Leadership in

Interprofessional Health Education and Practice Charlotte Brasic Royeen, Gail M. Jensen, Robin Ann Harvan, 2008-10-30

The changing landscape of health care continues to grow more diverse As young health professionals move into clinical practice and face challenging health demands and increasing health care costs they must be prepared to work in interprofessional teams despite a lack of experience in team based skills Interprofessional Healthcare Education and Practice for Rural and Underserved Populations represents a collective response to this problem from educators clinicians and community health leaders to create a resource for interprofessional education and practice Divided into five sections this book includes the necessary information to encourage dialogue debate and action in interprofessional education needed to meet the health care needs for the present and the future

Business Ethics Education and the Pragmatic Pursuit of the Good Francis J. Schweigert, 2016-08-12 This book is an extended argument for the critical importance which justice and ethical leadership should have in business ethics education The book examines the history of ideas and purposes in education the contemporary role of business schools and the social foundations of moral education to conclude that the pragmatic pursuit of the good must be a central aim of business strategy To meet the challenges of facing society today the masters of business must be moral craftsmen in a just and democratic private property economy that serves the common good The author grounds this vision for business leadership in the centrality of systems of exchange in human society in generating prosperity and providing for the general welfare Business ethics education has focused primarily on moral formation of individual leaders and managers in the context of ethical codes organizational culture and legal compliance Important as this approach is it fails to generate a sufficient level of business responsibility to satisfy legitimate social concerns regarding the use of natural resources environmental sustainability reasonable limitation of systemic risk in capital markets and fair allocation of goods and services If the social purpose of business is not intentionally embraced and diligently pursued the economy may enrich a few but impoverish the society its resources and its democracy Hence this book argues for a new vision of business ethics that is grounded in public accountability of business operations and outcomes for the common good as a matter of justice

Social Justice Theory and

Practice for Social Work Lynelle Watts, David Hodgson, 2019-01-01 This book offers a much needed critical overview of the concept of social justice and its application in professional social work practice Social justice has a rich conceptual genealogy in critical theory and political philosophy For students teachers and social workers concerned with empowerment social change and human rights this book provides a guide to the key ideas and thinkers crucial historical developments and contemporary debates about social justice It synthesises interdisciplinary knowledge and offers a new framework for practice

including a clear and practical exposition of four domains of skills and knowledge important for social justice informed social work The book also contributes to social work pedagogy by offering a comprehensive set of learning outcomes that can be used to design curriculum teaching and learning and further research into social justice praxis This book provides a range of philosophical and critical perspectives to support and inform social work professional knowledge and skills In its tight knitting together of theory and practice this book links philosophical and moral principles with an understanding of how to engage with social justice in a way that is relevant to social work *Teaching for Social Justice and Sustainable*

Development Across the Primary Curriculum Anne Marie Kavanagh, Fionnuala Waldron, Benjamin Mallon, 2021-03-21 This volume supports educators in integrating meaningful education for social justice and sustainability across a wide range of curricular subjects by drawing on educational theory innovative pedagogical approaches and creative ideas for teaching and learning Both practical and theoretical in its approach it addresses subject areas ranging from mathematics to visual arts to language teaching Chapters provide subject entry points for teachers seeking to embed social justice and sustainability principles and pedagogies into their work Transferable across various areas of learning a range of pedagogical approaches are exemplified ranging from inquiry approaches to ethical dilemmas to critical relational pedagogies Ready to use teaching exemplars activities and resources address issues which are of interest and relevance to children s lives including gender stereotyping racism heterosexism climate change and species extinction Practical guidance is provided on how to engage children in dialogue and reflection on these complex issues in a safe and ethical way This accessible and unique volume is essential reading for student teachers teachers educational leaders teacher educators and anyone interested in inspiring children to work towards creating a more socially just and sustainable world *Vocational and Professional Capability*

Gerard Lum, 2011-11-03 The central claim of this fascinating monograph is that strategies for vocational and professional education adopted by the UK over the last two decades are founded upon a number of fundamental and fatal errors The essential problem is that these strategies derive from a number of philosophical confusions about what it is to be skilled competent or capable The aim of the book is to unravel the philosophical assumptions at the heart of current strategies examine their shortcomings and propose a more coherent account of vocational and professional capability It will be argued that not only does this have serious practical implications for the vocational curriculum teaching learning and assessment but that it indicates the need for an urgent and radical reassessment of the relationship between vocational general and academic education *Developing Successful Leadership* Brent Davies, Mark Brundrett, 2010-07-20 Research has shown

that school leadership is second only to classroom teaching in its effect on pupil learning As the demands on management teams become ever more complex this volume offers a fresh and expansive view on the challenges to be met in developing a leadership career With contributions from some of the most accomplished commentators on school leadership and management from around the world this book moves away from the simple how to of becoming a principal focusing instead

