## **Katanga Legacy:**

**Katanga Legacy** Jerry L. Melton, 2001      *Encyclopedia of Stateless Nations* James B. Minahan, 2016-08-01 This book addresses the numerous national movements of ethnic groups around the world seeking independence more self rule or autonomy movements that have proliferated exponentially in the 21st century In the last 15 years globalization religious radicalization economic changes endangered cultures and languages cultural suppression racial tensions and many other factors have stimulated the emergence of autonomy and independence movements in every corner of the world even in areas formerly considered immune to self government demands such as South America Researching the numerous ethnic groups seeking autonomy or independence worldwide previously required referencing many specialized publications This book makes this difficult to find information available in a single volume presented in a simple format accessible to everyone from high school readers to scholars in advanced studies programs The book provides an extensive update to Greenwood's Encyclopedia of the Stateless Nations Ethnic and National Groups around the World that was published more than a decade earlier Each ethnic group receives an alphabetically organized entry containing information such as alternate names population figures flag or flags geography history culture and languages All the information readers need to understand the motivating factors behind each movement and the current situation of each ethnic group is presented in a compact summary Fact boxes at the beginning of each entry enable students to quickly access key information and consistent entry structure makes for easy cross cultural comparisons      A Critical Introduction to International Criminal Law Carsten Stahn, 2019 Presents theories practices and critiques alongside each other to engage students scholars and professionals from multiple fields This title is also available as Open Access on Cambridge Core      **How States Die** Douglas Lemke, 2025 When states die there are massive consequences for neighboring states and sometimes for the entire international system Somalia's death in 1991 created a safe haven for criminal non state actors and has unsettled the Horn of Africa for decades When the Iraqi state was dismantled in 2003 a similar set of consequences plagued the Middle East and the international system more broadly In *How States Die* Douglas Lemke provides a rigorous analysis of this phenomenon by reconceptualizing the definitions of the state and state death A state exists according to Lemke whenever a set of state like political entities exercise control over a populated territory This includes both sovereign states and territorial contenders which lack formal diplomatic recognition Conceiving statehood in this way vastly increases the population of states that have experienced state death which casts new light on the entire phenomenon This increased range not only expands the list of ways states can die it also provides insights into whether diplomatic recognition is associated with longer life and shows that state strength is not related to state death Similarly in contrast to the conventional wisdom victories in conflict do not coincide with longer state survival State death is one of the central questions within international relations and Lemke's reformulation of what a state is will transform our understanding of how and why these deaths happen      **Remembering, Forgetting and City Builders**

Haim Yacobi, 2016-04-08 *Remembering Forgetting and City Builders* critically explores how urban spaces are designed, planned and experienced in relation to the politics of collective and personal memory construction. Bringing together case studies from North America, South Asia, Eastern Europe and the Middle East, the book analyzes how contested national, ethnic and cultural sentiments clash in planning and experiencing urban spaces. Going beyond the claim that such situations exist in many parts of the world because communities construct their past memories within their current daily life and future aspirations, the book explores how the very acts of planning and urban design are rooted in the existing structures of hegemonic power. With contributors from the fields of architecture, geography, planning, anthropology and sociology, urban studies and cultural studies, the book provides a rich interdisciplinary view into the conflicts over memory and belonging which are spatially expressed and mediated through the official planning apparatus.

**The Katangese Gendarmes and War in Central Africa** Erik Kennes, Miles Larmer, 2016-07-04 A history of the 1960s unrecognized state's army and their role in Central Africa's political and military conflicts. Erik Kennes and Miles Larmer provide a history of the Katangese gendarmes and their largely undocumented role in many of the most important political and military conflicts in Central Africa. Katanga, located in today's Democratic Republic of Congo, seceded in 1960 as Congo achieved independence and the gendarmes fought as the unrecognized state's army during the Congo crisis. Kennes and Larmer explain how the ex-gendarmes then exiled in Angola struggled to maintain their national identity and return home. They take readers through the complex history of the Katangese and their engagement in regional conflicts and Africa's Cold War. Kennes and Larmer show how the paths not taken at Africa's independence persist in contemporary political and military movements and bring new understandings to the challenges that personal and collective identities pose to the relationship between African nation-states and their citizens and subjects. A fascinating story which is tied to the colonial development of Katanga province, Cold War politics in Central Africa, the crisis of the postcolonial state in the Congo and the interregional politics in the Great Lakes area. Georges Nzongola Ntalaja, University of North Carolina. A major contribution to our understanding of postcolonial politics in Africa, more broadly, and sheds light on the survival of militias over time and forms of subnationalism emerging from regional consciousness. M. Crawford Young, University of Wisconsin-Madison.

