## **John Hejduk Mask Of Medusa Works 1947 1983:**

**Mask of Medusa** John Hejduk, 1985      **Mask of medusa; John Hejduk, works 1947-1983** K. Shkapich, 1985

**Mask of Medusa** Kim Shkapich, 1985      Trajectories in Architecture Michael Jasper, 2023-04-21 Trajectories in Architecture Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date Trajectories in Architecture adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture s recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture s traditions and design principles and their future expression Trajectories in Architecture includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei      **The Place of Silence** Mark Dorrian, Christos Kakalis, 2020-02-06 The Place of Silence explores the poetics and politics of silence in architecture Bringing together contributions by internationally recognized scholars in architecture and the humanities it explores the diverse practices affects politics and cultural meanings of silence silent places and silent buildings in historical and contemporary contexts What counts as silence in specific situations is highly relative and the term itself carries complex and varied significations which make it a revealing field of study Chapters explore a range of themes from the apparent loss of silence in the contemporary urban world through designed silent spaces to the forced silences of oppression catastrophe or technological breakdown The book unfolds a rich and complementary array of perspectives which address through the lens of architecture and place questions of sound atmosphere and attunement together building a volume which will form the key scholarly resource on architecture and silence      *The Fractal Dimension of Architecture* Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest

single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design

**JOHN Q. HEJDUJ. EL UNIVERSO EN UN CUBO** ARANGUREN LIZCANO LUIS SEBASTIÁN, 2023-11-06 El universo en un cubo es un trabajo de investigación sobre tres series de casas desarrolladas por el arquitecto John Q Hejduk Casas Texas Casas Diamond y Casas Muro La hipótesis sostenida es que en estas series de casas desarrolladas entre 1954 y 1974 existe una expansión del concepto de orden en arquitectura El concepto de orden tiene una incidencia en operaciones tan fundamentales y básicas del ejercicio arquitectónico que es frecuentemente pasado de alta en discusiones contemporáneas La atención prestada en esta investigación a este problema tiene que ver con retomar el asombro por una de las herramientas más poderosas de la arquitectura su capacidad de ordenar El estudio se concentra en dos aspectos particulares de estas casas su lógica de organización interna y la definición de sus límites Y son estas condiciones particulares de las casas y su conexión con otros ejemplos de la historia del arte y la arquitectura lo que permite entender que la manipulación del orden es una fuente inagotable de configuraciones formales y por ende de conocimiento y significados políticos en arquitectura El universo en un cubo es un trabajo de investigación sobre tres series de casas desarrolladas por el arquitecto John Q Hejduk Casas Texas Casas Diamond y Casas Muro La hipótesis sostenida es que en estas series de casas desarrolladas entre 1954 y 1974 existe una expansión del concepto de orden en arquitectura El concepto de orden tiene una incidencia en operaciones tan fundamentales y básicas del ejercicio arquitectónico que es frecuentemente pasado de alta en discusiones contemporáneas La atención prestada en esta investigación a este problema tiene que ver con retomar el asombro por una de las herramientas más poderosas de la arquitectura su capacidad de ordenar El estudio se concentra en dos aspectos particulares de estas casas su lógica de organización interna y la definición de sus límites Y son estas condiciones particulares de las casas y su conexión con otros ejemplos de la historia del arte y la arquitectura lo que permite entender que la manipulación del orden es una fuente inagotable de configuraciones formales y por ende de conocimiento y significados políticos en arquitectura **The Monster Leviathan** Aaron Betsky, 2024-01-09 Visionary proposals for a mythic and strange architecture or anarchitecture through which we can imagine other and better worlds Lurking under the surface of our modern world lies an unseen architecture or anarchitecture It is a possible architecture an analogous architecture an architecture of anarchy which haunts in the form of monsters that are humans and machines and cities all at once or takes the form of explosions veils queer playful spaces or visions from artwork and video games In The Monster Leviathan Aaron Betsky traces anarchitecture through texts design and art of the twentieth and early twenty first century and suggests that these ephemeral evocations are concrete proposals in and of themselves Neither working models nor suggestions for new forms they are scenes just believable enough to convince us they exist or just fantastical enough to open our eyes The Monster Leviathan gives students

and lovers of architecture as well as those hoping to construct a better more sustainable and socially just future a set of tools through which they can imagine that such other worlds are possible As Betsky eloquently articulates anarchitecture already exists and does not exist at all It is the myth of building and all we have to do is find it      **Architectural Drawings as**

