Advances in Soft Computing Grigori Sidorov, Arturo Hernández Aguirre, Carlos Alberto Reyes Garcia, 2010-10-31 Artificial intelligence AI is a branch of computer science that models the human ability of reasoning usage of human language and organization of knowledge solving problems and practically all other human intellectual abilities Usually it is characterized by the application of heuristic methods because in the majority of cases there is no exact solution to this kind of problem Soft computing can be viewed as a branch of AI that deals with the problems that explicitly contain incomplete or complex information or are known to be impossible for direct computation i e these are the same problems as in AI but viewed from the perspective of their computation The Mexican International Conference on Artificial Intelligence MICA I a yearly international conference series organized by the Mexican Society for Artificial Intelligence SMIA is a major international AI forum and the main event in the academic life of the country s growing AI community In 2010 SMIA celebrated 10 years of activity related to the organization of MICA I as is represented in its slogan Ten years on the road with AI MICA I conferences traditionally publish high quality papers in all areas of artificial intelligence and its applications The

proceedings of the previous MICAI events were also published by Springer in its Lecture Notes in Artificial Intelligence LNAI series vols 1793 2313 2972 3789 4293 4827 5317 and 5845 Since its foundation in 2000 the conference has been growing in popularity and improving in quality
