## Kafka A Very Short Introduction:

**Kafka: A Very Short Introduction** Ritchie Robertson, 2004-10-28 Franz Kafka is one of the most intriguing writers of the 20th century In this text the author provides an up to date introduction to Kafka beginning with an examination of his life and then discussing some of the major themes that emerge in Kafka's work **Kafka** Ritchie Robertson, 2010 Originally published Oxford University Press 2004 as part of the Very short introduction series Kafka's Ethics of Interpretation Jennifer L. Geddes, 2016-04-30 Kafka's Ethics of Interpretation refutes the oft repeated claim made by Kafka's greatest interpreters including Walter Benjamin and Harold Bloom that Kafka sought to evade interpretation of his writings Jennifer L Geddes shows that this claim about Kafka's deliberate uninterpretability is not only wrong it also misconstrues a central concern of his work Kafka was not trying to avoid or prevent interpretation rather his works are centrally concerned with it Geddes explores the interpretation that takes place within and in response to Kafka's writings and pairs Kafka's works with readings of Sigmund Freud Pierre Bourdieu Tzvetan Todorov Emmanuel Levinas and others She argues that Kafka explores interpretation as a mode of power and violence but also as a mode of engagement with the world and others Kafka she argues challenges us to rethink the ways we read texts engage others and navigate the world through our interpretations of them **1922** Jean-Michel Rabaté, 2015-03-09 1922 Literature Culture Politics examines key aspects of culture and history in 1922 a year made famous by the publication of several modernist masterpieces such as T S Eliot's *The Waste Land* and James Joyce's *Ulysses* Individual chapters written by leading scholars offer new contexts for the year's significant works of art philosophy politics and literature 1922 also analyzes both the political and intellectual forces that shaped the cultural interactions of that privileged moment Although this volume takes post World War I Europe as its chief focus American artists and authors also receive thoughtful consideration In its multiplicity of views 1922 challenges misconceptions about the Lost Generation of cultural pilgrims who flocked to Paris and Berlin in the 1920s thus stressing the wider influence of that momentous year *Kafka's The Trial* Espen Hammer, 2018-03-23 Kafka's novel *The Trial* written from 1914 to 1915 and published in 1925 is a multi faceted notoriously difficult manifestation of European literary modernism and one of the most emblematic books of the 20th Century It tells the story of Josef K a man accused of a crime he has no recollection of committing and whose nature is never revealed to him The novel is often interpreted theologically as an expression of radical nihilism and a world abandoned by God It is also read as a parable of the cold inhumane rationality of modern bureaucratization Like many other novels of this turbulent period it offers a tragic quest narrative in which the hero searches for truth and clarity whether about himself or the anonymous system he is facing only to fall into greater and greater confusion This collection of nine new essays and an editor's introduction brings together Kafka experts intellectual historians literary scholars and philosophers in order to explore the novel's philosophical and theological significance Authors pursue the novel's central concerns of justice law resistance ethics alienation and subjectivity Few novels display human uncertainty

and skepticism in the face of rapid modernization or the metaphysical as it intersects with the most mundane aspects of everyday life more insistently than The Trial Ultimately the essays in this collection focus on how Kafka's text is in fact philosophical in the ways in which it achieves its literary aims Rather than considering ideas as externally related to the text the text is considered philosophical at the very level of literary form and technique

**Literature and Skepticism** Pablo Oyarzun, 2022-01-01 Literature and Skepticism links the skeptic attitude to the conditions of possibility in modern literature in particular the narrative form and the essay Pablo Oyarzun proposes that narrative and the essay document the relationship between literature and skepticism in different but complementary and at the same time complicit ways As the narrative performance reaches the structural limit of the literary understood as the domain of fiction a sort of para discursive reflection critically accompanies this performance discussing it ironizing it feigning to disbelieve it or overtly belying it Yet the narrative doubtfully takes distance from itself surrendering all right to a final truth at the very moment at which truth emerges essayistic to the surface The authors considered Montaigne Swift Lichtenberg Kleist Kafka and Borges are eminent representatives of one and the other form and all of the works analyzed are cases of a complex interplay between narrative and essay

