Greene, 2016-08-16 Intellectually rich intensely personal and beautifully written Tracks and Shadows is both an absorbing autobiography of a celebrated field biologist and a celebration of beauty in nature Harry W. Greene award winning author of Snakes The Evolution of Mystery in Nature delves into the poetry of field biology showing how nature eases our existential quandaries More than a memoir the book is about the wonder of snakes the beauty of studying and understanding natural history and the importance of sharing the love of nature with humanity Greene begins with his youthful curiosity about the natural world and moves to his stints as a mortician's assistant ambulance driver and army medic In detailing his academic career he describes how his work led him to believe that nature's most profound lessons lurk in hard won details He discusses the nuts and bolts of field research and teaching contrasts the emotional impact of hot dry habitats with hot wet

**Sexual Segregation in Vertebrates** Kathreen Ruckstuhl, Peter Neuhaus, 2006-01-05 Males and females often differ in developmental patterns, adult morphology, ecology, and behaviour, and in many mammals, males are often larger. Size dimorphism results in divergent nutritional and energetic requirements or reproductive strategies by the sexes, which in turn sometimes causes them to select different forage, use different habitats, and express differing social affinities. Such divergent life styles often lead males and females to live large parts of their lives separately. Sexual segregation is widespread in animals. Males and females may share the same habitat but at different times, for example, or they might use different habitats entirely. Why did sexual segregation evolve, and what factors contribute to it? Sexual Segregation in Vertebrates explores these questions by looking at a wide range of vertebrates and is aimed as a synthesis of our current understanding and a guide for future research.

*American Snakes* Sean P. Graham, 2018-02-18 A wonderful book to read because it is replete with snake stories, personal stories, and stories about other herpetologists, engaging Copeia. Although many people fear them, snakes are as much a part of America's rich natural heritage as redwoods, bald eagles, and grizzly bears. From the vast Okefenokee Swamp to high alpine meadows, from hardwood canopies to the burning bottom of the Grand Canyon, these ultimate vertebrates are ecologically pivotal predators and quintessential survivors. In this revelatory and engaging meditation on American snakes, Sean P. Graham, a respected herpetologist and gifted writer, explains the everyday lives of American snakes, from their daily routines and seasonal cycles to their love lives, hunting tactics, and defensive repertoires. It debunks harmful myths about snakes and explores their relationship with humans, highlights the contribution of snakes to the American wilderness, tells tales of snake people, important snake biologists with inspiring careers. Neither a typical field guide nor an exhaustive reference, *American Snakes* is instead a fascinating study of the suborder Serpentes, brimming with intriguing and unusual stories of hognose snakes that roll over and play dead, blind snakes with tiny vestigial lungs, rainbow-hued dipsadines, and wave-surfing sea snakes. The text is interspersed with scores of gorgeous full-color images of snakes, from the scary to the sublime. This proud celebration of a diverse American wildlife group will make every reader, no matter how skeptical, into a

genuine snake lover This thoroughly enjoyable book lets readers absorb the excitement of being a herpetologist who works with snakes while learning about the general and specific biology of the creatures Quarterly Review of Biology *The Amphibians and Reptiles of Arkansas* Stanley E. Mullin, Richard A. Seigel, 2011-08-15 Destruction of habitat due to urban sprawl pollution and deforestation has caused population declines or even extinction of many of the world s approximately 2 600 snake species Furthermore misconceptions about snakes have made them among the most persecuted of all animals despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests It has become increasingly urgent therefore to develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability In the first book on snakes written with a focus on conservation editors Stephen J Mullin and Richard A Seigel bring together leading herpetologists to review and synthesize the ecology conservation and management of snakes worldwide These experts report on advances in current research and summarize the primary literature presenting the most important concepts and techniques in snake ecology and conservation The common thread of conservation unites the twelve chapters each of which addresses a major subdiscipline within snake ecology Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered Each chapter provides an essential framework and indicates specific directions for future research making this a critical reference for anyone interested in vertebrate conservation generally or for anyone implementing conservation and management policies concerning snake populations Contributors Omar Attum Indiana University Southeast Steven J Beaupre University of Arkansas Xavier Bonnet Centre National de la Recherche Scientifique Frank T Burbrink College of Staten Island The City University of New York Gordon M Burghardt University of Tennessee Todd A Castoe University of Colorado David Chiszar University of Colorado Michael E Dorcas Davidson College Lara E Douglas University of Arkansas Christopher L Jenkins Project Orianne Ltd Glenn Johnson State University of New York at Potsdam Michael Hutchins The Wildlife Society Richard B King Northern Illinois University Bruce A Kingsbury Indiana University Purdue University Fort Wayne Thomas Madsen University of Wollongong Stephen J Mullin Eastern Illinois
