Local And Regional Development Under The 1990s Transition In Eastern Europe:

Urban and Regional Planning and Development Rajiv R. Thakur, Ashok K. Dutt, Sudhir K. Thakur, George M. Pomeroy, 2020-02-10 This book discusses urban planning and regional development practices in the twentieth century and ways in which they are currently being transformed. It addresses questions such as: What are the factors affecting planning dynamics at local, regional, national and global scales? With the push to adopt a market paradigm in land development and infrastructure, the relationship between resource management, sustainable development and the role of governance has been transformed. Centralized planning is giving way to privatization not only in the traditional regions but also in newly emerging regions of Asia, Africa and Latin America. Further attempts are being made to bring planning related decision making closer to the people who are most affected by it. Presenting a collection of studies from scholars around the world and highlighting recent advances in the field, the book is a valuable reference guide for those engaged in urban transformations, whether as graduate students, researchers, practitioners or policymakers.

Borders in Post-Socialist Europe Tassilo Herrschel, 2016-04-08 Borders have attracted considerable attention in public and academic debates in light of the impact of globalisation and in Europe the end of the divisions of the Cold War era. Instead, being inside or outside of the EU has become a major paradigmatic divide between claimed spheres of influence by Brussels and Moscow respectively. In the aftermath of the end of communism, established certainties no longer seemed to apply. And this included many of the borders within the former eastern Bloc, with some losing their relevance while others reassert themselves. As its particular contribution, this book adopts a symbiotic approach to the analysis of borders, drawing on a political economy perspective while also recognising the importance of the socio-cultural dimension as found in border studies. This seeks to do greater justice to the complex composite nature of borders as geo-political, state legal and cultural historic constructs in both theory and practice. In addition, the book's approach stretches across spatial scales to capture the multi-level nature of borders. The first part of the book presents the conceptual framework as it sets out to embrace this multi-faceted, multi-layered nature of borders. In the second part, case studies from north-central Europe, including the Baltic Sea Region, exemplify the complexity of borders in the context of post-socialist transformation and continuing EUisation.

Regional Dynamics in Central and Eastern

Europe Francesco Palermo, Sara Parolari, 2013-01-30 This book presents a contemporary broad assessment of the main dilemmas of regional development and regional policy in Central and Eastern Europe considering the influence of internal and external pressures on the regionalization process in this area **EU Enlargement, Region Building and Shifting Borders of Inclusion and Exclusion** Professor James W. Scott, 2012-11-28 The 2004 entry of 10 Central and Eastern European countries along with Malta and Cyprus into the EU has caused a huge shift in the EU's external boundaries The socio economic and political transformations that this shift has caused not only suggest new regional development opportunities but also many potential problems and tensions While the EU insists that enlargement will not signify new divisions processes of inclusion and exclusion and the imposition of visa restrictions on non EU citizens could pose obstacles to co operation conjuring fears of an emerging fortress Europe that effectively divides the continent Illustrated with case studies from Central and Eastern European border areas this book examines capacities for region building across national borders in within the context of EU enlargement synthesizing the various insights provided by local information and suggesting ways forward for the future development of the EU's Wider Europe strategy **Local and Regional Development** Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andrés Rodríguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue For localities and regions the challenge of enhancing prosperity improving wellbeing and increasing living standards has become acute for localities and regions formerly considered discrete parts of the developed and developing worlds Amid concern over the definitions and sustainability of development a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories Local and Regional Development engages and addresses the key questions what are the principles and values that shape definitions and strategies of local and regional development What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development What are the main policy interventions and instruments How do localities and regions attempt to effect development in practice What kinds of local and regional development should we be pursuing This book addresses the fundamental issues of what kind of local and regional development and for whom frameworks of understanding and instruments and policies It outlines what a holistic progressive and sustainable local and regional development might constitute before reflecting on its limits and political renewal With the growing international importance of local and regional development this book is an essential student purchase illustrated throughout with maps figures and case studies from Asia Europe and Central and North America **The NEBI YEARBOOK 2001/2002** Lars Hedegaard, Bjarne Lindström, 2002-01-11 Thorvald Stoltenberg President of the Norwegian Red Cross Chairman of the Editorial Advisory Board Despite the very optimistic language on the imminence of new accessions to the European Union that came out of the June 2001 European Council in Gothenburg it will serve no good purpose to neglect the fact that EU membership for the Central and Eastern European applicants remains a difficult process Painful experience

makes it prudent to exercise caution in predicting developments with in the European Union Negotiations may drag out snags may appear and some thing may happen on the way to ratification So perhaps it is wise to take a broad er view of European integration and therefore integration within the North European Barents and Baltic Sea region that is the focus of this Yearbook EU membership for those countries that are able to satisfy the Copenhagen requirements and the chapters of the *acquis communautaire* that have subse quently been specified is certainly a prize worth fighting for But all is not lost if some of the applicants end up not joining the Union as a result of the current enlargement round Even more important than formal membership is the process of growing together that has taken place simultaneously with the membership negotiations We are dealing here with integration in the real world of trade investments division of labour politics environment hard and soft security people to people relations etc