From the Golem to Freedom Gábor L. Ambrus, 2024-02-08 With a particular focus on social media G bor L Ambrus explores how human beings relate to contemporary information technology Ambrus argues that religious traditions such as Judaism and Christianity as well as secular philosophical thought inspired by religion can be invoked to describe both the freedom and unfreedom of the user of information technology To illustrate how individuals relate to technology in a restricted and totalitarian online environment Ambrus adopts the figure and legend of the golem from Jewish mysticism At the same time his argument features other religious concepts and themes to describe an alternative to our present predicament of unfreedom while not seeking to portray any redemption outside the technological environment At the core of his argument Ambrus presents the experience of nothingness as a source of freedom opening up the possibility for a free relationship for us all with information technology

**Conflict and Contest in Nietzsche's Philosophy** Herman Siemens, James Pearson, 2018-11-15 While Nietzsche's works and ideas are relevant across the many branches of philosophy the themes of contest and conflict have been mostly

overlooked Conflict and Contest in Nietzsche's Philosophy redresses this situation arguing for the importance of these issues throughout Nietzsche's work. The volume has three key lines of inquiry: Nietzsche's ontology of conflict, Nietzsche's conception of the agon, and Nietzsche's warrior philosophy. Under these three umbrellas is a collection of insightful and provocative essays considering among other topics Nietzsche's understanding of resistance, his engagement with classical thinkers alongside his contemporaries including Jacob Burckhardt, his views on language, metaphor and aphorism, and war, revolt and terror. In bringing together such topics, Conflict and Contest in Nietzsche's Philosophy seeks to correct the one-sided tendencies within the existing literature to read simply hard and soft analyses of conflict. Written by scholars across the Anglophone and the European traditions, within and beyond philosophy, this collection emphasises the entire problematic of conflict in Nietzsche's thought and its relation to his philosophical and literary practice. *So Much Wasted* Patrick Anderson, 2010-10-25. An analysis of self-starvation as a significant mode of staging political arguments across the institutional domains of the clinic, the gallery and the prison. *Modern German Literature* Michael Minden, 2013-04-30. This accessible and fresh account of German writing since 1750 is a case study of literature as a cultural and spiritual resource in modern societies. Beginning with the emergence of German language literature on the international stage in the mid-eighteenth century, the book plays down conventional labels and periodisation of German literary history in favour of the explanatory force of international cultural impact. It explains for instance how specifically German and Austrian conditions shaped major contributions to European literary culture such as Romanticism and the language scepticism of the early twentieth century. From the First World War until reunification in 1990, Germany's defining experiences have been ones of catastrophe. The book provides a compelling overview of the different ways in which German literature responded to historical disaster. They are first Modernism, the Literature of Negation, second the literature of totalitarian regimes, Third Reich and German Democratic Republic, and third the various creative strategies and evasions of the capitalist democratic, multi-medial cultures of the Weimar and Federal Republics. The volume achieves a balance between textual analysis and cultural theory that gives it value as an introductory reference source and as an original study and as such will be essential reading for students and scholars alike. Resistance and Literature in a Global Context Prakash Chandra Pradhan, 2025-02-24. The comprehensive volume delves into the discursive valences and contingencies of resistance. It examines key issues and situations within the complex power dynamics of various cultures, societies, nations and ethnicities. It explores the varying meanings of resistance in different contexts with analyses of select literary texts from various works of literature worldwide that range from Tribal writings in English and Nepalese literature to British literature and American literature. It evaluates various factors including structure, situation, context, culture, agency, place, motives, ideology and oppression within the discourse of resistance. It emphasizes the cultural relevance of the study of resistance across a range of fields such as postcolonialism, feminism, ecocriticism, gender relations and sexuality, myth and folklore, existentialism, cultural

studies rural feminism trauma theory and violence globalization ethnicity and identity child trafficking and third gender issues subalternity and marginality The book covers the genres of novels poetry autobiography and short stories It investigates the potency of these literary forms as cultural expressions of resistance It is an essential read for students researchers and teachers worldwide who are enthusiastic and curious about the meanings and contexts of resistance and its representations in literature

