Form and History in American Literary Naturalism June Howard, 2017-03-01 Examining the novels of Frank Norris Theodore Dreiser Jack London and other writers June Howard presents a study of American literary naturalism as a genre Naturalism she states is a way of imagining the world and the relation of the self to the world a way of making sense and making narrative out of the comforts and discomforts of its historical moment Howard believes that naturalism accommodates the sense of perilousness uncertainty and disorder that many Americans felt in the late nineteenth and early twentieth centuries She argues for a redefinition of the form which allows it to be seen as an immanent ideology responding to a specific historical situation Working both from accepted definitions of naturalism and from close analysis of the literary texts themselves Howard constructs a new description of the genre in terms of its thematic antinomies patterns of characterization and narrative strategies She defines a range of historical and cultural reference for the ideas and images of American naturalism and suggests that the form has affinities with such contemporary ideologies as political progressivism and criminal anthropology In the process she demonstrates that genre criticism and historical analysis can be combined to create a powerful method for writing literary

history Throughout Howard's study the concept of genre is used not as a prescriptive straitjacket but as a category allowing the perception of significant similarities and differences among literary works and the coordination of textual analysis with the history of literary and social forces For Howard naturalism is a dynamic solution to the problem of generating narrative from the particular historical and cultural materials available to the authors Originally published in 1985 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value Writers Directory NA NA,2016-03-05

The Yellow Peril William F. Wu, 2022-06-02 This study examines the way Americans of Chinese descent were portrayed in American literature between 1850 and 1940 Their depictions are compared to historical events that were occurring at the time the works of literature were published This edition has additions and corrections compared to the original hardback edition published in 1982 Excerpt My purpose in writing this work has been to explore the depiction of Chinese immigrants and their descendants in American fiction from the mid nineteenth century entry of the first Chinese immigrants in significant numbers to the eve of World War II I consider both the immigrant Chinese and the American born generations that followed them to be Chinese Americans but will sometimes identify the groups separately in recognition of the fact that the historical experience and treatment of the immigrants in fiction has been different from that of their descendants The fiction treated in this study includes short stories and novels both by white Americans and Asian Americans I am defining the term Yellow Peril as the threat to the United States that some white American authors believed was posed by the people of East Asia As a literary theme the fear of this threat focuses on specific issues including possible military invasion from Asia perceived competition to the white labor force from Asian workers the alleged moral degeneracy of Asian people and the potential genetic mixing of Anglo Saxons with Asians who were considered a biologically inferior race by some intellectuals of the nineteenth century The Chinese immigrants were the first target of this attention since they were the first Asian immigrants to reach the United States in large numbers This study will focus on American fiction about Chinese Americans in an attempt to analyze the growth and development of attitudes about them My thesis is that the Yellow Peril is the overwhelmingly dominant theme in American fiction about Chinese Americans in the years with which this study is concerned It is expressed through the variety of images of the Chinese Americans that appear especially in their relation to and their role as part of the United States The historical causes and literary subject matter change but the theme neither disappears nor abates Each work of fiction has been studied individually for the images it contains Prior to the turn of the century the Yellow Peril is perceived only as stemming from the Chinese In the twentieth century especially in the pulps the Japanese joined the Chinese as a perceived menace to Europe and North America The overall process of evaluation relies primarily on detailed analyses of the characters under consideration This has been done with an awareness that the American public as a whole sometimes did not distinguish carefully among Asian ethnic groups so that events involving one Asian ethnic group often affected the image of another Some works are obscure and these have been quoted at greater length than more available ones Relatively few critical sources have been cited this is due to a dearth of relevant studies The less important works of fiction have naturally received little critical attention and often when such attention was concerned with pertinent stories the authors had little or nothing to say about the depiction of Chinese Americans This observation is

intended only as an explanation and not as a value judgement of earlier scholarship with different goals

Albert Shaw of the Review of Reviews Lloyd J. Graybar, 2021-11-21 The life of Albert Shaw 1857-1947 reflected in microcosm the changes that American society was undergoing through a critical period This first full length study focuses on two themes Shaw's career as editor and publisher of the Review of Reviews an influential monthly journal in the early years of the twentieth century and Shaw's career as a public figure Shaw was a member of the Progressive movement from its inception but his concern and interests were wide ranging centering to a large degree on the question of what the industrialization of America meant Lloyd J Graybar shows incisively the ways in which Shaw's professional concerns interacted with his attitude toward public issues
