Reader John T Price, 2014-06-01 The tallgrass prairie of the early 1800s a beautiful and seemingly endless landscape of wildflowers and grasses is now a tiny remnant of its former expanse As a literary landscape with much of the American environmental imagination focused on a mainstream notion of more spectacular examples of wild beauty tallgrass is even more neglected Prairie author and advocate John T Price wondered what it would take to restore tallgrass prairie to its rightful place at the center of our collective identity The answer to that question is his Tallgrass Prairie Reader a first of its kind collection of literature from and about the tallgrass bioregion Focusing on autobiographical nonfiction in a wide variety of forms voices and approaches including adventure narrative spiritual reflection childhood memoir Native American perspectives literary natural history humor travel writing and reportage he honors the ecological diversity of tallgrass itself and provides a range of models for nature writers and students The chronological arrangement allows readers to experience tallgrass through the eyes and imaginations of forty two authors from the nineteenth to the twenty first centuries Writings by very early explorers are followed by works of nineteenth century authors that reflect the fear awe reverence and thrill of adventure rampant at the time After 1900 following the destruction of the majority of tallgrass much of the writing became nostalgic elegiac and mythic A new environmental consciousness asserted itself midcentury as personal responses to tallgrass were increasingly influenced by larger ecological perspectives Preservation and restoration informed by hard science emerged as major themes Early twenty first century writings demonstrate an awareness of tallgrass environmental history and the need for citizens including writers to remember and to help save our once magnificent prairies

Iowa Alumni Magazine ,2005 **Biophilic Cities** Timothy Beatley,2011 Tim Beatley has long been a leader in advocating for the greening of cities But too often he notes urban greening efforts focus on everything except nature emphasizing such elements as public transit renewable energy production and energy efficient building systems While these are important aspects of reimagining urban living they are not enough says Beatley We must remember that human beings have an innate need to connect with the natural world the biophilia hypothesis And any vision of a sustainable urban future must place its focus squarely on nature on the presence conservation and celebration of the actual green features and natural life forms A biophilic city is more than simply a biodiverse city says Beatley It is a place that learns from nature and emulates natural systems incorporates natural forms and images into its buildings and cityscapes and designs and plans in conjunction with nature A biophilic city cherishes the natural features that already exist but also works to restore and repair what has been lost or degraded In *Biophilic Cities* Beatley not only outlines the essential elements of a biophilic city but provides examples and stories about cities that have successfully integrated biophilic elements from the building to the regional level around the world From urban ecological networks and connected systems of urban greenspace to green rooftops and green walls and sidewalk gardens Beatley reviews the emerging practice of biophilic urban design and planning and tells many compelling stories of individuals and groups working hard to transform cities from grey and lifeless to green and biodiverse *Reinhabiting Reality* Freya Mathews,2012-02-01 In this sequel to *For Love of Matter* A Contemporary Panpsychism also published by SUNY Press Freya Mathews argues that replacing the materialist premise of modern civilization with a panpsychist one transforms the entire fabric of culture in profound ways She claims that the environmental crisis is a symptom of deeper issues facing modern civilization arising from the loss of the very meaning of culture To come to grips with this crisis requires a change in the metaphysical premise of modernity deeper than any as yet envisaged even by the radical ecology movement This is a change with profound implications for the full range of existential questions and not merely for questions regarding our relationship with nature **Embracing the Homestead** Barrett

Bankers Record ,1918 *Organizing Spirit* Jamie Pitts,2025-06-12 Contemporary theologians tend to associate the Holy Spirit with the formation of local communities social movements and fluid relational networks and not with institutions such as denominations or global church bodies In this work Jamie Pitts argues that this pneumatological sociological picture misses important aspects of the Spirit s work Pitts draws on a wide range of theological and theoretical resources to depict the Spirit as organizing the complex dynamic and relationally entangled structures that constitute creation Human organizing that seeks to participate in the Spirit can take a variety of analogous structural forms including formal organizations or institutions Organizational participation in the Spirit is not a function of an organization s scale mobility or relative informality but rather of its practical orientation toward the Spirit s goals of life solidarity healing and inclusive justice A series of case studies clarifies and extends the implications of the argument in connection to organizing for environmental gender sexual and racial justice In the final chapter Pitts addresses the role of a political theology of the organizing Spirit in imagining organizational alternatives to the global neoliberal order
