The Historical Writings of John Fiske: The American revolution John Fiske, 1896      *The Miscellaneous Writings of John Fiske* John Fiske, 2015-08-08 The Miscellaneous Writings of John Fiske by John Fiske John Fiske american philosopher and historian 1842 1901 This book is a reproduction of the original book published in 1902 and may have some imperfections such as marks or hand written notes      *The Historical Writings of John Fiske* John Fiske, 1902      The Miscellaneous Writings of John Fiske John Fiske, 1902      **The Historical Writings of John Fiske: The discovery of America** John Fiske, 1902      *The Life and Letters of John Fiske* John Fiske, 2008-07 This historic book may have numerous typos and missing text Purchasers can download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1902 Excerpt earth r radius of moon or other body P moon s horizontal parallax earth s angular semidiameter as seen from the moon f moon s angular semidiameter Now P in circular measure r r r in circular measure r r P P or radius of earth radii of moon moon s parallax moon s semidiameter Examples 1 Taking the moon s horizontal parallax as 57 and its angular diameter as 32 find its radius in miles assuming the earth s radius to be 4000 miles Here moon s semidiameter 16 4000 57 16 r 400 16 1123 miles 2 The sun s horizontal parallax being 88 and his angular diameter 32V find his diameter in miles Am 872 727 miles 3 The synodic period of Venus being 584 days find the angle gained in each minute of time on the earth round the sun as centre Am l 54 per minute 4 Find the angular velocity with which Venus crosses the sun s disc assuming the distances of Venus and the earth from the sun are as 7 to 10 as given by Bode s Law Since  $\sin V \sin VA = 7/3$  But  $Sr$  has a relative angular velocity round the sun of l 54 per minute see Example 3 therefore the relative angular velocity of A V round A is greater than this in the ratio of 7/3 which gives an approximate result of 3.6 per minute the true rate being about 4 per minute Annual Parallax 95 We have already seen that no displacement of the observer due to a change of position on the earth s surface could apparently affect the direction of a fixed star However as the earth in its annual motion describes an orbit of about 92 million miles radius round the sun the different positions in space from which an observer views the fixed stars from time to time throughout the year must be separated      *The Historical Writings of John Fiske. John Spencer Clark,1917 John Fiske was not a voluminous correspondent hence we have not many self revealing letters to intimate friends and kindred thinkers regarding his wrestling with some of the great themes which from time to time engaged his mind The absence of these desirable data is however greatly minimized by the possession of his deeply interesting personal letters to his wife and his mother and of his diaries in which the innermost feelings of his nature are disclosed These taken in connection with his published writings enable us to make out quite a full record of his subjective activities which when considered in relation to the seething thought of the time as a stimulating objective environment yield copious material for a Life of Fiske in both its unity and its variety In the correspondence between Fiske and Spencer and in the letters of Fiske describing Spencer we get pleasanter impressions of Spencer s personality than from any other source To the end Fiske was thoroughly loyal to Spencer while immensely broadening his philosophy at the same time it must be admitted that Spencer withheld the public acknowledgment of indebtedness to Fiske which he so freely admitted privately