**Investigating Devices** Marianna Charitonidou,2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe s preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics      Histories

of Architecture Education in the United States Peter L. Laurence,2023-10-31 Histories of Architecture Education in the United States is an edited collection focused on the professional evolution experimental and enduring pedagogical approaches and leading institutions of American architecture education Beginning with the emergence of architecture as a profession in Philadelphia and ending with the early work but unfinished international effort of making room for women and people of color in positions of leadership in the field this collection offers an important history of architecture education relevant to audiences both within and outside of the United States Other themes include the relationship of professional organizations to educational institutions the legacy of late nineteenth century design concepts the role of architectural history educational changes and trans Atlantic intellectual exchanges after WWII and the Cold War the rise of the city and urban design in the architect s consciousness student protests and challenges to traditional architecture education and the controversial appearance of environmental activism This collection in other words provides a relevant history of the present with topics of concern to all architects studying and working today      **Hejduk's Chronotope** K. Michael Hays,1996-09

Anyone interested in the intersection of theory and practice in architecture will appreciate the insight offered by Hejduk s Chronotope With essays by Stan Allen Peggy Deamer K Michael Hays Catherine Ingraham Detlef Mertins Edward Mitchell and Robert Somol the volume examines today s tendency towards theoretical production as exemplified by John Hejduk

known for his ventures outside the realm of the practical Hejduk the Dean of the School of Architecture at The Cooper Union has created a unique body of theoretical work publications such as *Mask of Medusa* and small scale constructions such as his compelling masques structures that fall between architecture scenography sculpture and poetry Additionally Hejduk has several built works to his name housing in Berlin and a renovation of The Cooper Union which display the same themes and tectonics as his theoretical creations

*The Theory of Architecture* Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopian thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text

*The Australian Embassy in Tokyo and Australia-Japan Relations* Kate Darian-Smith, David Lowe, 2023-03-02 Relations between Australia and Japan have undergone both testing and celebrated times since 1952 when Australia's ambassadorial representation in Tokyo commenced Over the years interactions have deepened beyond mutual trade objectives to encompass economic defence and strategic interests within the Indo Pacific region and beyond This

special relationship has been characterised by the high volume of people moving between Australia and Japan for education tourism business science and research Cultural ties from artists in residence to sister city agreements have flourished Australia has supported Japan in times of need including the aftermath of the 2011 Tohoku earthquake This book shows how the Australian embassy in Tokyo through its programs and people has been central to these developments The embassy s buildings its gardens and grounds and above all its occupants from senior Australian diplomats to locally engaged staff are the focus of this multidimensional study by former diplomats and expert observers of Australia s engagement with Japan Drawing on oral histories memoirs and archives this volume sheds new light on the complexity of Australia s diplomatic work in Japan and the role of the embassy in driving high level negotiations as well as fostering soft power influences With a similar vision for the Indo Pacific region and a like minded approach to the challenges facing us Australia and Japan have become more intimate and more strategic as partners I am very pleased to see this slice of Australian diplomatic history so well accounted for in this book Jan Adams AO PSM Secretary Australian Department of Foreign Affairs and Trade Australia s Ambassador to Japan November 2020 June 2022      **Experiments with Life Itself** Francisco Gonzalez de

