Walter D. Ward

Jerash And The Decapolis:

Jerash and the Decapolis Iain Browning, 1982 Jerash with Petra and Palmyra is one of the three great classical city sites of the Near East Set in a wide fertile valley in the hills of Gilead in Jordan Jerash is above all an outstanding example of a rich Roman provincial town both in its plan and its architecture It is also the best preserved of the cities of the Decapolis a group of settlements of Hellenistic origin first referred to in the Bible whose shared history and culture extended from the time of Alexander the Great through the Roman and Byzantine periods to the advent of Islam In addition to its magnificent legacy of Roman remains Jerash has some fine examples of Byzantine art and architecture To put the site into context the author explores the history of Jerash and the other Decapolis cities including the adventures and researches of the nineteenth and twentieth century travellers and scholars Against this background Jerash as it is today is then described and illustrated with 146 architectural drawings plans reconstructions photographs and maps Of special interest are the nineteenth century photographs which show what dramatic changes have taken place in the last hundred years **Jordan** Carole French, 2012-07-03 The most up to date guide available to Jordan complete with personal insider tips and photographs

The Hellenistic Settlements in Syria, the Red Sea Basin, and North Africa Getzel M. Cohen, 2006-10-03 The Hellenistic Settlements in Syria the Red Sea Basin and North Africa will take its place as the first volume has already done as an indispensable resource for the study of Greek history The book will be a research tool of lasting value there is nothing remotely similar available to the student of urbanism in the ancient world The scholarship is of the highest quality thorough and current Kent Rigsby editor of Greek Roman and Byzantine Studies **The Hellenistic Settlements in Europe, the Islands, and Asia Minor** Getzel M. Cohen, 1995 This is an important book which should become the standard reference work on Hellenistic colonies in Greece and Asia Minor Richard A Billows Columbia University Professor Cohen provides us with a comprehensive survey of over a half century of archaeological activity and an indispensable reference tool for those interested in Hellenistic political history and the urban history of antiquity The scholarship is superior in every respect Stanley Burstein California State University Los Angeles **Temples and Sanctuaries in the Roman East** Arthur Segal, 2013-10-31 This lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and sanctuaries built in the Roman East between the end of the 1st century BCE and the end of the 3rd century CE within a broad region encompassing the modern states of Syria Lebanon Israel and Jordan Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome The source of this power lay in the uniformity of the architectural language the inventory of forms the choice of styles and the spatial layout of the buildings Thus while temples have an eclectic character there is an underlying unity of form comprising the podium the stairway between the terminating walls antae and the columns along the entrance front in other words the axuality frontality and symmetry of the temple as viewed

from outside The temples and sanctuaries studied in this volume demonstrate individual nuances of plan spatial design location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories Vitruvian temples derived from Hellenistic Roman architecture and Non Vitruvian temples those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion *Near Eastern Cities from Alexander to the Successors of Muhammad* Walter D.

Ward,2019-07-10 *Near Eastern Cities from Alexander to the Successors of Muhammad* compares the evolution of several cities in the Near East from the time of Alexander the Great until the beginning of the Islamic Abbasid Dynasty This volume examines both archaeological remains and literary sources to explain the diversity of imperial cultural and religious influences on urban life It offers several case studies chosen from different regions of the Roman Near East demonstrating that Greco Roman and Islamic culture spread unevenly through these various cities and that it is impossible to make broad generalizations It argues instead that there were different patterns of urbanism that demonstrate a continued vitality of civic life up to the Abbasid revolution *Near Eastern Cities from Alexander to the Successors of Muhammad* will be of particular interest to students of this period in the Ancient Near East as well as those studying ancient cities and everyday life **The**
