Jean Piaget An Interdisciplinary Critique:

Jean Piaget : an interdisciplinary critique Sohan Modgil,1983 Jean Piaget Sohan Modgil,G. Brown,Celia Modgil,2006
This book was first published in 1983 *Jean Piaget* Sohan Modgil,Celia Modgil,Geoffrey Brown,1983 Jean Piaget
Richard Kohler,2014-10-23 Jean Piaget was one of the great thinkers of the twentieth century His influence on developmental
psychology education and epistemology has been enormous This text undertakes a reconstruction of the contexts and
intellectual development of Piaget s numerous texts in the wide ranging fields of biology philosophy psychoanalysis child
psychology social psychology theology logic epistemology and education Richard Kohler reconstructs the often overlooked
theological basis of Piaget s theories and analyses the influence this had upon the various areas of his research and
reflections particularly in relation to education *Jean Piaget* S. Modgil,C. Modgil,G. Brown,2013-01-11 This volume
contains the proceedings of the conference Jean Piaget 1896 1980 A British Tribute The Continuing Debate held at Brighton
Polytechnic on 22 23 May 1981 The collection of papers goes beyond a particular event which took place at a specific time It
stands on its own as a sustained inquiry as to how Piaget s theory is seen in relation to a range of areas of knowledge Pairs of
academics from various disciplines who have worked on aspects of Piagetian theory engaged in for and against debates The
scope of the volume is therefore interdisciplinary **French XX Bibliography** Douglas W. Alden,1985-12 **National**
Library of Medicine Current Catalog National Library of Medicine (U.S.),1971 *Bibliography of Semiotics, 1975-1985*
,1986-01-01 This bibliography of semiotic studies covering the years 1975 1985 impressively reveals the world wide
intensification in the field During this decade national semiotic societies have been founded allover the world a great number
of international national and local semiotic conferences have taken place the number of periodicals and book series devoted
to semiotics has increased as has the number of books and dissertations in the field This bibliography is the result of a
dedicated effort to approach complete coverage Routledge Library Editions: Education and Race Various
Authors,2021-03-04 Reissuing three works originally published in 1984 and 1992 this collection brings together books across
the issues of education and race This small set will be of benefit to teachers and education researchers in these areas as well
as those interested in education history **Racism in Children's Lives** Barry Troyna,Richard Hatcher,2018-10-03
Originally published in 1992 Both teachers and the general public have traditionally been unwilling to acknowledge that
concepts of race might play a part in the lives of primary school children For this book the authors spent a term in each of
three mainly white primary schools They talked to black and white pupils individually and in small groups about issues not
necessarily of race which the children themselves saw as important From these conversations they present a fascinating
study of how race emerges for young children as a plausible explanatory framework for incidents in their everyday lives The
final picture is both disturbing in its demonstration of how significant racism is and hopeful in showing how frequently anti
racist attitudes exist even in the thinking of children who engage in racist behaviour A final chapter looks at how school

policy can combat racism and build on these positive elements

Religions, Beliefs and Education in the European Court of Human Rights Nigel Fancourt, 2024-02-20 This book represents an exposition of judicial pedagogies as a new concept and discusses juridical educational issues in detail through an analysis of the educational claims and assumptions of judges decisions in the European Court of Human Rights ECtHR It sheds light on how within courtrooms around the world judges are increasingly being asked to decide upon issues of religion and belief in schooling whether about admissions policies curriculum planning or pupils and teachers dress and jewellery With key human rights principles at stake these proceedings are often fraught clashing with strong opinions about education and schooling Focusing on decisions made in the European Court of Human Rights ECtHR the author considers how the supranational court looks at these issues and considers the ECtHR s role within the European Education space Drawing upon research and scholarship surrounding these questions the book surveys a series of educational issues including curriculum and assessment and takes a comparative approach in the discussion of case studies to demonstrate the variety and depth of judges thinking Thus rather than considering the national or supranational legal principles and questions as jurisprudential issues typically about religion or human rights it reviews them from an educational perspective as folk theories of teaching and learning Finally it considers the implications of a theory of judicial pedagogy for the courts educational competence in deciding on these matters for education and educational policy research the European education space legal scholarship and for legal and judicial education Developing a novel and innovative approach to the pedagogies at play in a courtroom and providing fresh insights into the courts as agents of social change it will appeal to scholars and researchers working across the disciplines of education law and religious studies

Parallel Paths to Constructivism Susan Pass, 2004-11-01 No two people were more responsible for the current way lessons are taught worldwide than Jean Piaget and Lev Vygotsky Both men had an important impact worldwide on how a person should be taught starting in the last century and continuing today Jean Piaget s Genetic Epistemology concentrated on the individual in learning Lev Vygotsky s Cultural Historical Theory concentrated on the social in learning All over the world teachers today use each man s ideas Some use them at different times in their classrooms and others have learned to use them combined into the same lesson bringing us to the crux of this book namely there are many lessons to learn by discovering the dynamics in the lives of both men While both were from very different countries there are many similarities in their lives While most professors teaching introductory educational psychology courses focus on the difference in their lesson strategies there are some remarkable similarities between their respective pedagogies While differences in their families and countries were obviously significant the two men differed surprisingly little in their pedagogical views and their basic ideas Their similarities in views and ideas are due to the similarities in their lives Chapter 1 looks at those similarities by looking at influences in their childhood Chapter 2 observes their adolescence Chapter 3

concentrates on young adulthood Chapter 4 covers their postgraduate work Chapter 5 traces the origins of their major ideas For Jean Piaget we look at the origin of chronological stages of development the role of language the role of the teacher optimal mismatch equilibration error and play For Lev Vygotsky we look at the origin of zone of proximal development internalization stage of development the social other role of language error sociohistorical context of learning scaffolding and play Chapter 6 deals with how Jean Piaget and Lev Vygotsky were able to overcome adversity and the lessons that can be learned by such overcoming Chapter 7 provides a new pedagogy based on the communications that Jean Piaget and Lev Vygotsky had with each other noting the influence such communications had on their mutual ideas

Theories of Human Development Michael G. Green, John A. Piel, 2015-07-14 The authors have grouped the theories into three classical families which differ in their views relative to the prime motives underlying human nature They show how theories are specific examples of more general points of view called paradigms The theories chosen to represent the three paradigms the Endogenous Paradigm Exogenous Paradigm and the Constructivist Paradigm were selected because they met four criteria importance as judged by academic and research psychologists fertility as judged by the amount of research the theory has generated scope as judged by the variety of phenomena the various theories explain family resemblance as judged by how well each theory represents its paradigm The authors present the paradigm case in the lead chapter for each paradigm This paradigm case is the best example for the paradigm The authors explain why paradigm cases are important and give them more detailed treatment than other theories in the same paradigm
