Kansas City, Missouri Carrie Westlake Whitney,1908 **History Lover's Guide to Kansas City, A** Paul Kirkman,2020 Series title taken from publisher website **The History of Kansas City** William H. Miller,1881 **The Story of Kansas City** Emma Serl,1924 **K.C.** Andrew Theodore Brown,Lyle W. Dorsett,1978 An interpretive history covering the early 1800s to present that details the success story behind Kansas City s exciting growth *The Kansas City Story for Kids* Monroe Dodd,2000 Relive the history of Kansas City as you travel in time back to the days of the fur trappers the riverboat captains the cowpunchers and the railroad workers Brief stories and photographs bring context and meaning to the history of Kansas City *The Story of Kansas City* Kate L. Kansas City, Missouri Carrie Westlake Whitney,1908 **Kansas City Then and Now II** Monroe Dodd,2003 **A City Divided** Sherry Lamb Schirmer,2002-04-02 A City Divided traces the development of white Kansas Citians perceptions of race and examines the ways in which those perceptions shaped both the physical landscape of the city and the manner in which Kansas City was policed and governed Because of rapid changes in land use and difficulties in suppressing crime and vice in Kansas City the control of urban spaces became an acute concern particularly for the white middle class before race became a problematic issue in Kansas City As the African American population grew in size and assertiveness whites increasingly identified blacks with those factors that most deprived a given space of its middle class character Consequently African Americans came to represent the antithesis of middle class values and the white middle class established its identity by excluding blacks from the urban spaces it occupied By 1930 racial discrimination rested firmly on gender and family values as well as class Inequitable law enforcement in the ghetto increased criminal activity both real and perceived within the African American community White Kansas Citians maintained this system of racial exclusion and denigration in part by misdirection either by denying that exclusion existed or by claiming that segregation was necessary to prevent racial violence Consequently African American organizations sought to counter misdirection tactics The most effective of these efforts followed World War II when local black activists devised demonstration strategies that targeted misdirection specifically At the same time a new perception emerged among white liberals about the role of race in shaping society Whites in the local civil rights movement acted upon the belief that integration would produce a better society by transforming human character Successful in laying the foundation for desegregating public accommodations in Kansas City black and white activists nonetheless failed to dismantle the systems of spatial exclusion and inequitable law enforcement or to eradicate the racial ideologies that underlay those systems These racial perceptions continue to shape race relations in Kansas City and

elsewhere This study demystifies these perceptions by exploring their historical context While there have been many studies of the emergence of ghettos in northern and border cities and others of race gender segregation and the origins of white ideologies *A City Divided* is the first to address these topics in the context of a dynamic urban society in the Midwest

Frontier Community: Kansas City to 1870 Andrew Theodore Brown, 1963 This history of Kansas City is interwoven with the history of the trans Missouri West This book pictures the city's beginnings as a fur trading post at the northward turning point of the Missouri River and describes the community as it became successively a post for trade with the Indians a trading and outfitting post for emigrants to California Oregon and the Southwest and as its immediate hinterland began to be settled an agricultural center The concluding chapters tell of the coming of the railroads and the building of the first railroad bridge across the Missouri creating from the little town of Kansas a city to serve a West that was merging with the mainstream of American history Professor Brown contends that the reshaping of the community as an instrument to serve the changing needs of the West were due in large measure to the foresight and efforts of a small cohesive group of business leaders He tells the story of their collective struggle against obstacles the rivalry of several nearby communities for trade railroads and bridges and the
