King,2012-01-01 Other than that it tastes delicious with butter what do you know about the knobbily armoured scarlet creature staring back at you from your fancy dinner plate From ocean to stock pot there are two sides to every animal

story For instance since there are species of lobsters without claws how exactly do you define a lobster And how did a pauper's food transform into a meal synonymous with a luxurious splurge To answer these questions on behalf of lobster the animal is Richard J King a former fishmonger and commercial lobsterman who has chronicled the creature's long natural history Part of the Animal series King's *Lobster* takes us on a journey through the history biology and culture of lobsters including the creature's economic and environmental status worldwide He describes the evolution of technologies to capture these creatures and addresses the ethics of boiling them alive Along the way King also explores the salacious lobster palaces of the 1920s the animal's thousand year status as an aphrodisiac and how the lobster has inspired numerous artists writers and thinkers including Aristotle Dickens Thoreau Dal and Woody Allen Whether you want to liberate lobsters from their supermarket tanks or crack open their claws this book is an essential read describing the human connection to the lobster from his ocean home to the dinner table **Good Housekeeping Magazine**, 1888 **Secret Worlds** Martin Stevens, 2021

Beyond our hearing rats and mice sing to woo females Beyond our sight bees see the ultraviolet markings of flowers Beyond our conception sea turtles sense latitude and longitude through an internal magnetic map and sharks experience the electric fields created by prey So many animals sense their environment in rich strange and often exquisitely refined ways including ways beyond the limits of our own senses that scientists have only relatively recently identified In this book Martin Stevens describes these astonishing worlds of experience hidden from us what drove their evolution how scientists learn about them and the puzzles that remain Book jacket **Good Housekeeping**, 1903 **The Last Lobster** Christopher White, 2018-06-05 For the past five years the lobster population along the coast of Maine has boomed resulting in a lobster harvest six times the size of the record catch from the 1980s This book follows three lobster captains as they haul and set thousands of traps Unexpectedly boom may turn to bust as the captains must fight a warming ocean volatile prices and rough weather to keep their livelihood afloat The three captains work longer hours trying to make up in volume what they lack in price As a result there are 3 million lobster traps on the bottom of the Gulf of Maine while Frank Jason and others call for a reduction of traps Maine lobstering towns are among the first American communities to confront global warming and the survival of the Maine Coast depends upon their efforts It may be an uphill battle to create a sustainable catch as high temperatures are already displacing lobsters northward toward Canadian waters out of reach of American fishermen

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
