Patent Office,1962 Walking on Uneven Paths Rossella Ragazzi,2009 What can we learn from children traversing the liminal and transient time space of migration How do migrant children and their caretakers navigate educational systems in Europe today How is it to be captive in an inner city classroom How do children s body language and verbal dominant languages interface How does a child become mediator between their family and the educational institutions This anthropologically grounded study integrated by ethnographic film excerpts and based on a culturally reflexive approach to the use of media in the research practices explores the transcultural experience of migrant children between 6 and 13 years by closely analysing the particular codes rhythms and practices of educational systems in Ireland and France The children s experiences are represented in both the film sequences and the written text in the form of their personal shared viewpoints about cultural diversity biographical accounts and social practices in the family and at school These are experiences which they have worked through from a time preceding migration and to the present The film captures the sensibilities of migrant children and invites the reader viewer to embark on these somewhat uneven paths **Maintenance Architecture** Hilary Sample,2016-12-02 An inventive examination of a crucial but neglected aspect of architecture by an architect writing to architects Maintenance plays a crucial role in the production and endurance of architecture yet architects for the most part treat maintenance with indifference The discipline of architecture values the image of the new over the lived in the photogenic empty and stark building over a messy and labored one But the fact is homes need to be cleaned and buildings and cities need to be maintained and architecture no matter its form cannot escape from such realities In Maintenance Architecture Hilary Sample offers an inventive examination of the architectural significance of maintenance through a series of short texts and images about specific buildings materials and projects Although architects have seldom choose to represent maintenance imagining their work only from conception to realization artists have long explored subjects

of endurance and permanence in iconic architecture Sample explores a range of art projects by artists including Gordon Matta Clark Jeff Wall and Mierle Laderman Ukeles to recast the problem of maintenance for architecture How might architectural design and discourse change as a building cycle expands to include post occupancy Sample looks particularly at the private home exhibition pavilion and high rise urban building giving special attention to buildings constructed with novel and developing materials technologies and precise detailing in relation to endurance These include Buckminster Fuller s Dymaxion House 1929 the Lever House 1952 the U S Steel Building 1971 and the O 14 2010 She considers the iconography of skyscrapers maintenance workforces both public and private labor saving technology and devices and contemporary architectural projects and preservation techniques that encompass the afterlife of buildings A selection of artworks make the usually invisible aspects of maintenance visible from Martha Rosler s Cleaning the Drapes to Inigo Manglano Ovalle s The Kiss

[Language, Interaction and National Identity](#) Stephen Hester,William Housley,2017-05-15 Contemporary political and public discourse has come alive with the issues and conflicts surrounding questions of national identity Despite the widespread sociological attention it has drawn as a result most studies of national identity have been conducted at considerable analytical distance from the lived reality of national identity talk This collection

brings together the work of contemporary researchers situating the talk and interaction in which national identities are actually expressed and used The book presents detailed investigations of how persons actually use national identity in their talk the interactional uses to which such expressions are put and the interactional consequences of such identity talk The studies are based on transcribed tape recordings of naturally occurring talk across a variety of different countries and settings illuminating not only situated national identity talk as a phenomenon in its own right but also providing empirically grounded research for traditional sociological theorising about issues of integration devolution and exclusion Orders of Ordinary Action Stephen Hester, 2016-05-13 Presenting original research studies by leading scholars in the field Orders of Ordinary Action considers how ethnomethodology provides for an alternate sociology by respecifying sociological phenomena as locally accomplished members activities Following an introduction by the editors and a seminal statement of ethnomethodology s analytic stance by its founder Harold Garfinkel the book then comprises two parts The first introduces studies of practical action and organization whilst the second provides studies of practical reasoning and situated logic in various settings By organizing the book in this way the collection demonstrates the relevance of ethnomethodological investigations to established topics and issues and indicates the contribution that ethnomethodology can make to the understanding of human action in any and all social contexts Both individually and collectively these contributions illustrate how taking an ethnomethodological approach opens up for investigation phenomena that are taken for granted in conventional sociological theorizing
