## **Five California Architects:**

*Five California Architects* Esther McCoy, 1975 This classic study of Bernard Maybeck Irving Gill Charles and Henry Greene and R M Schindler was first published by Reinhold then by Praeger and then by Henry Holt before being allowed to go out to print The demand for this book has been so great that we have reprinted it It has been acclaimed by many prominent architects and architectural historians who consider it to be an indispensable volume on 20th century American architecture *Five California Architects* Esther MacCoy, 1960 *Five California Architects* Esther McCoy, 2003-01-01 This classic study of Bernard Maybeck Irving Gill Charles and Henry Greene and R M Schindler was first published by Reinhold then by Praeger and then by Henry Holt before being allowed to go out to print The demand for this book has been so great that we have reprinted it It has been acclaimed by many prominent architects and architectural historians who consider it to be an indispensable volume on 20th century American architecture *Five California Architects* Esther McCoy, 1969

**Five California Architects. (Bernard Maybeck.-Irving Gill.-Charles and Henry Greene.-R.M. Schindler.) [With Illustrations, Including Portraits.]** Esther MACCOY, 1960 *One California Architect, Irving J. Gill* James B Guthrie, Esther McCoy, 2022-07-05 One California Architect Irving J Gill is an update and republication of Esther McCoy's groundbreaking chapter on Gill in her seminal 1960 work *Five California Architects* It gives a comprehensive look at Gill's life from his youth in Syracuse New York to his apprenticeship in Chicago with Adler Sullivan his move to San Diego in 1893 and the evolution of his work into what we now call Modern Architecture McCoy's book was the first to document the progressive architectural movement that emerged in California at the turn of the last century Her writing on Irving J Gill was especially important as it opened the world's eyes to the first Modern Architecture as created by Gill in San Diego and Los Angeles Her work on Gill is being republished in this enhanced edition by the Irving J Gill Foundation in this the 150th year since Gill's birth This new edition also celebrates the 60th anniversary of *Five California Architects* and includes enhanced images and updated information not available to McCoy All profits go to the Irving J Gill Foundation *Five Californian architects (Bernard Maybeck, Irving Gill, Greene and Greene and Rudolph L. Mankinson)*. E. McCoy, 1975 **Made in California** Stephanie Barron, Sheri Bernstein, Ilene Susan Fort, 2000 *Made in California* is divided into five twenty year sections each including a narrative essay discussing the history of that era and highlighting topics relevant to its visual culture **BOOK JACKET** **Contemporary Architects** Muriel Emanuel, 2016-01-23 **On the Edge of America** Paul J. Karlstrom, 1996-01-01 The past quarter century has witnessed the emergence of a scholarly appreciation of American art in California Yet assessments of the early modern pre 1950 have been haphazard Now in one bold volume these scholars have remedied that deficiency Thanks to the rich essays of this wonderful book the art history of California and the nation is graced with further light Dr Kevin Starr State Librarian of California The authors of these essays illuminate a diverse and compelling history one in which what happened at the geographic edges sheds new light on the European points of origin A

lively and valuable contribution not just to regional history but to the making and transmission of modernism Whitney Chadwick Professor of Art History San Francisco State University A welcome and overdue evaluation of the distinctive history of modernism in California these essays sensitively explore a cultural terrain at once familiar and strange surveying memorable achievements from painting to photography to architecture and film The authors provocatively suggest the centrality of edges wherever they are found to the national tale and demonstrate it through significant developments on our western margin A must for any serious student of American art and culture Charles C Eldredge The University of Kansas An engrossing examination of modernist practices in California before the Abstract Expressionists and beatniks came to town It includes art scenes peopled by Mexican muralists European artists in exile third generation Californians idealist photographers and immigrant artisans Wanda Corn Professor of Art History Stanford University These fascinating essays do much more than fill a major gap in our understanding of American regionalism Their scope is superb because of the inclusive range of their definition of art the varied ethnicities of the artists discussed and the distinctive impact of environment light and culture on California art A dazzling treasure as pleasing to the eye as it is to the mind Michael Kammen Professor of History Cornell University

