic variety and the diversity of diachronic sources about them He argues that many standard assumptions about applicatives are unfounded and provides a clear guide for future language specific and cross linguistic research and analysis      **Salish**

**Applicatives** Kaoru Kiyosawa, Donna Gerdt, 2010-06-14 This book offers a comprehensive view of the morphology syntax and semantics of applicatives in Salish a language family of northwestern North America Applicative constructions found in many polysynthetic languages cast a semantically peripheral noun phrase as direct object Drawing upon primary and secondary data from twenty Salish languages the authors catalog the relationship between the form and function of seventeen applicative suffixes The semantic role of the associated noun phrase and the verb class of the base are crucial factors in differentiating applicatives Salish languages have two types of applicatives relationals are formed on intransitive bases and redirectives on transitive ones The historical development and discourse function of Salish applicatives are elucidated and placed in typological perspective      **Universals in Comparative Morphology** Jonathan David

Bobaljik, 2012-10-05 An argument for and account of linguistic universals in the morphology of comparison combining empirical breadth and theoretical rigor This groundbreaking study of the morphology of comparison yields a surprising result that even in suppletion the wholesale replacement of one stem by a phonologically unrelated stem as in good better best there emerge strikingly robust patterns virtually exceptionless generalizations across languages Jonathan David Bobaljik describes the systematicity in suppletion and argues that at least five generalizations are solid contenders for the status of linguistic universals The major topics discussed include suppletion comparative and superlative formation deadjectival verbs and lexical decomposition Bobaljik's primary focus is on morphological theory but his argument also aims to integrate evidence from a variety of subfields into a coherent whole In the course of his analysis Bobaljik argues that the assumptions needed bear on choices among theoretical frameworks and that the framework of Distributed Morphology has the right architecture to support the account In addition to the theoretical implications of the generalizations Bobaljik suggests that the striking patterns of regularity in what otherwise appears to be the most irregular of linguistic domains provide compelling evidence for Universal Grammar The book strikes a unique balance between empirical breadth and theoretical detail The phenomenon that is the main focus of the argument suppletion in adjectival gradation is rare enough that Bobaljik is able to present an essentially comprehensive description of the facts at the same time it is common enough to offer sufficient variation to explore the question of universals over a significant dataset of more than three hundred languages

**The Syntax-Morphology Interface** Matthew Baerman, Dunstan Brown, Greville G. Corbett, 2005-09-15 This pioneering book provides a full length study of inflectional syncretism presenting a typology of its occurrence across a wide range of languages      *The Essence of Linguistic Analysis* R.M.W. Dixon, 2021-02-01 Many works on linguistic typology deal in some detail with one or more particular grammatical topics without clearly demonstrating how these relate to other categories or

construction types The Essence of Linguistic Analysis by R M W Dixon presents a framework which connects individual topics in a cogent and coherent way showing their dependencies and locating each in its place within the overall tapestry of a language A clear distinction is made between semantic roles and syntactic functions And it is held that the basic constituents of a language are lexical elements Grammatical items serve to link together lexical units At every level of analysis the central units are lexical with grammar providing ancillary indicators

*The Cambridge Handbook of Linguistic Typology* Alexandra Y. Aikhenvald, R. M. W. Dixon, 2017-03-30 Linguistic typology identifies both how languages vary and what they all have in common This Handbook provides a state of the art survey of the aims and methods of linguistic typology and the conclusions we can draw from them Part I covers phonological typology morphological typology sociolinguistic typology and the relationships between typology historical linguistics and grammaticalization It also addresses typological features of mixed languages creole languages sign languages and secret languages Part II features contributions on the typology of morphological processes noun categorization devices negation frustrative modality logophoricity switch reference and motion events Finally Part III focuses on typological profiles of the mainland South Asia area Australia Quechuan and Aymaran Eskimo Aleut Iroquoian the Kampa subgroup of Arawak Omotic Semitic Dravidian the Oceanic subgroup of Austronesian and the Awuyu Ndumut family in West Papua Uniting the expertise of a stellar selection of scholars this Handbook highlights linguistic typology as a major discipline within the field of linguistics
