Living Without Philosophy On Narrative Rhetoric And Morality:

Living Without Philosophy Peter Levine, 1998-01-01 Drawing on implications from ethics theology law politics and education this book argues that we can decide what is right by describing particular cases in detail without the aid of ethical theories and principles

Damaged Identities, Narrative Repair Hilde Lindemann, 2001 The nature of identity especially of groups such as Gypsies mothers nurses and transsexuals is explored by comparing the stories these groups express of themselves against the narratives written about them Feminist Academic Press Hilde Lindemann Nelson focuses on the stories of groups of people including Gypsies mothers nurses and transsexuals whose identities have been defined by those with the power to speak for them and to constrain the scope of their actions By placing their stories side by side with narratives about the groups in question Nelson arrives at some important insights regarding the nature of identity She regards personal identity as consisting not only of how people view themselves but also of how others view them These perceptions combine to shape the person's field of action If a dominant group constructs the identities of certain people through socially shared narratives that mark them as morally subnormal those who bear the damaged identity cannot exercise their moral agency freely Nelson identifies two kinds of damage inflicted on identities by abusive group relations one kind deprives individuals of important social goods and the other deprives them of self respect To intervene in the production of either kind of damage Nelson develops the counterstory a strategy of resistance that allows the identity to be narratively repaired and so restores the person to full membership in the social and moral community By attending to the power dynamics that constrict agency *Damaged Identities Narrative Repair* augments the narrative approaches of ethicists such as Alasdair MacIntyre Martha Nussbaum Richard Rorty and Charles Taylor

Narrative Power and Liberal Truth Eldon J. Eisenach, 2002 Liberal political thought from its origins in the seventeenth century through today's rights discourse is grounded in the ideal of the autonomous individual As the theory holds these individuals are born in freedom from religious political social or economic obligations and then construct these systems through individual and collective choices Over the past thirty years however this understanding of freedom has been challenged from a variety of perspectives Eldon J Eisenach has been at the forefront of that challenge stressing the centrality of religious elements and assumptions in liberal writings that many scholars suppressed or ignored In *Narrative Power and Liberal Truth* Eisenach brings together eleven of his previously published essays to demonstrate that many postmodernist ideas of persons and freedom are already present within the tradition of liberal political philosophy and that liberalism itself is more capacious of human experience and meanings than modern critiques allow

Justice and Global Politics Ellen Frankel Paul, Fred D. Miller (Jr.), Jeffrey Paul, 2006 Since the end of the Cold War there has been increasing interest in the global dimensions of a host of public policy issues issues involving war and peace terrorism international law regulation of commerce environmental protection and disparities of wealth income and access to medical care Especially pressing is the question of whether it is possible to formulate

principles of justice that are valid not merely within a single society but across national borders The thirteen essays in this volume explore a range of issues that are central to contemporary discussions of global politics Written by prominent philosophers political scientists economists and legal theorists they offer valuable contributions to current debates over the nature of justice and its implications for the development of international law and international institutions

Philosophical Dimensions of Public Policy Verna V. Gehring, William Arthur Galston, At the mid point of the twentieth century many philosophers in the English speaking world regarded political and moral philosophy as all but moribund Thinkers influenced by logical positivism believe that ethical statements are merely disguised expressions of individual emotion lacking propositional force or that the conditions for the validation of ethical statements could not be specified or that their content however humanly meaningful is inexpressible Philosophical Dimensions of Public Policy presents thirty four articles written by research scholars numerous fields philosophy political theory medicine law biology economics ecology and sociology treating a broad range of topics in practical philosophy The Institute for Philosophy and Public Affairs has been home for these ideas pioneering a distinctive method of conducting inquiry into the moral dimensions of public life and contributing to public discussion and deliberation Members of the Institute reject the idea that public philosophy means reaching into the philosopher s tool kit and applying prefabricated theories to particular problems They set

in motion a dialogue between the distinctive moral features of practical problems and the more general moral theories or considerations that seem most likely to elucidate these problems The volume is divided into five areas Politics Civic Life and Moral Education Diversity Identity and Equal Opportunity Human Rights Development Ethics and International Justice Biotechnology Genetic Research and Health Policy and Natural Environment Human Communities Philosophical Dimensions of Public Policy presents empirical data and philosophical arguments with the intention of informing public policy and public deliberation Scholars as well as graduate and undergraduate students are certain to find it useful to their research work Verna V Gehring is editor at the Institute for Philosophy and Public Policy at the School of Public Affairs University of Maryland She serves as editor of Philosophy Public Policy Quarterly reviewer of ethics manuscripts for Oxford University Press and moderator for the Aspen Institute William A Galston is director at the Institute for Philosophy and Public Policy at the School of Public Affairs University of Maryland He is a political theorist who both studies and participates in American politics and domestic policy Galston is the author of nearly one hundred articles on moral and political theory American politics and public policy and the author of five books including Liberal Purposes

