The Foreign Policies of East African States Jude Kagoro, Julian Friesinger, Klaus Schlichte, 2024-11-26 This book analyses the foreign policies of African countries specifically in the region of East Africa It reveals the regional dynamics and the way in which the international system interacts with these policies and how they are

driven by domestic politics versus national visions and vice versa As such it provides fine grained and historically informed analyses of the international relations of these states arguing that foreign policy is always informed by domestic processes and the relations between states and changes within the international system impact on the formulation of domestic politics via foreign policy Finally the book argues that East Africa s foreign policy is not one of militarised action alone but rather a m range of self survival strategies stemming from the desire to close the gap with more industrialised states necessitating a variety of trade and diplomatic efforts This book is of key interest to scholars and students of African politics Foreign Policy Foreign Policy Analysis International Organisations and more broadly to comparative politics and international relations

The African Union Tony Karbo,Tim Murithi,2017-11-23 The African Union has been a major factor in establishing peace security and development in Africa Today however the intranational body is struggling in the midst of a perceived dissipating appetite for supporting continental institutions Previously seen as the panacea to Africa s continuing problems with violence and corruption in society under the slogan African Solutions to African Problems the African Union this book argues seems to have run its course Recognizing that the measured successes in political emancipation which have been recorded across the African continent do not seem to have translated into economic and social gains for its 1 2 billion citizens the AU adopted a new development framework dubbed Agenda 2063 The framework calls on African leaders to rediscover the Pan African spirit and to create the Africa Africans want In practice this means a new focus and engagement with the African Diaspora tapping into their strong track record in economic development As this book shows however there remain deep differences over the meaning timing and sequencing of pan African integration Indeed different member states have different understandings of the role of the African Union itself This essential handbook from one of the leading research institutions on the continent seeks to uncover what some of those understandings are and why the unification project has remained so elusive

Democracy in Small States Jack Corbett,Wouter Veenendaal,2018-09-19 Populism and the personalization of politics appears to be threatening the existence of democracy as we know it all over the world It is now more important than ever to understand the history of this form of regime why it has thrives and fails But existing studies are limited by their focus on a few large and predominately rich states This book takes the opposite approach it investigates how politics is practiced in the smallest states where hyper personalization has always been a ubiquitous feature of political life It optimistically finds that hyper personalized democracy can actually persist against all odds but also cautions that political practices in small states are often markedly different to larger states Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford

The Oxford Handbook of International Law in Asia and the Pacific Simon Chesterman, Hisashi Owada, Ben Saul, 2019-09-12 The growing economic and political significance of Asia has exposed a tension in the modern international order Despite expanding power and influence Asian states have played a minimal role in creating the norms and institutions of international law today they are the least likely to be parties to international agreements or to be represented in international organizations That is changing There is widespread scholarly and practitioner interest in international law at present in the Asia Pacific region as well as developments in the practice of states The change has been driven by threats as well as opportunities Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia These evolutions join the long standing interest in parts of Asia notably South Asia in post colonial theory and the history of international law The Oxford Handbook of International Law in Asia and the Pacific brings together pre eminent and emerging specialists to analyse the approach to and influence of key states of the region as well as whether truly Asian trends can be identified and what this might mean for international order The Ashgate Research Companion to Migration Law, Theory and Policy Satvinder S.
