the Reagan Revolution series recounts the president's successful defeat of the Soviet drive for global hegemony for strategic weapons superiority political domination of the Eurasian landmass and decisive leverage over world oil In volumes I and II of this study I analyzed the president's decisions to jettison the failed strategy of detente and seek victory in the Cold War In broadening the nation's economic base to sustain a more powerful military capability he confronted the Soviet military challenge Simultaneously he worked to rebuild the Western Alliance which had disintegrated during the detente years In this volume I show how Reagan foiled the Soviet drive for strategic weapons superiority with a complex high technology weapons buildup and a surprise shift to strategic defense inaugurating a fundamental change in the national security equation He neutralized the Soviet attempt to dominate the Eurasian landmass with the SS 20 missile by deploying the Pershing II cruise missile package to Western Europe And he blocked the Soviet drive to shift Iran into its orbit thereby preserving the secure flow of oil to the west and opening the door to an improvement of relations with Iran Recognizing that the Soviet Union was overextended fueling revolutionary movements on four continents and deeply mired in Afghanistan the president raised the costs of competition for the Soviet economy already laboring under the heavy burden large scale military expenditures He worked for reduced energy prices reducing Soviet hard currency earnings while at the same time blocking the transfer of high technology upon which the Soviet Union depended to remain competitive with the United States By the middle of 1984 the Soviet leadership concluded that its strategy had failed and would have to be changed
