Half-hours with Great Scientists Charles G. Fraser,1960 *HALF-HOURS WITH GREAT SCIENTISTS. THE STORY OF PHYSICS.* Ch.G. Fraser,1948 *Half-Hours with Great Scientists* Charles G. Fraser,1948-12-15 The present age is sometimes called the Scientific Age This does not imply that every member of the community is an expert scientist far from it It does mean however that the labours of the scientists have given the age certain features which influence the life of every citizen to some degree Accordingly it is desirable that as many as possible should have some understanding of the scientists work of their aims their point of view and their methods If we had a wishing rug or some sort of spare time car that could transport us at will to any place and time we might visit the scientists of every age see them at work listen to their discussions and even take a hand in the proceedings The wishing rug is not available but the literature of science will serve the purpose for anyone who will do the necessary searching reading and thinking Unfortunately some of that literature is decidedly inaccessible To meet the difficulty this book has been written in the hope of bringing some of the most important passages of the literature of science within the reach of everyone Every part of the vast edifice of science is necessarily the work of some human being and most of us become more interested in the building and are able to understand and appreciate it better when we know who were the architects and builders and when how and why they did their work The story of science is a noble epic of the struggle of man from ignorance toward knowledge and wisdom and toward the mastery of nature and of himself One purpose of science is to systematize experience and a knowledge of the story of science has helped many in that process of organization This book therefore offers the reader a cordial invitation to embark on a tour of visits with great scientists to learn from them the parts they played in the advancement of science and of the human race Here is a treasure house of fascinating information for all who are interested in the world around us and the history of man s understanding of it Half-Hours with Great Scientists. The Ethereal Aether Loyd S. Swenson, 2013-08-28 The Ethereal Aether is a historical narrative of one of the great experiments in modern physical science The fame of the 1887 Michelson Morley aether drift test on the relative motion of the earth and the luminiferous aether derives largely from the role it is popularly supposed to have played in the origins and later in the justification of Albert Einstein's first theory of relativity its importance is its own As a case history of the intermittent performance of an experiment in physical optics from 1880 to 1930 and of the men whose work it was this study describes chronologically the conception experimental design first trials repetitions influence on physical theory and eventual climax of the optical experiment Michelson Morley and their colleague Miller were the prime actors in this half century drama of confrontation between experimental and theoretical physics The issue concerned the relative motion of Spaceship Earth and the Universe as measured against the background of a luminiferous medium supposedly filling all interstellar space At stake it seemed were the phenomena of astronomical aberration the wave theory of light and the Newtonian concepts of absolute space and time James Clerk Maxwell's suggestion for a test of his electromagnetic theory was translated by Michelson into an experimental design in 1881 redesigned and reaffirmed as a null result with Morley in 1887 thereafter modified and partially repeated by Morley and Miller finally completed in 1926 by Miller alone then by Michelson's team again in the late 1920s Meanwhile Helmholtz Kelvin Rayleigh FitzGerald Lodge Larmor Lorentz and Poincaré most of the great names in theoretical physics at the turn of the twentieth century had wrestled with the anomaly presented by Michelson's experiment As the relativity and quantum theories matured wave particle duality was accepted by a new generation of physicists The aether drift tests disproved the old and verified the new theories of light and electromagnetism By 1930 they seemed to explain Einstein relativity and space time But in historical fact the aether died only with its believers
