pictures of the floating world offers a new approach to understanding the production and reception of print culture in early modern Japan. It provides a corrective to the perception that the ukiyo-e tradition was the product of the creative talents of individual artists, revealing instead the many identities that made and disseminated printed work. Julie Nelson Davis demonstrates by way of examples from the later eighteenth century that this popular genre was the result of an exchange among publishers, designers, writers, carvers, printers, patrons, buyers, and readers. By recasting these works as examples of a network of commercial and artistic cooperation, she offers a nuanced view of the complexity of this tradition and expands our understanding of the dynamic processes of production, reception, and intention in floating world print culture. Four case studies give evidence of what constituted modes of collaboration among artistic producers in the period. In each case, Davis explores a different configuration of collaboration: that between a teacher and a student, two painters and their publishers, a designer and a publisher, and a writer and an illustrator. Each investigates a mode of partnership through a single work: a specially commissioned print, a lavishly illustrated album, a printed handscroll, and an inexpensive illustrated novel. These case studies explore the diversity of printed things in the period, ranging from expensive works made for a select circle of connoisseurs to those meant to be sold at a modest price to a large audience. They take up familiar subjects from the floating world: connoisseurship, beauty, sex, and humor, and explore multiple dimensions of inquiry vital to that dynamic culture: the status of art, the evaluation of beauty, the representation of sexuality, and the tension between mind and body. Where earlier studies of woodblock prints have tended to focus on the individual artist, *Partners in Print* takes the subject a major step forward to a richer picture of the creative process. Placing these works in their period context not only reveals an aesthetic network responsive to and shaped by the desires of consumers in a specific place and time, but also contributes to a larger discussion about the role of art and the place of the material text in the early modern world.

Black in Print Jennifer Carolina Gómez Menjívar, 2023-05-01 *Black in Print* examines the role of narrative from traditional writing to new media in conversations about race and belonging in the isthmus. It argues that the production, circulation, and consumption of stories has led to a trans-isthmian imaginary that splits the region along racial and geographic lines into a white mestizo Pacific coast, an Indigenous core, and a Black Caribbean. Across five chapters, Jennifer Carolina Gómez Menjívar identifies a series of key moments in the history of the development of this imaginary: Independence, Intervention, Cold War, Post-Revolutionary, and Digital Age. Gómez Menjívar's analysis ranges from literary beacons such as Rubén Darío and Miguel Ángel Asturias to less studied intellectuals such as Winston González and Carl Rigby. The result is a fresh approach to race, the region, and its literature. *Black in Print* understands Central American Blackness as a set of shifting coordinates plotted on the axes of language, geography, and time as it moves through print media.
