Flash The Hunt For The Biggest Explosions In The Universe:

Flash! Govert Schilling, 2002-04-18 The origin and nature of gamma ray bursts is currently one of the greatest mysteries in astrophysics These tremendously powerful blasts produce more energy in a fraction of a second than our Sun does in ten billion years Since their accidental discovery by American spy satellites over thirty years ago astronomers have striven to understand these enigmatic explosions It is only recently thanks to an Italian Dutch satellite and powerful telescopes both on the ground and in space that the mystery is beginning to be unravelled Astronomers now realise that gamma ray bursts are probably related to the birth of black holes in extremely distant galaxies Flash describes the fast moving field of gamma ray burst research from the initial detection right up to the most recent discoveries Based on interviews with leading scientists this exciting book provides an inside view of the scientific challenges involved in unravelling the mystery of gamma ray bursts

Accessory to War: The Unspoken Alliance Between Astrophysics and the Military Neil deGrasse Tyson, Avis Lang, 2018-09-11 Extraordinary A feast of history an expert tour through thousands of years of war and conquest Jennifer Carson New York Times Book Review In this far reaching foray into the millennia long relationship between science and military power acclaimed astrophysicist Neil deGrasse Tyson and co author Avis Lang examine how the methods and tools of astrophysics have been enlisted in the service of war Spanning early celestial navigation to satellite enabled warfare Accessory to War is a richly researched and provocative examination of the intersection of science technology industry and power that will introduce Tyson's millions of fans to yet another dimension of how the universe has shaped our lives and our world

Tweeting the Universe Govert Schilling, Marcus Chown, 2011-11-01 In 140 pages two masterly popularisers present 140 explanations of the biggest questions in physics in the form of 10 or so tweets per page They set themselves the challenge of boiling down what is essential on each subject into sentences of 140 characters and the results are both entertaining and brilliantly informative Not a word is wasted The reader is not patronized and learns something on every page If only all science writing could be so precise and so economical Only science writers of a very high calibre could achieve such compression Marcus Chown the finest cosmology writer of our day Matt Ridley has known the Dutch writer Govert Schilling for twenty years Schilling pioneered this very swift form of explanation in a Dutch newspaper and suggested to Chown that they collaborate on bringing it to a wider audience Tweeting the Universe is unlike any other science book

The Cosmos Jay M. Pasachoff, Alex Filippenko, 2019-07-11 Explains the fundamentals of astronomy together with the hottest current topics in this field such as exoplanets and gravitational waves

The Mysterious Universe Ellen Jackson, 2008 The universe is rapidly expanding Of that much scientists are certain But how fast And with what implications regarding the fate of the universe Ellen Jackson and Nic Bishop follow Dr Alex Filippenko and his High Z Supernova Search Team to Mauna Kea volcano in Hawaii where they will study space phenomena and look for supernovae dying stars that explode with the power of billions of hydrogen bombs Dr Filippenko looks for black holes areas in space with such a strong

gravitational pull that no matter or energy can escape from them with his robotic telescope And they study the effects of dark energy the mysterious force that scientists believe is pushing the universe apart causing its constant and accelerating expansion

Einstein's Monsters: The Life and Times of Black Holes Chris Impey, 2018-11-13 A skillfully told history of the quest to find black holes Manjit Kumar Financial Times Black holes are the best known and least understood objects in the universe In Einstein's Monsters distinguished astronomer Chris Impey takes readers on a vivid tour of these enigmatic giants He weaves a fascinating tale out of the fiendishly complex math of black holes and the colorful history of their discovery Impey blends this history with a poignant account of the phenomena scientists have witnessed while observing black holes stars swarming like bees around the center of our galaxy black holes performing gravitational waltzes with visible stars the cymbal clash of two black holes colliding releasing ripples in space time Clear compelling and profound Einstein's Monsters reveals how our comprehension of black holes is intrinsically linked to how we make sense of the universe and our place within it

Cosmic Explosions J.M. Marcaide, Kurt Weiler, 2005-11-21 Supernovae are among the most energetic phenomena in the Universe and related to almost all aspects of modern astrophysics including starburst galaxies cosmic ray acceleration neutron star and black hole formation nucleosynthesis and ISM chemical enrichment energy input to the ISM cosmic distance scale determination dark energy related cosmological acceleration gamma ray bursts extra solar system neutrino burst detection gravity wave generation and many more Additionally the past 15 years have been particularly productive with many new results and new understanding due in particular to the closest SN in 400 years in SN 1987A in the Large Magellanic Cloud and the unusually bright and close SN 1993J and SN 1994I in the nearby galaxies M81 and M51 respectively In addition the discovery of the ray burst GRB 980425 and its related supernova SN 1998bw and the confirmation of GRB 030329 SN 2003dh tied the study of SNe and GRBs inextricably together With the many developments since the last major supernova meeting in La Serena Chile in 1997 we felt that it was an appropriate time to bring together experts and students interested in the subject for a meeting where SN and GRB properties and interrelationships could be discussed The tenth anniversary of SN 1993J provided such an opportunity and appropriately the meeting was held in Spain where SN 1993J was discovered on the early morning of 28 March 1993 by a Spanish amateur astronomer Francisco Garcia

Gravity's Fatal Attraction Mitchell Begelman, Martin Rees, 2021 This lavishly illustrated text by two leading experts presents all the current evidence for black holes and their cosmic context

A History of Technoscience David F. Channell, 2017-06-14 Are science and technology independent of one another Is technology dependent upon science and if so how is it dependent Is science dependent upon technology and if so how is it dependent Or are science and technology becoming so interdependent that the line dividing them has become totally erased This book charts the history of technoscience from the late nineteenth century to the end of the twentieth century and shows how the military industrial academic complex and big science combined to create new examples of technoscience in such areas as the nuclear arms race the space race the digital

age and the new worlds of nanotechnology and biotechnology Evolving Cosmos Govert Schilling, 2004-11-18 Mankind is a child of the cosmos The atoms in our bodies originate in the interiors of other stars and we cannot regard our existence separately from the evolution of the universe Without the Big Bang and the formation of galaxies planets and organic molecules we simply would not have happened In this fascinating book science journalist Govert Schilling takes the reader on a whirlwind journey through time He describes the evolution of the cosmos from the beginning of space and time fourteen billion years ago to the creation of the Earth and mankind The book ends with a glance into the distant future of the universe because the here and now are only fleeting moments in its biography A combination of compelling text and breathtaking photographs provide an impressive vision of the place of man in the cosmos **Space Exploration and Humanity**
