SdKfz 251 Half-Track 1939-45 Bruce Culver,2012-07-20 Following in the best traditions of German ingenuity in design and construction of armoured vehicles the SdKfz 251 firmly realised the concept of a competent cross country tactical vehicle for armoured infantry units So successful was this half track that not only did a modified version of it remain in use with Czech forces well into the 1980s but also ironically the armoured infantry tactics that the Germans pioneered with it were adopted by Allied forces in the Second World War and helped them to achieve the eventual defeat of Germany This book covers the genesis and development of the SdKfz 251 and details the numerous modifications and variations that sprang from combat experience

**Allied Intelligence Handbook to the German Army 1939-45** Stephen Bull,2017-04-06 What did the British or American soldier know about the German Army Was this knowledge accurate and just how did he know it There have been several handbooks of Second World War armies but they never tell us exactly what the Allied soldier knew at the time or how he was informed This is of importance because it influenced both conduct on the battlefield and the way in which the soldier thought about his enemy The book explains the background history of the organisations involved followed by short chapters based around a series of original documents This puts the original into context and also discusses whether the document that follows was correct in the picture it painted and what can be deduced about sources and the concerns of the intelligence officers who compiled the material Most of the documents were produced at the time by the British War Office or US War Department and cover different aspects of the German Army including tactics weapons and uniforms Subjects include Allied intelligence on the German Army from 1930 onwards British SIS MI6 and US Military Intelligence The organisations responsible how they worked and how they changed very rapidly with the coming of war The role of technology modern like the radio transmitter ancient as in scouring libraries and periodicals reports on military manoeuvres and parades Limitations of Ultra The German army itself from the tiny force left after Versailles to the rapid expansion in the late 1930s Innovation in tanks tactics machine guns rocket weaponry The problems of gathering intelligence not just danger but finance asking the right questions and the limitations of reporting and distribution