Canales,2013-01-15 Every book relating the history of modern architecture features a large number of pages dedicated to avant garde designs and the formation of the modern movement in the interwar years and a similar number devoted to reconstruction and expansion after the Second World War Meanwhile as if owing to lack of understanding or convenient silence there is void of dark years of wars exile and misfortune about which little can be said However it was in these dark times as in so many other revealing moments in the history of culture that experimental and profoundly invigorating experiences were taking place Architects and artists voluntarily or forcibly driven to the margins of social importance began to react to a culturally unsustainable situation of which we know very little even today In *Experiments with Life Itself* Francisco Gonzalez de Canales studies a series of unrelated cases from the late 1930s to the late 1950s that he refers to as domestic self experimentation      **Architecture's Desire** K. Michael Hays,2009-10-02 Theorizes an architectural ethos of extreme self reflection and finality from a Lacanian perspective While it is widely recognized that the advanced architecture of the 1970s left a legacy of experimentation and theoretical speculation as intense as any in architecture s history there has been no general theory of that ethos Now in *Architecture's Desire* K Michael Hays writes an account of the late avant garde as an architecture systematically twisting back on itself pondering its own historical status and deliberately exploring architecture s representational possibilities right up to their absolute limits In close readings of the brooding melancholy silence of Aldo Rossi the radically reductive decompositions and archaeologies of Peter Eisenman the carnivalesque excesses of John Hejduk and the cinegrammatic delirium of Bernard Tschumi Hays narrates the story of architecture confronting its own boundaries with objects of ever more reflexivity difficulty and intransigence The late avant garde is the last architecture with philosophical aspirations an architecture that could think philosophical problems through architecture rather than

merely illustrate them It takes architecture as the object of its own reflection which in turn produces an unrelenting desire Using the tools of critical theory together with the structure of Lacan's triad imaginary symbolic real Hays constructs a theory of architectural desire that is historically specific and yet sets the terms and the challenges of all subsequent architectural practice including today's *Design Research in Architecture* Murray Fraser, 2021-07-28 What is the role of design research in the types of insight and knowledge that architects create That is the central question raised by this book It acts as the introductory overview for Ashgate's major new series *Design Research in Architecture* which has been created in order to establish a firm basis for this emerging field of investigation within architecture While there have been numerous architects scholars since the Renaissance who have relied upon the interplay of drawings models textual analysis intellectual ideas and cultural insights to scrutinise the discipline nonetheless until recently there has been a reluctance within architectural culture to acknowledge and accept the role of design research as part of the discourse However in many countries around the world one of the key changes in architecture and architectural education over the last decade has been the acceptance of design as a legitimate research area in its own right and this new series provides a forum where the best proponents of architectural design research can publish their work This volume provides a broad overview on design research that supports and amplifies the different volumes coming out in the book series It brings together leading architects and academics to discuss the more general issues involved in design research At the end there is an Indicative Bibliography which alludes to a long history of architectural books which can be seen as being in the spirit of design research

**Architecture in Black** Darell Wayne Fields, 2015-03-12 Based on analysis of historical philosophical and semiotic texts *Architecture in Black* presents a systematic examination of the theoretical relationship between architecture and blackness Now updated this original study draws on a wider range of case studies highlighting the racial techniques that can legitimize modern historicity philosophy and architectural theory Arguing that architecture as an aesthetic practice and blackness as a linguistic practice operate within the same semiotic paradigm Darell Fields employs a technique whereby works are related through the repetition and revision of their semiotic structures Fields reconstructs the genealogy of a black racial subject represented by the simultaneous reading of a range of canonical texts from Hegel to Saussure to Henry Louis Gates Jr Combining an historical survey of racial discourse with new readings resulting from advanced semiotic techniques doubling as spatial arrangements *Architecture in Black* is an important contribution to studies of the racial in Western thought and its impact on architecture space and time

**Radical Pedagogies** Beatriz Colomina, Ignacio G. Galán, Evangelos Kotsioris, Anna-Maria Meister, 2022-05-31 Experiments in architectural education in the post World War II era that challenged and transformed architectural discourse and practice In the decades after World War II new forms of learning transformed architectural education These radical experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms decentered building

imagined new roles for the architect and envisioned participatory forms of practice Although many of the experimental programs were subsequently abandoned terminated or assimilated they nevertheless helped shape and in some sense define architectural discourse and practice This book explores and documents these radical pedagogies and efforts to defy architecture's status quo The experiments include the adaptation of Bauhaus pedagogy as a means of unlearning under the conditions of decolonization in Africa a movement to design for every body including the disabled by architecture students and faculty at the University of California Berkeley the founding of a support network for women interested in the built environment regardless of their academic backgrounds and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design Viewed through their dissolution and afterlife as well as through their founding stories these projects from the last century raise provocative questions about architecture's role in the new century

Utopia's Ghost Reinhold Martin, 2010-04-15 Written at the intersection of culture politics the city particularly in the context of corporate globalization Utopia's Ghost challenges dominant theoretical paradigms opens new avenues for architectural scholarship cultural analysis