Investigating Franz Kafka's "Der Bau" Andrea Ebarb, 2023-04-27 In 2016 the Israeli Supreme Court ruled that Max Brod's posthumous papers which included a collection of Kafka's manuscripts be transferred to the National Library of Israel in Jerusalem If Kafka's writings may be seen to belong to Jewish national culture and if they may be considered part of Israel's heritage then their analysis within a Jewish framework should be both viable and valuable This volume is dedicated to the research of Franz Kafka's late narrative *The Burrow* and its autobiographical and theological significance Research is extended to incorporate many fields of study architecture sound studies philosophy cultural studies Jewish studies literary studies to illustrate the dynamics at work within the text which reveal the Jewish aspects implicitly thematicized Examination of the structure created the nature of sound perceived the atmosphere experienced and the acts performed by the protagonist serve as the foundation of this analysis and offer new access to Kafka's work by presenting an interpretive space semantic approach *Der Bau* is presented as a life concept given the task of constituting identity highlighting the critical link between the literary and biographical Kafka and demonstrating the necessity of understanding the author as a Jewish writer to understand his late narrative For her outstanding research project Andrea Newsom Ebarb was awarded the Forschungsförderpreis der Vereinigung der Freunde der Universität Mainz e.V. in 2023

**Kafka's Cognitive Realism** Emily Troschianko, 2014-02-03 This book uses insights from the cognitive sciences to illuminate Kafka's poetics exemplifying a paradigm for literary studies in which cognitive scientific insights are brought to bear directly on literary texts The volume shows that the concept of cognitive realism can be a critically productive framework for exploring how textual evocations of cognition correspond to or diverge from cognitive realities and how this may affect real readers In particular it argues that Kafka's evocations of visual perception including narrative perspective and emotion can be understood as fundamentally enactive and that in this sense they are cognitively realistic These cognitively realistic qualities are likely to establish a compellingly direct connection with the reader's imagination but because they contradict folk psychological assumptions about how our minds work they may also leave the reader unsettled This is the first time a fully interdisciplinary research paradigm has been used to explore a single author's fictional works in depth opening up avenues for future research in cognitive literary science

**Beckett's Art of Salvage** Julie Bates, 2017-04-19 This innovative exploration of the recurring use of particular objects in Samuel Beckett's work is the first study of the material imagination of any single modern author Across five decades of aesthetic and formal experimentation in fiction drama poetry and film Beckett made substantial use of only fourteen objects well worn not only where they appear within his works but also in

terms of their recurrence throughout his creative corpus In this volume Bates offers a striking reappraisal of Beckett's writing with a focus on the changing functions and impact of this set of objects and charts chronologically and across media the pattern of Beckett's distinctive authorial procedure The volume's identification of the creative praxis that emerges as an art of salvage offers an integrated way of understanding Beckett's writing opens up new approaches to his work and offers a fresh assessment of his importance and relevance today

**The Preparation of the Novel** Roland Barthes, 2010-11-23

Completed just weeks before his death these lectures mark a critical juncture in the career of Roland Barthes declaring the intention deeply felt to compose a novel through an entirely untested method of writing Unfolding over the course of two years Barthes engaged in a unique pedagogical experiment he would combine teaching and writing to simulate the creation of a novel exploring every step of the collaborative process along the way Barthes's lectures move from the inception of an idea and the need to write something to the actual decision making planning and material act of producing a book He meets the difficulty of transitioning from short concise expressions exemplified by his favorite literary form haiku to longer uninterrupted flows of narrative and he encounters a number of trials and setbacks Barthes takes solace in a diverse group of writers including Dante whose own opus was similarly inspired by the death of a loved one He also turns to classical philosophy and Taoism and the works of Chateaubriand Flaubert Kafka and Proust This volume includes eight elliptical plans for Barthes's unwritten novel which he titled *Vita Nova* and notes that shed light on the critic's view of photography Along with Columbia University Press's *The Neutral* Lecture Course at the College de France 1977-1978 and a third forthcoming collection of Barthes lectures this volume completes a profound exploration into the labor and love of writing
