Fixing Health Budgets:

Fixing Health Budgets Friedrich Wilhelm Schwartz, Howard Glennerster, Richard B. Saltman, 1997-01-24 The notion of a fixed health budget seems self evident a public or private payer sets a time tied ceiling on expenditures Such a definition while correct is nonetheless far from sufficient In actual practice the key issues revolve around not only the what but also the who and the how of establishing and maintaining periodic health care expenditure ceilings The design and implementation of fixed budgets in health systems not to mention their success varies considerably between countries within countries and between health sub sectors *Fixing Health Budgets Experience from Europe and North America* reviews the impact of financial reform on the quality and delivery of health care in Austria Canada Germany the Netherlands Sweden the UK and the USA It outlines how far countries have moved to adopt fixed budgets and how management on a macro meso and micro level of the various systems is coping with the challenges and conflicts between the providers patients community and society Its message has relevance for health care providers public policy analysts and health economists worldwide as well as providers of health education and social services

Health Care and Cost Containment in the European Union Elias Mossialos, Julian Le Grand, 2019-05-20 First published in 1999 this volume aims to describe and analyse the experience of cost containment in Europe over the last fifteen years in order to understand that experience and to determine as best we can which methods were successful and which were not Part I provides an overview of healthcare in the European Union an overview of recent expenditure trends Part II complements the first examining in detail cost containment policies in each EU Member State The country based chapters refer to developments up to mid 1997

Getting Health Economics into Practice David Kernick, 2018-08-11 Fifty years ago medicine was straightforward Doctors had limited therapeutic options and patients did as they were told Today an array of medical interventions is putting increasing pressure on limited resources patients are questioning everything and doctors are uncertain of their role Health economists hoped to offer important insights to aid decision making but their technical frameworks bore little resemblance to the practical requirements of end users Now this book presents the concepts and insights that health economics has to offer in a way that is accessible to every healthcare decision maker *Getting Health Economics into Practice* is for all those who are involved in the planning commissioning and delivery of healthcare It illuminates the practical value that the concepts and principles of health economics can offer decision makers at all levels Comprehensive and extensive it is the first such book to be edited by a clinician rather than a health economist with contributions from an expert panel of specialists This approach ensures it is accessible and useful in the everyday work of health professionals It is relevant for all healthcare sectors in particular for Primary Care Trusts and is essential reading for managers researchers and especially practitioners

Implementing Change in Health Systems Michael I Harrison, 2004-03-27 *Implementing Change in Health Systems* brings fresh thinking and evidence to the continuing debate about market reforms of health care and other public services The book examines the

The relative performance of health authorities and general practitioners as commissioners of health care services is a crucial question in the current health care policy debate but hitherto a poorly researched area This work addresses that topic and represents a systematic direct comparison of GPs and health authorities as purchasers of health care services In doing this it centres upon two of the chief controversies about the NHS internal market the equality of hospital waiting times for fund holding patients and the fairness of the budgets received by fund holding practices for commissioning effective surgery In discussing the policy implications of the research the book then addresses what lessons should be learned from the internal market about equity and efficiency in the service now that the present Labour Government is reforming the NHS with the introduction of Primary Care Groups and Primary Care Trusts **Public Administration** Eran Vigoda-Gadot,2002-06-07

Sider,2012-03-23 The national deficit is certainly a crisis But alongside it a moral deficit is exploding as well Some want to unjustly thrust the burden of the debt on our grandchildren Others want to
