Fistful Of Digits:

The Sociology of Science Fiction Brian M. Stableford, 1987-01-01 Well known critic Brian Stableford a former professor at the University of Reading contributes a fascinating and valuable attempt to grapple with the questions of why SF authors write what they write and why SF readers like what they like Interzone Contents Introduction Approaches to the Sociology of Literature The Analysis of Communicative Functions The Evolution of Science Fiction as a Publishing Category The Expectations of the Science Fiction Reader Themes and Trends in Science Fiction and Conclusion The Communicative Functions of Science Fiction Complete with Notes and References Bibliography and Index [The Cybernetic Imagination in Science Fiction](#) Patricia S. Warrick, 1980 Science fiction criticism Focuses on literary scientific material [The Best New Horror 7](#) Stephen Jones, 2014-01-31 The Best New Horror has established itself as the world's premier annual showcasing the talents of the very best writers working in the horror and dark fantasy field today In this latest volume the multi award winning editor has once again chosen more than twenty terrifying tales of supernatural fear and psychological dread by some of the most acclaimed authors working in the genre Along with the most comprehensive review of the year and a fascinating necrology this is the book no horror fan can afford to miss **Nature & Culture** Council for Eco-philosophy, 2024-12-20 The eco philosophy which can be described as the pursuit of harmonious coexistence with the ecological constraints of growth originated in Norway during the period of rapid industrialisation following the Second World War Given the prevailing economic circumstances in Norway at the time the potential for utilising hydropower was viewed as a promising avenue for economic growth The pursuit of expedient pathways to the establishment of a welfare state led to the construction of numerous dams in mountainous regions In due course the development came under criticism with the author and lawyer Peter Wessel Zapffe noting the disappearance of waterfalls and the concomitant loss of the Norwegian mentality associated with them Nevertheless throughout the 1960s the conservation movement was unable to present arguments that could match the compelling data presented by the proponents of the industrial growth society Three Norwegians were instrumental in developing these arguments Chemical engineer Nils Faarlund made a significant contribution to the field of ecology introducing the concept of change with joy Professor Arne Naess provided a philosophical foundation for thought and action drawing upon the ethical and value based principles espoused by Baruch Spinoza and the non violence philosophy of Mahatma Gandhi Additionally Sigmund Kvaloy Setreng played a pivotal role in the advancement of political activism civil disobedience campaigns and the development of theoretical frameworks for movements resisting the industrial growth society [Machine Takeover](#) Frank George, 2014-05-18 Machine Takeover The Growing Threat to Human Freedom in a Computer Controlled Society discusses the implications of technological advancement The title identifies the changes in society that no one is aware of along with what this changes entails The text first covers the information science particularly the aspect of an automated system for information processing Next the selection deals with social implications of information

science such as information pollution The text also tackles the concerns in the utilization of technology in order to manipulate the lives of people without their knowledge In Part III the title covers the science of cybernetics and artificial intelligence The last part tackles the consequences of modern science The book will be of great interest to readers who are concerned with the direction of contemporary science **Official Gazette of the United States Patent and Trademark Office** ,2001

Computers and Society in the Past Half Century Abbe Mowshowitz,2024-04-17 Almost fifty years ago the author wrote the first comprehensive critical study of social issues in computing *The Conquest of Will* 1976 This new book revisits this seminal study featuring an overview of technological advances over the past half century and provides a unique comparison between what was believed and expected of computers back in 1976 and actual outcomes up to the present time Despite the extraordinary changes in technology much of what has emerged in contemporary society was anticipated fifty years ago and we are still grappling with some of the same basic challenges For example the computer s threat to privacy has been a constant issue ever since the late 1950s but the regulatory framework designed in the 1960s has been upended by the Internet Artificial Intelligence too has been a contentious issue since the late 1950s but until recently discussion was largely confined to academia and there was little urgency to regulate its further development and application The comparisons offered in this book will highlight what we got right and wrong in the past and point to the sources of good and bad predictions While there have been many studies of social issues in computing published since *The Conquest of Will* appeared in 1976 this is an unusual and valuable longitudinal comparison of the current situation with what prevailed and was predicted half a century ago **Ecophilosophy in a World of Crisis** Roy Bhaskar,Petter Naess,Karl Høyer,2011-10-04

Building on its origins at a seminar in Oslo organized by two of the editors this book combines classic texts of Nordic ecophilosophy and the original contributions of those influenced by this tradition to present the view that critical realism is indeed a worthy intellectual tradition to carry forward and further develop the work of the founders of Nordic ecophilosophy It was clear at the seminar that there was a promising convergence of interests and themes in the two approaches while at the same time within the Nordic ecophilosophical tradition there was appreciation of the capacity of critical realism with its provision of a robust philosophical ontology and generation of totalizing immanent critiques of Western philosophy to provide an expansive and secure home for the development of ecophilosophical work generally If there is a single overarching theme of critical realist philosophy it surely must be that of the unity of theory and practice which Bhaskar following Hegel has also called seriousness This makes the applicability relevance and actionability of critical realism key considerations for critical realists There can be no doubt that this concern was shared fully by the Nordic ecophilosophers and this quality of seriousness is a striking feature of the Nordic contributions presented in this book **Stats with Cats** Charles Kufs,2011

When you took statistics in school your instructor gave you specially prepared datasets told you what analyses to perform and checked your work to see if it was correct Once you left the class though you were on your own Did you know how to

create and prepare a dataset for analysis Did you know how to select and generate appropriate graphics and statistics Did you wonder why you were forced to take the class and when you would ever use what you learned That's where Stats with Cats can help you out The book will show you How to decide what you should put in your dataset and how to arrange the data How to decide what graphs and statistics to produce for your data How you can create a statistical model to answer your data analysis questions The book also provides enough feline support to minimize any stress you may experience Charles Kufs has been crunching numbers for over thirty years first as a hydrogeologist and since the 1990s as a statistician He is certified as a Six Sigma Green Belt by the American Society for Quality He currently works as a statistician for the federal government and he is here to help you
