John H. Glenn, Astronaut Lt.-Col. Philip N. Pierce, 2018-12-01 AT 9 47 on the morning of February 20 1962 American life came to a breathless halt as millions paused to listen and watch while a mighty rocket hurled a man carrying capsule into orbit around the earth. The successful flight and safe return of Marine Astronaut Lt Col John Herschel Glenn Jr have given his name a luster that few other American names have ever achieved. But John Glenn is more than a name. He is a dedicated maker of history who modestly believes that his God-given talents and his ability and opportunity to use them are his destiny indeed his duty to his country and the world. Here written by men who know him is the biography of that remarkable man and his historic flight. *NASA EP*. United States. National Aeronautics and Space Administration, 1961

In the Shadow of the Moon Francis French, Colin Burgess, 2007-01-01 Tells the story of the exciting and challenging years in space flight with two superpowers engaged in a titanic struggle to land one of their own people on the moon. This book explores the inspirations, ambitions, personalities and experiences of the select few whose driving ambition was to fly to the moon. The Astronaut Maker Michael Cassutt, 2018-08-01 One of the most elusive and controversial figures in NASA's history George W S Abbey was called the Dark Lord the Godfather and UNO short for unidentified NASA official. He was said to be secretive, despotic, a Space Age Machiavelli. Yet Abbey had more influence on human spaceflight than almost anyone in history. His story has never been told until now. *The Astronaut Maker* takes readers inside NASA to learn the real story of how Abbey rose to power from young pilot and wannabe astronaut to engineer, bureaucrat and finally director of the Johnson Space Center. During a thirty-seven year career mostly out of the spotlight he oversaw the selection of every astronaut class from 1978 to 1987 deciding who got to fly and when. He was with the Apollo 1 astronauts the night before the fatal fire in January 1967. He was in mission control the night of the Apollo 13 accident and organized the recovery effort. Abbey also led NASA's recruitment of women and minorities as space shuttle astronauts and was responsible for hiring Sally Ride. Written by Michael Cassutt the coauthor of the acclaimed astronaut memoirs *DEKE* and *We Have Captured* and informed by countless hours of interviews with Abbey and his family, friends, adversaries and former colleagues *The Astronaut Maker* is the ultimate insider's account of ambition and power politics at NASA.

Aviation's Most Wanted™ Steven A. Primary Politics Elaine C. Kamarck, 2023-07-25 The 2024 presidential primaries are on the horizon and this fourth edition of Elaine Kamarck's *Primary Politics* will be there to help make sense of them Updated to include the 2020 election it will once again be the guide to understanding the modern nominating system that gave the American electorate a choice between Donald Trump and Joe Biden In *Primary Politics* political insider Elaine Kamarck explains how the presidential nomination process became the often baffling system we have today including the robot rule Her focus is the largely untold story of how presidential candidates since the early 1970s have sought to alter the rules in their favor and how their failures and successes have led to even more change She describes how candidates have sought to manipulate the sequencing of primaries to their advantage and how Iowa and New Hampshire came to dominate the system She analyzes the rules that are used to translate votes into delegates paying special attention to the Democrats twenty year fight over proportional representation and some of its arcana Drawing on meticulous research interviews with key figures in both parties and years of experience this book explores one of the most important questions in American politics how we narrow the list of presidential candidates every four years

Moon Bound Colin Burgess, 2013-03-12 Often lost in the shadow of the first group of astronauts for the Mercury missions the second and third groups included the leading figures for NASA's activities for the following two decades *Moon Bound* complements the author's recently published work *Selecting the Mercury Seven* 2011 extending the story of the men who helped to launch human spaceflight and broaden the American space program Although the initial 1959 group became known as the legendary pioneering Mercury astronauts the astronauts of Groups 2 and 3 gave us many household names Sixteen astronauts from both groups traveled to the Moon in Project Apollo with several actually walking on the Moon one of them being Neil Armstrong This book draws on interviews to tell the astronauts personal stories and recreate the drama of that time It describes the process by which they were selected as astronauts and explains how the criteria had changed since the first group *Moon Bound* is divided into two parts recounting the biographies relating to the nine astronauts from NASA's Group 2 in the first part and the fourteen finalists in

Group 3 in the second part The stories of both selection groups are narrated through the experiences of four finalists with interesting backgrounds One of these men is Al Rupp of the USAF who as a West Point cadet cheekily helped to steal the Navy mascot goat prior to the annual Army versus Navy game in 1953 thus achieving legendary status in the game s history Rupp was killed in a plane crash just two years after being named as a finalist for Group 3 The service career of naval aviator John Yamnicky was also very much the equal of other finalists but he was killed on September 11 2001 as he was a passenger on hijacked Flight 77 which was flown into the Pentagon At the end of the work there are several chapters on how these candidates were prepped for their missions
