New Musical Figurations Ronald M. Radano,2009-05-20 New Musical Figurations exemplifies a dramatically new way of configuring jazz music and history By relating biography to the cultural and musical contours of contemporary American life Ronald M Radano observes jazz practice as part of the complex interweaving of postmodern culture a culture that has eroded conventional categories defining jazz and the jazz musician Radano accomplishes all this by analyzing the creative life of Anthony Braxton one of the most emblematic figures of this cultural crisis Born in 1945 Braxton is not only a virtuoso jazz saxophonist but an innovative theoretician and composer of experimental art music His refusal to conform to the conventions of official musical culture has helped unhinge the very ideologies on which definitions of jazz black music popular music and art music are founded New Musical Figurations gives the richest view available of this many sided artist Radano examines Braxton's early years on the South Side of Chicago whose vibrant black musical legacy inspired him to explore new avenues of expression Here is the first detailed history of Braxton's central role in the Association for the Advancement of Creative Musicians the principal musician run institution of free jazz in the United States After leaving Chicago Braxton was active in Paris and New York collaborating with Philip Glass Steve Reich Frederic Rzewski and other composers affiliated with the experimental music movement From 1974 to 1981 he gained renown as a popular jazz performer and recording artist Since then he has taught at Mills College and Wesleyan University given lectures on his theoretical musical system and written works for chamber groups as well as large opera scale pieces The neglect of radical challenging figures like Braxton in standard histories of jazz Radano argues mutes the innovative voice of the African American musical tradition Refreshingly free of technical jargon New Musical Figurations is more than just another variation on the same jazz theme Rather it is an exploratory work as rich in theoretical vision as it is in historical detail

Leading Issues in African-American Studies Nikongo Ba-Nikongo,1997 African American Studies remains one of the more controversial disciplines in the courses of academic pursuit today In part much of the controversy emanates from an inability of practitioners to agree upon any rigid definition of just what constitutes and just what is encompassed within the field At least there is some agreement that its achievement of institutional acceptance with separate programs departments and granting of advanced degrees warrants its treatment as a legitimate field of pursuit in and of itself but indeed this is where the agreement ends On a range of topics scholars in the field of African American Studies hold decidedly different opinions What ought we to include as African American Studies Is Afrocentricity a figment of the imagination or sound scientific enquiry And what place if any does race and racism continue to play in the life changes of African Americans Bi racialism underclassness intra community crime and Afro Jewish relations are also prominent subjects of consideration In *Leading Issues in African American Studies* BaNikongo has brought together scholars from every associated field of African American Studies and offers a range of perspective on a myriad of topics The text presents differing viewpoints on political social economic cultural and legal issues and succeeds in addressing every major contemporary area of debate in African American academic circles Jazz Issues David W. Megill,Paul Tanner,1995 Intended to be of use to music and jazz students this text emphasizes musical trends and developments in jazz as well as its history It contains an analysis of literature and