The Heart of Judgment Leslie Paul Thiele, 2006-09-04 The Heart of Judgment explores the nature historical significance and continuing relevance of practical wisdom Primarily a work in moral and political thought it also relies extensively on research in cognitive neuroscience to confirm and extend our understanding of the faculty of judgment Ever since the ancient Greeks first discussed practical wisdom the faculty of judgment has been an important topic for philosophers and political theorists It remains one of the virtues most demanded of our public officials The greater the liberties and responsibilities accorded to citizens in democratic regimes the more the health and welfare of society rest upon their exercise of good judgment While giving full credit to the roles played by reason and deliberation in good judgment the book underlines the central importance of intuition emotion and worldly experience

precepts as a social psychological theory This volume encompasses over 20 chapters across four sections assimilating cross disciplinary insights that try to understand the theoretical underpinnings methodological applications and contemporary relevance of Positioning Theory Part 1 explores the movement of scholarly figures and their numerous works on the subject It discusses the foundational origins and the historical contexts of the existing theories on positioning and new directions for scholarship Part 2 examines the methodological and narrative investigations used for data analysis in positioning research navigating through the epistemological orientations and theoretical landscapes of Positioning Theory Part 3 explores numerous applications across disciplines to consider the reach and influence of positioning within and across multiple disciplines Lastly the authors contemplate the future directions for Positioning Theory Featuring researchers from leading research institutions from across the globe the book is important reading for scholars interested in positioning and Positioning Theory We recommend this handbook for graduate level courses in social psychology communication discourse studies and related disciplines

Law, Pragmatism, and Democracy Richard A. Posner, 2009-07-01 Posner argues for a conception of the liberal state based on pragmatic theories of government He emphasizes the institutional and material rather than moral and deliberative factors in democratic decision making Posner argues that democracy is best viewed as a competition for power by means of regular elections

Teaching Environmental Ethics Clare Palmer, 2006-04-01 This collection explores a variety of questions both of a theoretical and practical nature raised by teaching environmental ethics Questions considered move from asking whether teaching environmental ethics should include environmental advocacy to practical issues about texts syllabi and teaching techniques

[The Crane's Walk](#) Jeremy Barris, 2009-08-25 In *The Crane's Walk* Jeremy Barris seeks to show that we can conceive and live with a pluralism of standpoints with conflicting standards for truth with the truth of each being entirely unaffected by the truth of the others He argues that Plato's work expresses this kind of pluralism and that this pluralism is important in its own right whether or not we agree about what Plato's standpoint is The longest tradition of Plato scholarship identifies crucial faults in Plato's theory of Ideas Barris argues that Plato deliberately displayed those faults because he wanted to demonstrate that basic kinds of error or illogic have dimensions that are crucial to the establishing of truth These dimensions legitimate a paradoxical coordination of logically incompatible conceptions of truth Connecting this idea with emerging currents of Plato scholarship he emphasizes in addition to the dialogues arguments the importance of their nonargumentative features including drama myths fictions anecdotes and humor These unanalyzed nonargumentative features function rigorously as a lever with which to examine the enterprise of rational argument itself without presupposing its standards or illegitimately assimilating any position to the standards of another Today communities are torn apart by conflicts within and between a host of different pluralist and absolutist commitments The possibility developed in this book a coordination of absolute and relative truth that allows an understanding of some relativist and some absolutist positions as being fully legitimate and as capable of existing in a

relation to their opposites may contribute to perspectives for resolving these conflicts *Qualitative Inquiry and Human Rights* Norman K Denzin, Michael D Giardina, 2016-06-16 Qualitative researchers are increasingly being called upon to become human rights advocates to help individuals and communities honor the sanctity of life and to promote the core values of privacy justice freedom peace and human dignity In this volume of plenary papers from the Fifth International of Qualitative Inquiry in 2009 leading qualitative researchers show the various dimensions of the human rights work being done by scholar activists in the social sciences education health care social services cultural studies and other fields