*Contested Justice* Christian De Vos, Sara Kendall, Carsten Stahn, 2015-12-18 The International Criminal Court emerged in the early twenty-first century as an ambitious and permanent institution with a mandate to address mass atrocity crimes such as genocide and crimes against humanity. Although designed to exercise jurisdiction only in instances where states do not pursue these crimes themselves and are unwilling or unable to do so, the Court's interventions, particularly in African states, have raised questions about the social value of its work and its political dimensions and effects. Bringing together scholars and practitioners who specialise on the ICC, this collection offers a diverse account of its interventions from investigations to trials and from the Court's Hague-based centre to the networks of actors who sustain its activities. Exploring connections with transitional justice and

international relations and drawing upon critical insights from the interpretive social sciences it offers a novel perspective on the ICC's work. This title is also available as Open Access.

[Practices of Reparations in International Criminal Justice](#) Christoph Sperfeldt, 2022-07-07 Combining interdisciplinary techniques with original ethnographic fieldwork Christoph Sperfeldt examines the first attempts of international criminal courts to provide reparations to victims of mass atrocities. The observations focus on two case studies: the Extraordinary Chambers in the Courts of Cambodia where Sperfeldt spent over ten years working at and around and the International Criminal Court's interventions in the Democratic Republic of Congo. Enriched with first-hand observations and an awareness of contextual dynamics, this book directs attention to the social life of reparations that too often get lost in formal accounts of law and its institutions. Sperfeldt shows that reparations are constituted and contested through a range of practices that produce change and give meaning to reparations. Appreciating the nature and effects of these practices provides us with a deeper understanding of the discrepancies that exist between the reparations ideal and how it functions imperfectly in different contexts.

[The Congo Trials in the International Criminal Court](#) Richard Gaskins, 2022-05-26 This is the first in-depth study of the first three ICC trials: an engaging, accessible text meant for specialists and students, for legal advocates and a wide range of professionals concerned with diverse cultures, human rights and restorative justice. Now with an updated postscript for the paperback edition, it offers a balanced view on persistent tensions and controversies. Separate chapters analyze the working realities of central African armed conflicts, finding reasons for their surprising resistance to ICC legal formulas. The book dissects the Court's structural dynamics which were designed to steer an elusive middle course between high moral ideals and hard political realities. Detailed chapters provide vivid accounts of courtroom encounters with four Congolese suspects. The mixed record of convictions, acquittals, dissents and appeals resulting from these trials provides a map of distinct fault lines within the ICC legal code and suggests a rocky path ahead for the Court's next ventures.

[Research Handbook on the International Penal System](#) Róisín Mulgrew, Denis Abels, 2016-05-27 Drawing on the expertise and experience of contributors from a wide range of academic, professional and judicial backgrounds, the Research Handbook on the International Penal System critically analyses the laws, policies and practices that govern detention, punishment and the enforcement of sentences in the international criminal justice context. Comprehensive and innovative, it examines the operation of the international penal system covering pertinent issues such as non-custodial sanctions, monitoring of conditions of detention, the protection of prisoners under international law and the transfer of prisoners. These aspects are presented in a logical order, linking up with the chronological sequence of the international criminal justice process. Far-reaching, this Handbook also explores broader normative questions related to contemporary human rights law, transitional and restorative justice and victim redress, before exploring contemporary and alternative mechanisms for punishing and overseeing punishment and possible avenues for development. This up-to-date assessment will provide valuable insights for researchers and students of international criminal law and justice comparative

Bazyler, 2017-07 A great deal of contemporary law has a direct connection to the Holocaust That connection however is seldom acknowledged in legal texts and has never been the subject of a full length scholarly work This book examines the background of the Holocaust and genocide through the prism of the law the criminal and civil prosecution of the Nazis and their collaborators for Holocaust era crimes and contemporary attempts to criminally prosecute perpetrators for the crime of

genocide It provides the history of the Holocaust as a legal event and sets out how genocide has become known as the crime of crimes under both international law and in popular discourse It goes on to discuss specific post Holocaust legal topics and examines the Holocaust as a catalyst for post Holocaust international justice Together this collection of subjects establishes a new legal discipline which the author Michael Bazylar labels Post Holocaust Law