on the wider issues of becoming a successful leader The central aim has been to assemble powerful statements from international authorities that encapsulate leading edge thinking on a group of interconnected themes based on the notion of developing successful leadership in and beyond schools In so doing the text examines strategies for existing leaders developing their full capacity as well as enhancing the skills of those new to or aspiring to a leadership role The chapters contributed by a carefully selected group of leading educationalists present insights on a number of central themes including developing new skill sets in leadership the ethical and moral dimensions of leading an organisation Leadership for instructional and pedagogical success developing leadership capacity and capability through strategic activity Rather than taking a technical approach of how to undertake the managerial or administrative tasks the authors seek instead to develop critical leadership perspectives and skills with chapters on vitally important topics such as strategies for maximizing the potential of the leadership team as a whole They draw not only upon the literature in the field of educational leadership but also a wider literature in the field of business and management This diversity of perspective ensures this book s appeal to a broad international readership

Centering Educational Administration Robert J. Starratt,2003-04-02 In this book Starratt enters the national conversation among educational administration scholars and practitioners about what constitutes the core of their knowledge and practice In Part I he develops three main themes cultivating meaning community and moral responsibility which he then positions against national themes about the core of educational administration school improvement democratic community and social justice Rather than focusing on the routine managerial tasks normally associated with school administration budgeting personnel and legal problems time and resource management etc this text asks aspiring school leaders to reflect first on the underlying philosophical and sociological perspectives that constitute the substance of administrative work in education *Centering Educational Administration* provides A Unique Perspective on Leadership The author views leadership as organically related to teaching and learning as concerned with internal capacity building in response to state imposed accountability pressures and as an existential process of writing one s autobiography through their day to day work *An Interdisciplinary View of Educational Administration* *Centering Educational Administration* asks educational administrators to bring contemporary philosophical ethical and anthropological issues as well as learning theory social theory and political theory into their thinking about the daily operation of the school A Unique Perspective on School Improvement This text asserts that school improvement narrowly defined as improving results on high stakes tests can likewise place the nation at risk An equally important agenda is teaching the young the basic satisfactions norms and potential of using their knowledge in the service of the community and of a wider humanity *Exercises in Reflective Practice* This book challenges the reader to use the ideas of each chapter to analyze the current practices in their school and to propose concrete changes to improve the teaching and learning environment of their school

The Dismantling of Moral Education Perry L. Glanzer,2022-02-20 American educators have

consistently splintered our humanity into pieces throughout higher education's history. Although key leaders of America's colonial colleges shared a common functional understanding of humans as made in God's image with a robust but vulnerable moral conscience, latter moral philosophers did not build upon that foundation. Instead, they turned to shards of our identity to help students find their moral bearings. They sought to create ladies and gentlemen, honorable students and finally good professionals. As a result, fragmentation ensued as university leaders pitted these identity fragments against each other, inciting a war of attrition. As the war of identities raged, its effects spilled out beyond the bounds of the curriculum into the co-curricular dimension that struggled with moving beyond being *en loco parentis*. The major identity they cultivated was that of being a political citizen. Thus, the major identity and story of students' lives became the American political story of democracy, what I call Meta Democracy. In higher education guided by Meta Democracy, students lose their autonomy to administrators who reduce the student identities they try to develop along with the range of virtues that comprise the good life.

The Dismantling of Moral Education: How Higher Education Reduced the Human Identity explains why and how we arrived at diminishing ourselves. Handbook of Research on the Education of School Leaders, **New Directions for Law in Australia** Ron Levy, Molly O'Brien, Simon Rice, Pauline Ridge, Margaret Thornton, 2017-09-22. For reasons of effectiveness, efficiency and equity, Australian law reform should be planned carefully. Academics can and should take the lead in this process. This book collects over 50 discrete law reform recommendations encapsulated in short, digestible essays written by leading Australian scholars. It emerges from a major conference held at The Australian National University in 2016 which featured intensive discussion among participants from government practice and the academy. The book is intended to serve as a national focal point for Australian legal innovation. It is divided into six main parts: commercial and corporate law, criminal law and evidence, environmental law, private law, public law and legal practice, and legal education. In addition, Indigenous perspectives on law reform are embedded throughout each part. This collective work, the first of its kind, will be of value to policy makers, media, law reform agencies, academics, practitioners, and the judiciary. It provides a bird's eye view of the current state and the future of law reform in Australia. Education, Research and Perspectives, 1987.

International Handbook of the Religious, Moral and Spiritual Dimensions in Education Marian de Souza, Gloria Durka, Kathleen Engbretson, Robert Jackson, Andrew McGrady, 2007-06-04. In today's pluralistic world, many cultures feel a shift in the relationship of people with religious traditions. A corresponding movement is a resurgence of interest in human spirituality. This Handbook presents the views of education scholars who engage these concepts every day in a collection of essays reflecting the international state of the discipline. Out of these rises a vision for the emergence of a just and peaceful world.
