E-Government in Bangladesh Jannatul Ferdous, 2025-08-01 This book examines the background and impact of e-government in rural Bangladesh. Focusing on the Union Digital Centers (UDCs) established by the Union Parishad, this book analyzes how such centers influence rural communities. The UDCs were created to afford electronic access to a wide range of public and private services, thereby transforming the delivery of public services. This study examines easy access to services, reduced waiting time, and the elimination of bureaucratic barriers. Data based on interviews, case studies, and focus groups show the UDCs' effect on service delivery, efficiency, governance, and citizen satisfaction, and the challenges these sectors face. This book discusses how technology has eased municipal governance by removing middlemen and, in essence, making citizens and officials happier. It concludes with recommendations using a gender and stakeholder perspective approach and shows how governance and service delivery could be improved to enable a full examination of UDCs' social and economic impacts on rural communities. This book will be of interest to researchers in the fields of public administration, public policy, development studies, good governance, and leadership, and local government, especially in the context of South Asia.

Decentralization, Local Governance, and Localizing the Sustainable Development Goals in Asia and the Pacific Bruno Carrasco, Hanif A. The pursuit for better governance has assumed center stage in developmental discourse as well as reform initiatives of all organizations working for the public welfare and includes such issues as service delivery and responding to citizens' needs and demands. In the era of globalization, multilevel and new modes of governance are changing the traditional governance models of nation states, accelerated by technological innovation, rising citizen expectation, policy intervention from international and multilateral donor communities and the hegemony of western ideology imposed on many developing nations. However, a universally accepted and agreed upon definition of governance still remains elusive. There is no consensus or agreement as to what would be the nature and form of governance and public administration. The question that is raised is: Is there a universal governance mechanism that fits in all contexts or governance mechanisms should be based on home grown ideas? One can see various programs and policies of reforms and reorganizations in public administration in the developing countries, but these efforts have not been effective to address the challenging issues of economic development, employment generation, poverty reduction, ensuring equality of access to public services, maintaining fairness and equity, security and safety of citizens, social cohesion, democratic institution building, ensuring broader participation in the decision making process and improving the quality of life. Therefore, there is a widespread concern for better governance or sound governance to bridge the gap between theory and practice, making this book of interest to academics as well as policy makers in global public administration.
