Living in the Environment George Tyler Miller, 2002 Living in the Environment G. Tyler Jr Miller, Tyler G. Miller (Jr), 2004-09 Miller's LIVING IN THE ENVIRONMENT 14th Edition is the most comprehensive and up to date environmental science text on the market. It has the most balanced approach to environmental science instruction with bias free comparative diagrams throughout and a focus on prevention of and solutions to environmental problems. Tyler Miller is the most successful author in academic writing on environmental science because of his attention to currency, trend setting presentation of content, ability to predict student and instructor needs for new and different supplements, and his ability to retain the hallmarks on which instructors have come to depend. The content in the 14th edition of LIVING IN THE ENVIRONMENT is everything you have come to expect and more. In this edition, the author has added the How Would You Vote feature which is an application of environmental science related topics in the news. Students apply their environmental science knowledge from the book to a Web activity which helps them investigate environmental science issues in a structured manner. They then cast their votes on the Web. Results are then tallied. Also found at the Miller website is the much used Updates on Line. Updated twice a year with articles from InfoTrac College Edition service, CNN Today Video Clips and Web links, instructors can seamlessly incorporate the most current news articles and research findings to support text presentations. This is a time saver for instructors and part time teachers who can quickly determine what ancillary materials they want to utilize in just minutes. As with the last edition, this text is packaged with a free Student CD ROM entitled Interactive Concepts in Environmental Science. Organized by chapter, the CD gives students links to relevant resources, narrated animations, interactive figures and prompts to review material and test themselves. **Living in the Environment** George Tyler Miller, 2004. This 13th edition is a science based book designed for introductory courses on environmental science. Miller has added an online Web based resource which is updated quarterly with articles from InfoTrac College Edition. The title also comes with a complementary CD ROM entitled Interactive Concepts in Environmental Science.

Stewards of Spirit Gianetta Ellis, 2007-05. Intriguingly crafted, this book takes you on a journey through time, self and nature that will leave you reeling in inspiration. A uniquely creative blend of spirituality, ecology and psychology, Stewards of Spirit walks you through a three step process to awaken to your authenticity. The process illustrated through an intuitively inspired case study of the life of a 19th century woman is based on the ecopsychological premise that humans' well being is inextricably linked to nature. We can therefore look to the planet as a model for the fulfillment of our own individual potential. At the heart of this experience are Rachel's Ballads. While ensconced in these freestyle lyrical writings, you will feel as though you are at a play where each new act builds upon the last, culminating in a shocking finale that carries you back to an historic event that shook the world and to this day still captures our hearts and imaginations. Throughout, Ellis seamlessly weaves the notions of spirituality and self development into the world of ecology, demonstrating that nature offers us a route to

awakening in direct contrast to our usual dichotomous approach that pits the spirit self against the ego or false self Whether you are seeking an experience that could change your approach to life or simply in the mood for an exceptional read this book will surely fulfill your expectations Mother artist and educator Gianetta Ellis is deeply passionate about the preservation of spirit and its role in the human relationship to Earth A life long student of religion she integrates theologic and spiritual notions regarding eco accountability and stewardship to her writing She is a Vermont Law School graduate with a successful environmental career spanning two decades In both the public and private sectors she has developed policy for and managed such diverse issues as habitat conservation pollution prevention hazardous waste abatement and watershed health She is the creator and owner of stewARTship studios where she incorporates art to stewardship by using various fine art forms as a means for students to build enduring connections to self and nature Whether teaching under graduates at the University of Pittsburgh or engaging school children in experiential nature study programs Gianetta is a dedicated professional who brings a uniquely creative and holistic approach to learning

Sociology Jean Stockard, 2000 SOCIOLOGY DISCOVERING SOCIETY 2nd provides comprehensive coverage of sociology in an affordable paperback format With research studies in every chapter and boxes that portray sociologists at work it will especially appeal to sociology professors who value a quantitative research methodology oriented approach Instead of presenting every possible theory for each issue Stockard's streamlined approach pulls in theories only when they appropriately relate to the issue at hand This integrated approach produces a text that reads more smoothly than the overly encyclopedic heavily interrupted narratives of other texts
