Patterson, 2020-05-31 After being widely rejected in the late 20th century the work of Karl Marx is now being reassessed by many theorists and activists Karl Marx Anthropologist explores how this most influential of modern thinkers is still highly relevant for Anthropology today Marx was profoundly influenced by critical Enlightenment thought He believed that humans were social individuals that simultaneously satisfied and forged their needs in the contexts of historically particular social relations and created cultures Marx continually refined the empirical philosophical and practical dimensions of his anthropology throughout his lifetime Assessing key concepts from the differences between class based and classless societies to the roles of exploitation alienation and domination in the making of social individuals Karl Marx Anthropologist is an essential guide to Marx's anthropological thought for the 21st century *Karl Marx, Frederick Engels: Collected Works, Vol. 40, Marx and Engels: 1856-1859* Friedrich Engels, Karl Heinrich Marx, 1983 *Marx and Le Capital* Marcello Musto, 2022-12-16 Over the past few years Marx's Capital has received renewed academic and popular attention This volume is dedicated to the history of the making the theoretical evaluation and the analysis of the dissemination and reception of an almost unknown version of Capital the French translation published between 1872 and 1875 to which Marx participated directly In revising this version Marx decided to introduce some additions and modifications not hesitating to describe in the postscript Le Capital as a scientific value independent of the original To mark the 150th anniversary of the French translation of Capital 1872 2022 15 authors have helped to shed light on its history and main features as well as analysing its later fortunes in France and in the rest of the world They also provide a more exhaustive account of the ideas of the late Marx The book also includes a previously unpublished selection of 31 letters from correspondence of Karl Marx Maurice Lachtre Just Vernouillet and Friedrich Engels related to the making of Le Capital 10 of these letters by Marx were only recently rediscovered and are translated here for the first time in English This book is an indispensable source for academic communities who are increasingly interested in rediscovering Marx beyond 20th century Marxism Moreover it will be of appeal to graduate students as well as established scholars interested in French socialism and the history of the labour movement **The Oxford Handbook of Karl Marx** Matt Vidal, Tony Smith, Tomás Rotta, Paul Prew, 2019-03-26 Karl Marx is one of the most influential writers in history Despite repeated obituaries proclaiming the death of Marxism in the 21st century Marx's ideas and theories continue to guide vibrant research traditions in sociology economics political science philosophy history anthropology management economic geography ecology literary criticism and media studies Due to the exceptionally wide influence and reach of Marxist theory including over 150 years of historical debates and traditions within Marxism finding a point of entry can be daunting The Oxford Handbook of Karl Marx provides

*In Pursuit of Marx's Theory of Crisis* Kuruma Samezō, 2024-08-05 Karl Marx wrote extensively on crisis but never presented a coherent theory of crisis Samezo Kuruma a Japanese Marxian economist aimed to complete Marx's unfinished theory Starting from Marx's observation that the crises of the world market are the real concentration and forcible adjustment of all the contradictions of the bourgeois economy Kuruma seeks to grasp the inherent contradictions that drive forward and limit capitalism His focus on the contradictory dynamics of capitalism sets him apart from Marxian thinkers who try to identify a single primary cause of crisis This volume brings together all of his writings related to crisis

**Marx's Capital and Hegel's Logic**, 2014-04-17 This book provides a wide ranging and in depth reappraisal of the relation between Marx's economic theory in *Capital* and Hegel's *Logic* by leading Marxian economists and philosophers from around the world The subjects dealt with include systematic dialectics the New Dialectics materialism vs idealism Marx's inversion of Hegel Hegel's Concept logic universality particularity singularity Hegel's Essence logic essence appearance Marx's levels of abstraction of capital in general and competition and capital as Hegelian Subject The papers in this volume were originally presented at the 22nd annual meeting of the International Symposium on Marxian Theory at Mount Holyoke College in August 2011 The twelve authors are divided between seven economists and five philosophers as is fitting for the interdisciplinary subject of the relation between Marx's economic theory and Hegel's logic Contributors are Chris Arthur Riccardo Bellofiore Roberto Fineschi Gast n Caligaris Igor

Hanzel Juan I igo Carrera Mark Meaney Fred Moseley Patrick Murray Geert Reuten Mario Robles Tony Smith and Guido Starosta **The Dangerous Class** Clyde Barrow,2020-10-19 Marx and Engels concept of the lumpenproletariat or underclass an anglicized politically neutral term appears in The Communist Manifesto and other writings It refers to the dangerous class the social scum that passively rotting mass thrown off by the lowest layers of old society whose lowly status made its residents potential tools of the capitalists against the working class Surprisingly no one has made a substantial study of the lumpenproletariat in Marxist thought until now Clyde Barrow argues that recent discussions about the downward spiral of the American white working class its main problem is that it is not working have reactivated the concept of the lumpenproletariat despite long held belief that it is a term so ill defined as not to be theoretical Using techniques from etymology lexicology and translation Barrow brings analytical coherence to the concept of the lumpenproletariat revealing it to be an inherent component of Marx and Engels analysis of the historical origins of capitalism However a proletariat that is destined to decay into an underclass may pose insurmountable obstacles to a theory of revolutionary agency in post industrial capitalism Barrow thus updates historical discussions of the lumpenproletariat in the context of contemporary American politics and suggests that all post industrial capitalist societies now confront the choice between communism and dystopia *Henryk Grossman Works, Volume 3* Henryk Grossman,2021-11-01 Long awaited the first full translation of Henryk Grossman s The Law of Accumulation and Breakdown of the Capitalist System Being also a Theory of Crisis has been published in English It was the most important influential and yet most denounced of Grossman s works and recovers not only Marx s primary explanation of capitalism s economic crises and breakdown tendency but also his method in Capital *Cosmopolitanism and Its Discontents* Lee Ward,2020-06-23 Cosmopolitanism is one of the most venerable intellectual traditions in the history of political philosophy From the ancient Greek Diogenes claim to be a citizen of the world through to Kant s Enlightenment vision of a world government and even into our own time the idea of cosmopolitanism has stirred the moral imagination of many throughout history Arguably the Brexit referendum result and the election of Donald Trump in 2016 marked the first major public repudiation of the transnational globalizing cosmopolitan ideals that have arguably dominated politics in the liberal democratic West since the end of the Cold War This volume reconsiders cosmopolitanism and its discontents in the age of Brexit and Trump by bringing together the great thinkers in the history of political philosophy and contemporary reflections on the problems and possibilities of international relations human rights multiculturalism and regnant theories of democracy and the state **Marx's Concept of Money** Anitra Nelson,2012-11-12 This work relates Marx s theory of money to his overall political economy and places it firmly within the wider context of his political and philosophical thought It has for some time been held that there exists an epistemological break between the early humanist and later scientific Marx However in this ground breaking study Anitra Nelson links Marx s concept of money to his early key concepts with particular reference to alienation *Henryk Grossman Works, Volume 1* Henryk

capitalism It shows that his critique of capital flowed from a commitment to a specific vision of the kind of human relations that define a new society      **Karl Marx, Frederick Engels** Karl Marx, 1975
