Idealism and Freedom Henry E. Allison,1996-01-26 Henry Allison is one of the foremost interpreters of the philosophy of Kant This new volume collects all his recent essays on Kant s theoretical and practical philosophy Special features of the collection are a detailed defense of the author s interpretation of transcendental idealism a consideration of the Transcendental Deduction and some other recent interpretations thereof further elaborations of the tensions between various aspects of Kant s conception of freedom and of the complex role of this conception within Kant s moral philosophy **Kant on Mind, Action, and Ethics** Julian Wuerth,2014-08-28 In this book Julian Wuerth offers a radically new interpretation of Kant s theories of mind action and ethics As the author of a Copernican revolution in philosophy Kant grounded his philosophy in his positive theory of the mind which remains an enigma two centuries later Wuerth s original interpretation of Kant s theory of mind consults a far wider range of Kant s recorded thought than previous interpretations revealing a fascinating evolution in Kant s thought in the decades before and after his 1781 Critique Starting in the 1760s Kant recognized the unique status of our epistemic contact to ourselves This is the sole instance of our immediate epistemic contact with a substance of being a substance and it is the sole instance of epistemic contact with something other than the particular states of inner sense Contrary to empiricists Kant thus rejects the reduction of the self to a bundle of mental states of inner sense But Kant also rejects the rational psychologists assumption that the souls substantiality and simplicity implies its permanence incorruptibility and immortality As Kant developed his transcendental idealism he eventually pinpointed the source of their errors a source neither unique to a particular historical school nor random It is instead a deep natural and timeless transcendental confusion Kants new account of substance allows him to draw new distinctions in kind between sensibility and understanding and between phenomenal and noumenal substance setting the stage for a transcendental argument that only at the phenomenal level do substantiality and simplicity imply permanence and incorruptibility Wuerth next undertakes a groundbreaking study of Kant s theory of action and ethics He first maps Kant s notoriously vast and complex system of the minds powers drawing on all of Kant s recorded thought This system structures Kant s philosophy as a whole and so provides crucial insights into this whole and its parts including Kant s theory of action a persisting stumbling block for interpreters of Kant s ethics Wuerth demonstrates that Kant rejects intellectualist theories of action that reduce

practical agents to pure reason We are instead irreducibly both intellectual and sensible exercising a power of choice or Willk
r subject to two irreducible conative currencies moral motives and sensible incentives as Kant makes clear long before his
1785 Groundwork Immoral choices at odds with the former can thus nonetheless be coherent choices in harmony with the
latter Wuerth applies these new findings about Kant s theory of mind and action to an analysis of the foundations of Kant s
ethics He rejects the dominant constructivist interpretation in favor of a moral realist one At the heart of Kant s
Enlightenment ethics is his insistence that the authority of the moral law ultimately rests in our recognition of its authority
Kant guides us to this recognition of the authority of the moral law across his works in ethics and his various formulations of
the moral law using a single elimination of sensibility procedure Here Kant systematically rejects the pretenses of sensibility
to isolate reason and its insights into moral right and wrong Precisely because immoral choice remains a coherent alternative
however moral virtue demands our ongoing cultivation of our capacities for cognition feeling desire and character **Kant**
and the Philosophy of Mind Anil Gomes, Andrew Stephenson, 2017 The fourteen original essays in this volume explore Kant
s writings on the mind covering such topics as intuition imagination inner sense self consciousness and the will These are
central to any understanding of Kant s critical philosophy and of continuing relevance to contemporary debates

Representational Mind Richard E. Aquila, 1983 *The Faculties of the Human Mind and the Case of Moral Feeling in*
Kant's Philosophy Antonino Falduto, 2014-04-02 In the past few decades a remarkable change occurred in Kant scholarship
the other Kant has been discovered i e the one of the doctrine of virtue and the anthropology Through the rediscovery of Kant
s investigations into the empirical and sensuous aspects of knowledge our understanding of Kant s philosophy has been
enriched by an important element that has allowed researchers to correct supposed deficiencies in Kant s work In addition
further questions concerning the nature of Kant s philosophy itself have been formulated the more the other Kant comes to
the fore the stronger the question concerning the connection between pure philosophy and empirical investigation becomes
The aim of this study is to show that the psychological and anthropological interpretations of Kant s pure philosophy are not
convincing and at the same time to illustrate some connections between his critical and anthropological investigations by
means of an analysis of the theory of the faculties Against both a transcendental psychological and an anthropological
reading the book presents Kant s theory of the faculties as a constitutive part of his critical philosophy and shows that there
is a close connection between Kant s pure philosophy and his moral aesthetic *Kant's Theory of Knowledge* Harold Arthur
Prichard, 1909 *Kant's Anatomy of the Intelligent Mind* Wayne Waxman, 2014 According to current philosophical lore Kant
rejected the notion that philosophy can progress by psychological means and endeavored to restrict it accordingly This book
reverses the frame from Kant the anti psychological critic of psychological philosophy to Kant the preeminent psychological
critic of non psychological philosophy **The Early Years of Mind** Lukas M. Verburgt, 2025-05-26 The Early Years of Mind
offers a panoramic overview as well as in depth accounts of the first decades of Mind one of the leading philosophical

journals since almost 150 years Founded in 1876 by Alexander Bain it soon published some of the best new work in Anglophone philosophy and psychology containing contributions from major and once well known but today largely forgotten authors from Herbert Spencer to Bertrand Russell and from J M E McTaggart to E E Constance Jones Mind's ambition was to provide a platform for study and discussion of the scientific status of philosophy and psychology whose intellectual and professional standing and boundaries were yet unsettled A focus on the contents of Mind in the first forty years of its existence not only helps unearth a revealing historical picture of the major topics themes and traditions that dominated philosophy at the turn of the nineteenth century including evolutionary thinking and the rise of idealist and analytic philosophers It also makes it possible to recognize their relevance to present day endeavours Mind's contributors addressed issues that still or sometimes again concern us today What is the relation between philosophy and psychology Should philosophers be knowledgeable of the latest scientific advances and if so how What is the significance of philosophy for the natural and exact sciences And what for society Last but not least a close look at Mind under George Croom Robertson and G F Stout offers a forceful reminder of the prominent role of women philosophers in Britain and America participating in philosophical and psychological discussion despite numerous constraints Bringing together a diverse team of eminent and emergent scholars this pioneering volume tells the fascinating story of Mind's early years and in so doing sheds light on larger questions about the history of philosophy and psychology at a time of disciplinary self experimentation

Kant on Mind, Action, and Ethics Julian Wuerth, 2014 Julian Wuerth offers a radically new interpretation of major themes in Kant's philosophy He explores Kant's ontology of the mind his transcendental idealism his account of the mind's powers and his theory of action and goes on to develop an original moral realist account of Kant's ethics

Kant and the Subject of Critique Avery Goldman, 2012 Immanuel Kant is strict about the limits of self knowledge our inner sense gives us only appearances never the reality of ourselves Kant may seem to begin his inquiries with an uncritical conception of cognitive limits but in Kant and the Subject of Critique Avery Goldman argues that even for Kant a reflective act must take place before any judgment occurs Building on Kant's metaphysics which uses the soul the world and God as regulative principles Goldman demonstrates how Kant can open doors to reflection analysis language sensibility and understanding By establishing a regulative self Goldman offers a way to bring unity to the subject through Kant's seemingly circular reasoning allowing for critique and ultimately knowledge