Suffering, Politics, Power Cynthia Halpern, 2002-01-03 Suffering and politics in the thought of Luther Hobbes Rousseau and Nietzsche Rethinking the Humanities Ricardo Gil Soeiro, Sofia Tavares, 2011-11-15 In what we consider to be a timely collection of essays the volume *Rethinking the Humanities* Paths and Challenges tries to reflect upon the present condition of the humanities and their manifold challenges acutely dramatized in an era of increasing contingency and globalization By drawing upon a wide variety of perspectives and areas of research from literary studies to philosophy from cultural criticism to the history of ideas we hope to surpass the now dominant rhetoric of crisis as it features for example in George Steiner's essay *Humanities At Twilight* not only by devising new horizons for a humanistic literary culture Cndido de Oliveira Martins and envisioning literary studies in a Post literary age David Damrosch but also by advocating an ethical turn for the humanities Peter Levine and Jos Pedro Serra seen as an education toward autonomy Richard Wolin as well as by reconsidering the very notion of crisis within the humanities Marjorie Perloff and Antnio Sousa Ribeiro By doing so and whilst it does not claim to offer definitive answers the volume nevertheless strives to open up new fields of debate and innovative perspectives The editors *Social Justice and Communication Scholarship* Omar Swartz, 2013-09-13 *Social Justice and Communication Scholarship* explores the role of communication in framing and contributing to issues of social justice This collection a first on the subject of communication and social justice investigates the theoretical and practical ways in which communication scholarship can enable inclusive and equitable communities within American society It analyzes ways in which to construct communities that protect individual freedom while ensuring equality and dignity to everyone In this unique anthology Swartz brings together both senior scholars and junior colleagues to represent diverse applications of communication to issues of social justice He supports partisan scholarship in order to revitalize intellectual activity and social commitment toward creating a progressive society As a result the volume serves the heuristic function of posing new research questions In addition to its relevance within the field of communication *Social Justice and Communication Scholarship* will be of interest in many of the humanities and social sciences as research on the theme of social justice transcends disciplinary boundaries The volume is particularly well suited for use in undergraduate and graduate courses in communication rhetoric and composition journalism American studies and cultural studies A Marriage of Philosophy and Music Erich Welling, 2014-04 How to use philosophy and music to open your horizons and enjoy

being yourself put theory to work and help you experience personal growth is discussed in *A Marriage of Philosophy and Music*. It is all about after having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills. We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality. This book offers a path toward the education of privacy with the key words being selection, design, and beauty. The book relates five areas of general human interest: spirituality, philosophy, science, art, and body awareness. The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music. Because of the plurality of subject matters and methods used in philosophy and music, their patterns of discipline are comparable to self-discipline. *A Marriage of Philosophy and Music* attempts to create a path in this direction because besides the enjoyment of social culture and personal skills, there is enjoyment in being yourself, which is a neglected liberal art. *Divine Motivation Theory* Linda Trinkaus Zagzebski, 2004-08-02 Publisher Description *The Elements of Journalism* Bill Kovach, Tom Rosenstiel, 2014 Identifies the essential elements of journalism and its role in our society **Patriotic Elaborations** Charles Blattberg, 2009-03-01 How might we mend the world? Charles Blattberg suggests a new patriotism, one that reconciles conflict through a form of dialogue that prioritizes conversation over negotiation and the common good over victory. This patriotism can be global as well as local, left as well as right. Blattberg's is a genuinely original philosophical voice. The essays collected here discuss how to re-conceive the political spectrum where deliberative democrats go wrong, why human rights language is tragically counterproductive, how nationalism is not really secular, how many nations should share a single state, a new approach to the Arab-Israeli conflict, and why Canada might have something to teach about the war on terror. We also learn about the right way to deny a role to principles in ethics, how to distinguish between the good and the beautiful, the way humor works, the rabbinic nature of modernism, the difference between good, bad, great, and evil, why Plato's dialogues are not really dialogues, and why most philosophers are actually artists.