*J. R. Davidson* Lilian Pfaff, 2019-09-02 Julius Ralph Davidson is widely known as the architect of Thomas Mann's house Born 1889 in Berlin Davidson left Germany in 1923 and emigrated to the USA In Los Angeles he designed some 150 projects among them three houses for the experimental Case Study House Program This long overdue publication is a comprehensive documentation of Davidson's life and work highlighting J R's contribution to modernism in California in the 1930s and 1940s

*Culture in the American Southwest* Keith L. Bryant, 2014-09-01 If the Southwest is known for its distinctive regional culture it is not only the indigenous influences that make it so As Anglo Americans moved into the territories of the greater Southwest they brought with them a desire to reestablish the highest culture of their former homes opera painting sculpture architecture and literature But their inherited culture was altered challenged and reshaped by Native American and Hispanic peoples and a new vibrant cultural life resulted From Houston to Los Angeles from Tulsa to Tucson Keith L Bryant traces the development of high culture in the Southwest Humans create culture but in the Southwest Bryant argues the land itself has also influenced that creation Incredible light natural grandeur and a geography at once beautiful and yet brutal molded societies that sprang from unique cultural sources The peoples of the American Southwest share a regional consciousness an experience of place that has helped to create a unified but not homogenized Southwestern culture Bryant also examines a paradox of Southwestern cultural life Southwesterners take pride in their cultural distinctiveness yet they struggled to win recognition for their achievements in high culture A dynamic tension between those seeking to re create a Western European culture and those desiring one based on regional themes and resources continues to stimulate creativity Decade by decade and city by city Bryant charts the growth of cultural institutions and patronage as he describes the contributions of artists and performers and of the elites who support them Bryant focuses

on the significant role women played as leaders in the formation of cultural institutions and as writers artists and musicians The text is enhanced by more than fifty photographs depicting the interplay between the people and the land and the culture that has resulted *Forgotten Modern* Alan Hess,2007 *Forgotten Modern* reveals the work of the innovative architects building in California from the 1930s to the 1970s With groundbreaking and illuminating examples that will alter the way we think of California architecture Hess and Weintraub focus on those that exemplify early mid entury modern variations on minimalism and organic architecture Though architects historians and the public alike have overlooked many of these superb architects from California s past century this book intends to bring them back to our attention All the architects included here are important in helping to show the breadth of design that styles like Organic were more widely represented than we have previously realized and that the fertile soil of California design fostered a wide spectrum of remarkable ideas even if not all developed a significant school of followers Chapters Include A New Introduction to Midcentury California Searching For Midcentury Modern Variations on Wood and Steel Modernism Organic Architecture History Plus Modernism Prayers in Stone Paul Eli Ivey,1999 The classical revival style of architecture made famous by the 1893 World s Columbian Exposition in Chicago left its mark on one of the most sustained classical building movements in American architectural history the Christian Science church building movement By 1920 every major American city and many smaller towns contained an example of this architecture financed by the followers of Mary Baker Eddy the church s founder These buildings represented a new burgeoning American institution that appealed to business people and to young men and women working to succeed Characterized by middle class congregations that in the early part of the century were over 75 percent women Christian Science suggested radical civic reform solutions based on an idealistic and pragmatic individualism It attracted criticism from traditional churches and from the medical establishment due to its rapid growth and to its reinstatement of primitive Christianity s lost elements of physical healing and moral regeneration *Prayers in Stone* spins out the close connections between Christian Science church architecture and its social context This architecture served as a focal point for debates over the possibilities for a new twentieth century urban architecture that proponents believed would positively shape the behavior of citizens Thus these buildings played a critical role in discussions concerning religious and secular architecture as major elements of religious and social reform Drawing on a wide range of documentary evidence including material from the archives of the Mother Church in Boston Paul Ivey uses Christian Science architecture to explore the social implications of architectural styles and new building technologies to illuminate class based notions of civic reform and beautification and to investigate the use of architecture to bring about religious and social change In addition the book explores complex gender issues including early attempts to define a professional space for women as Christian Science practitioners Lavishly illustrated *Prayers in Stone* focuses on four major city arenas of Christian Science building Boston Chicago New York and the San Francisco Bay area to demonstrate the vital intersection of architecture and religion at the so called margins of
